1-SAFETY INSTRUCTIONS

The following directions must be followed carefully for safe use, to prevent personal injuries, and damage to the equipment.

Please read this entire manual before initial use and store it in a convenient location for on easy access.

WARNING: To ensure safe operation, observe specifications, notices and cautions in this document. Digital Centre Accepts no liability for damage or injuries from improper use of this product.

WARNING: Prevent electrical shock and equipment damage. Before connecting or disconnecting cables and/or changing the paper, disconnect power cord from the A/C outlet.

Safety precautions

WARNING: Prevent shock hazard and damage. Only plug the power cord into a **220 volts (110 volts for USA) grounded A/C outlet.**

WARNING: Do **not** touch exposed wires or moving parts such as power supply modules and the control board. Touching these parts could cause electric shock or other injury, data loss, and/or printer malfunction.

WARNING: Only use Mitsubishi CK9046(DC) paper / ink ribbon set in the printer. Use of other paper / ink ribbon will cause software malfunction, poor image quality, and/or printer damage.

WARNING: Do **not** touch the thermal print head, or head area of the printer. The print head operates at an extremely hot temperature. Touching it might cause burns or other injury.

WARNING: Follow the directions in the Mitsubishi manual when cleaning the printhead. Do not use cotton, wool or other fabric swabs. The lint left behind poses a fire hazard.

NOTICE: Read additional **Warnings** in Mitsubishi Printer Manual.

WARNING: The printers are not interchangeable.

Danger: Tipping Hazard! PhotoBooth may pose danger to small children and/or pets. Unplug the power cord from the A/C outlet immediately if the PhotoBooth tips over.

WARNING: Use only original parts from Digital Centre.

Use only original parts for your PhotoBooth from Digital Centre. Non original parts may compromise the use of the PhotoBooth and may create a malfunction and cause serious damage. Using different components, changing wiring, or altering the photo booth in any fashion will void the warranty.

Digital Centre is unable to assist any customer that has changed, modified, or altered the PhotoBooth using non original parts. We cannot provide a guarantee or service for products that are not original parts from Digital Centre.

Danger: Power Off the PhotoBooth immediately if any of the following occurs:
- Smoke
- Unusual Odor
- Unusual Noise
- Water or other Liquids spill inside the PhotoBooth
- Physical Damage

Danger: Do not place or store the PhotoBooth in wet or extremely humid areas, in direct sunlight, near an open flame or heater, and/or swimming pools. Avoid Condensation.

Danger: Operate the PhotoBooth in locations with ambient temperatures of 5°C – 40°C (41°F – 104°F)

Danger: Install the PhotoBooth on a flat, even and, clean surface.

Danger: Repairs should only be made by qualified technicians.

WARNING: Indoor Use Only

WARNING: The PhotoBooth has to be connected to internet

MAINTENANCE: Cleaning: Use only a clean, dry, soft cloth. If necessary use a damp cloth and/or neutral detergent. Do not use window cleaner or any other alkaline cleaners.

2-SPECIFICATIONS

NEW GENERATION PANTHER

Power Supply: AC 220V 50/60 Hz(110V for USA)
Power Consumption: 810W
Weight = 196.5 Kg / 433.2 lbs.

Nominal fuse rating= 6 Amps
Monitor: LCD Monitor 17"
Printer: Mitsubishi CP9550 Dye Sublimation Photo Printer

Specifications may change at any time without prior notice.

3-FIRST STEPS WITH YOUR PHOTOBOOTH

3.1 CONTENT

These are the accessories included with your new Digital Centre PhotoBooth:

Manual

Keys

Boot DVD

Power Cord

Mini Wireless "N" USB Adapter

USB extension cable (optional)

Warning: Movement of the PhotoBooth requires assistance from two or more people.

· Unwrap and remove all packaging materials. Remove screws and metal holding plates that attach the PhotoBooth to the skid.

· All major components of the PhotoBooth are located under the seat. Access to the components is through the lower rear service door.

· Access to the printer and the USB port of the computer is on the left. Unlock and open this side service door and then remove the protective polystyrene foam block before first use.

· The keys for the service door, service panel, manuals, and power cord are located in the picture chute on the right side of the PhotoBooth.

· Inspect the wiring harnesses for disconnected plugs.

3.2 INSTALLATION

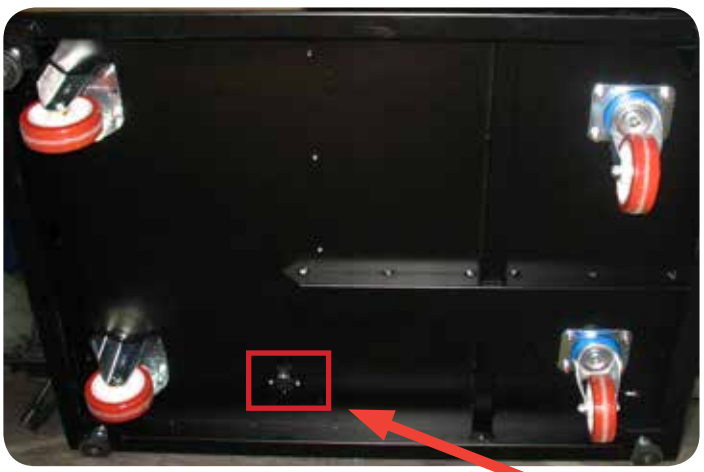
Plug the power cord into the socket underneath the Photo Booth. Slide the power switch to the "ON" position.

Adjust the height of the four metal legs once the final location for the booth has been established. The metal legs are underneath the cabin next to the wheels.

3.3 POWER SWITCH

The Power Switch is located underneath the cabin.
It contains a Fuse and a power cord socket.

3.4 LAND CABLE RJ45 ETHERNET (INTERNET)



Internet connection

- Check the distance between the internet connection and the position of your photobooth in the room.
- Ensure you have a Land Cable (RJ45 ethernet cable) that is long enough.

P.9 Land Cable
(RJ45 ethernet cable) (internet)
(not included)

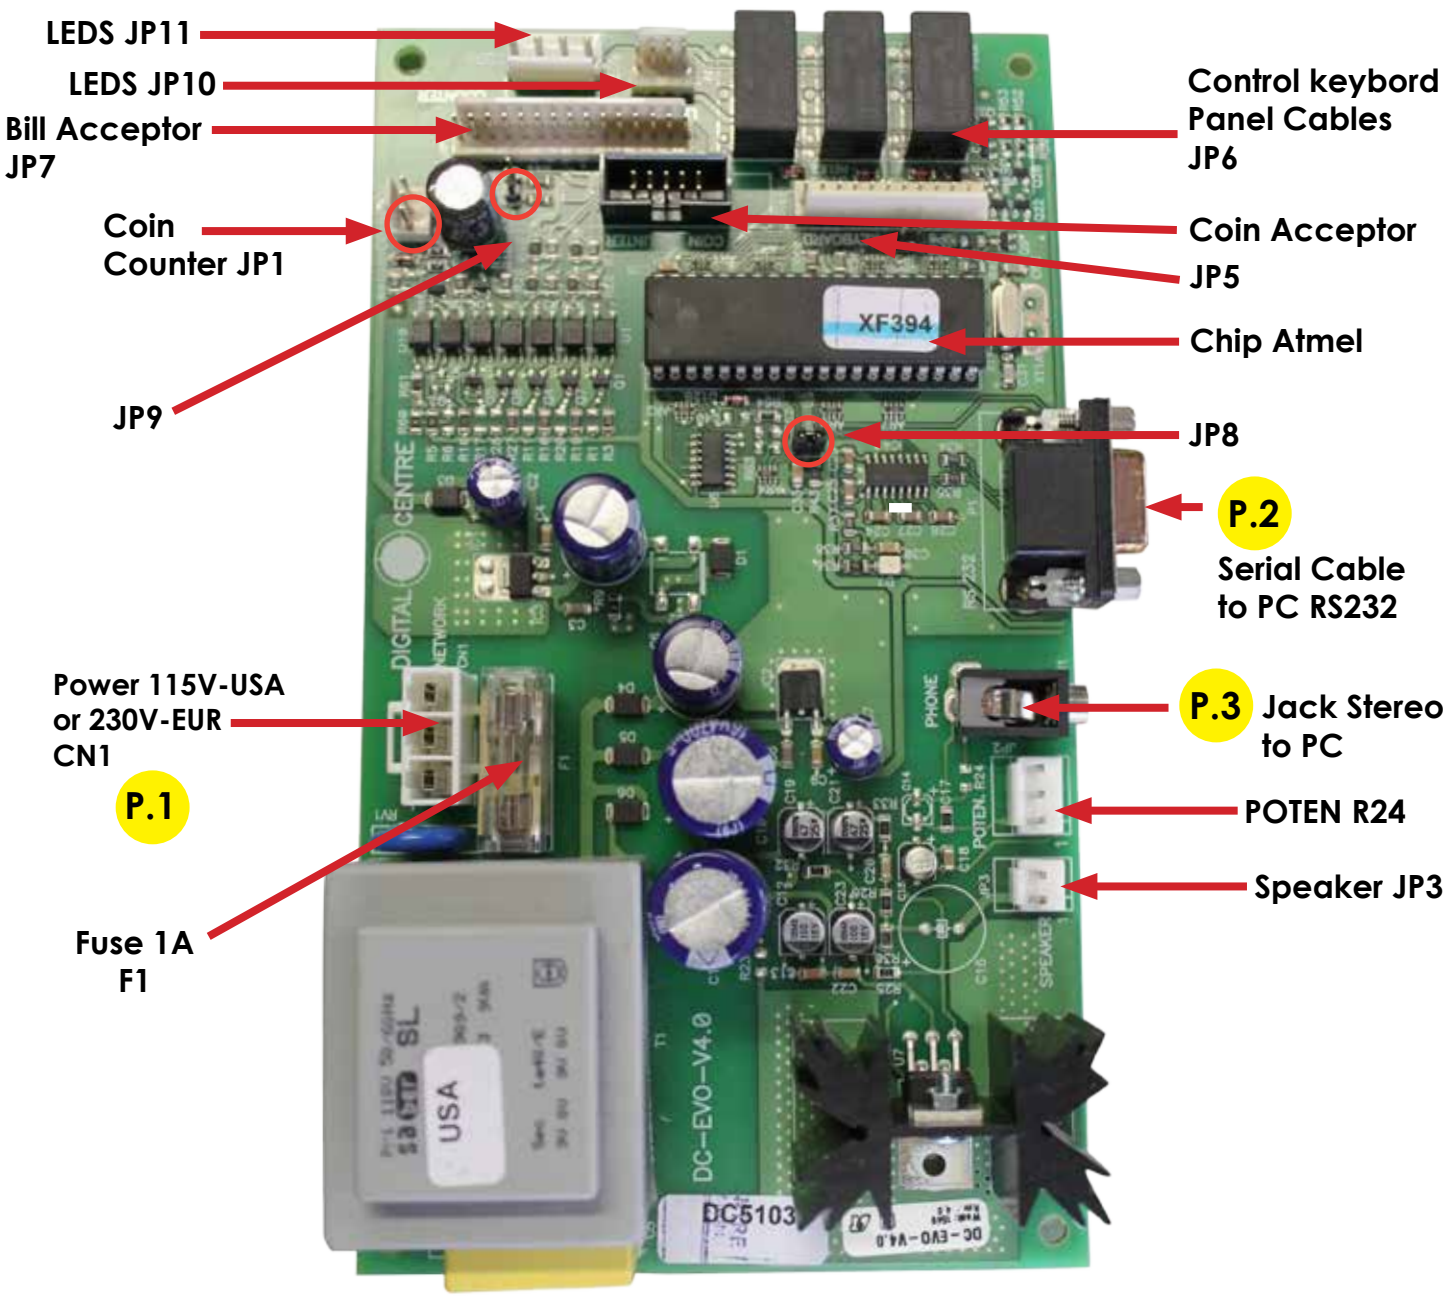
⚠ **WARNING:**
- The cable just can only be plugged into one position.

P.9 **Ethernet cable** (Internet). Land Cable (RJ45 Ethernet cable) (Optional Feature)

4-CONNECTIONS

4.1 CONTROL BOARD

CONTROL BOARD (DC-EVO-V4.0)



RS232. Serial Cable. From Control Board to PC.
JP7. Bill Acceptor Cable. From Control Board to Bill Acceptor.
CN1 Power Supply at 230 volts (115 volts for USA).
Jack Stereo. From Control Board to PC
F1. We need 1A fuse here to run the Control Board.
JP3. Speakers. JP3 gives us the volume control.

POTENT R24: We connect here the main cable from Control Board to Push Buttons + Speakers.

4.2 PC WIRING

USB CONNECTIONS PC HP-C2D v2 (PCI-USB card with 2 slots)

16. Sending board.
17. Router.
18. SD Card.

5-LEDSCREEN FUNCTIONALITY

5.1 INTRODUCTION

There are six types of features:

InstantVideo, InstantPhoto (NewShots), GenericVideo, Photos (EventShots), CustomPhotos (CustomShots), CustomVideo

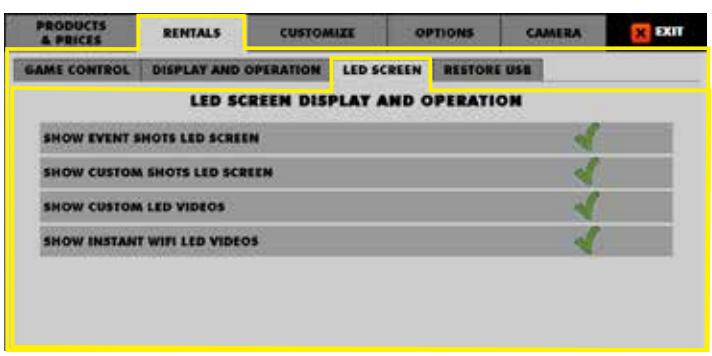
The screen will not stop playback of any items when a new InstantVideo or InstantPhoto(s) arrives is added. The item currently being played must finish and then play back of other InstantVideos or InstantPhotos can begin.

Normal order of execution of the program:
GenericVideo - EventShots (3) - CustomShot (1) - CustomVideo (1) - EventShots (3) - CustomShot (1).

5.2 SETTINGS

The LEDScreen settings are located in the PB configuration menu.
To access it, go to: RENTALS -> LED SCREEN.
You can enable / disable the display of the following features:
- EVENT SHOTS
- CUSTOM SHOTS
- CUSTOM LED VIDEOS (CustomVideos)
- INSTANT WIFI LED VIDEOS (InstantVideos)

** Detailed the meaning of activating / deactivating each configuration in detail each section



SHOW EVENT SHOTS LED SCREEN: Enable ✓ or disable ✗ instant photo and event shots.
SHOW CUSTOM SHOTS LED SCREEN: Enable ✓ or disable ✗ the USB customshots.
SHOW CUSTOM LED VIDEOS: Enable ✓ or disable ✗ the USB videos.
SHOW INSTANT WIFI LED VIDEOS: Enable ✓ or disable ✗ the option of showing videos made with user's mobile.

5.3 INSTANT VIDEOS

Definition:
The instant videos are videos recorded with a smartphone that can be sent to the PhotoBooth and replicated once.

Operation:
When new InstantVideos are added, the videos playing will not stop.
Once the video ends you are able to play new InstantVideos. No videos can be uploaded when this setting is disabled.

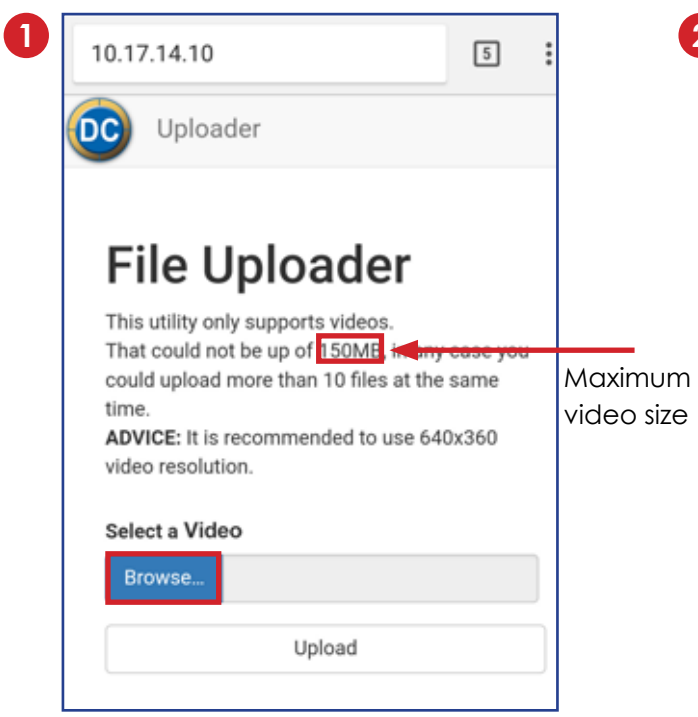
To send videos on the screen:
1. Connect to the PhotoBooths wifi:

A) Eclipse
SSID: SMARTPRINT <last 4 digits of MAC>
Password: DCkey + <first 4 digits of the MAC ID>

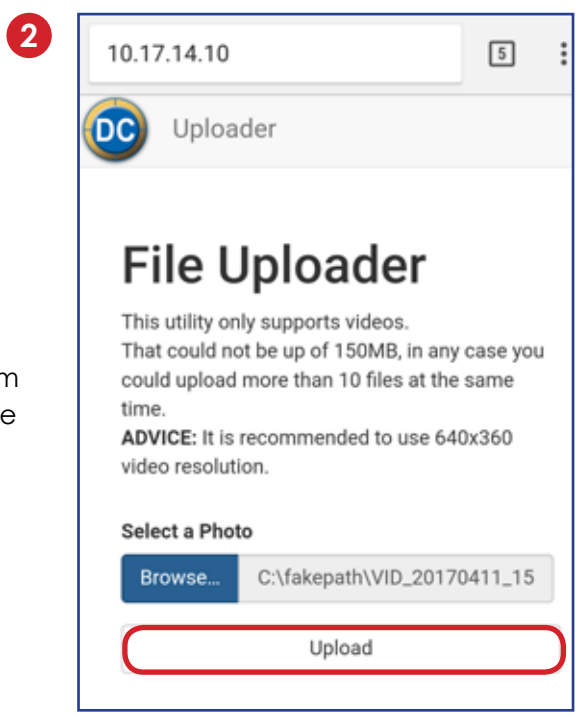
B) NG
SSID: SMARTPRINT <last 4 digits of MAC>
Password: DCkey + <first 4 digits of the MAC ID>

2. Enter the browser and enter the url: http://10.17.14.10
3. Upload one or more videos and send to the screen.

ATTENTION:
It is highly recommended to send a finished video, if you are using an android device, make sure the resolution is at or less than 720p quality.

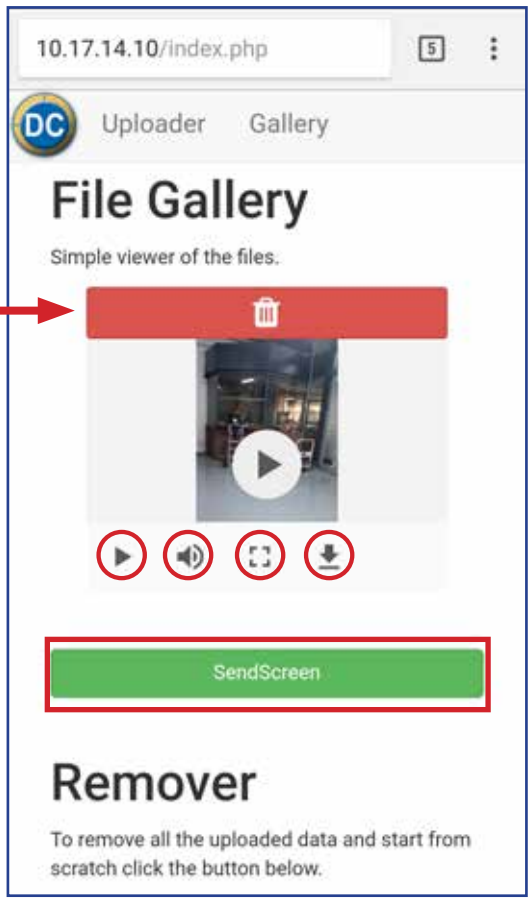


Click in "**Browser**" button to select a video.

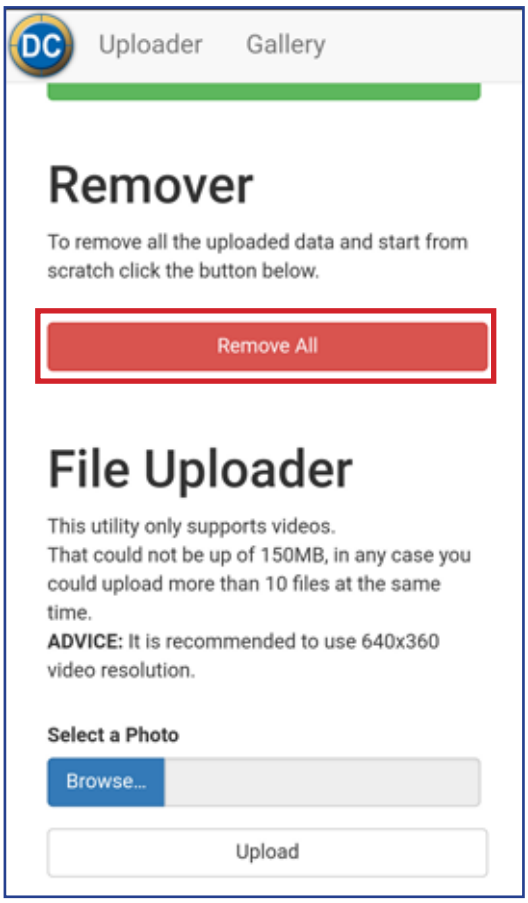


Click in "**Upload**" button to upload the video.

3



Delete the video



Preview of instant video. You can delete , play , modulate preview volume , see the video in full screen , download the video.

Click in **"SendScreen"** to send the video to led screen.

Click in **"Remove"** to remove the video before send it.

5.4 GENERIC VIDEO

Definition:

It is a non-modifiable and static video set by DC.

It will ALWAYS play.

5.5 INSTANT PHOTO (NewShots)

Definition:

These are the photos taken in a recent game that have not been played.

Operation:

When a game is made, the Photobooth notifies the screen that it has been made, and it will be serialized in memory.

Once the game is finished (that is, when we receive the End User call after the user interaction with the PB), they will be played immediately with the execution of the following features.

If the setting is off, they will not be displayed.

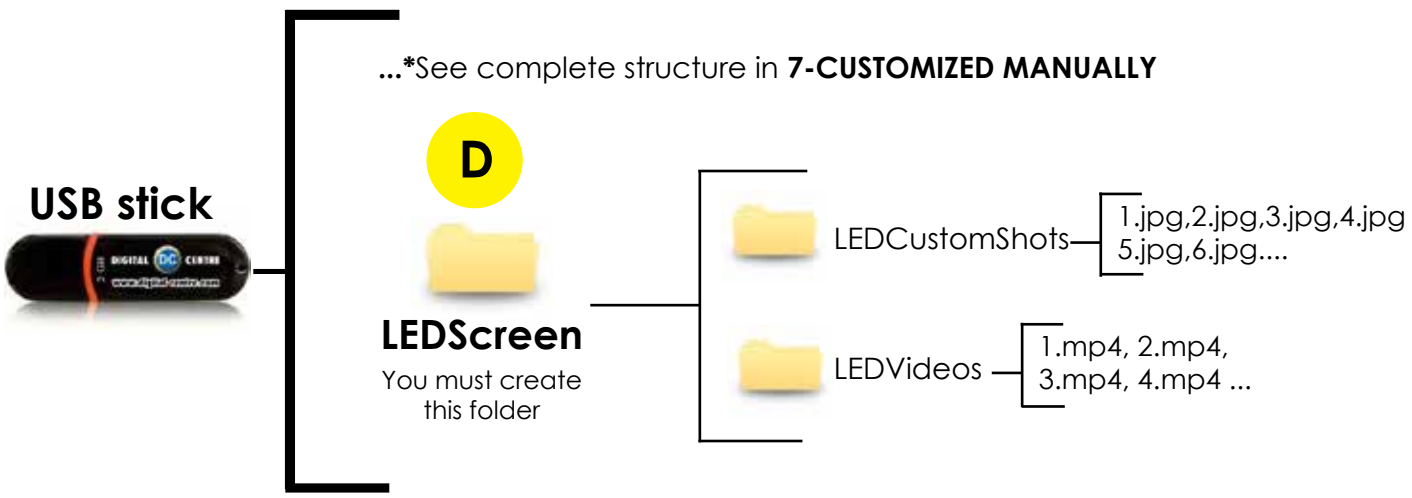
5.6 PHOTOS (EVENT SHOTS)

Definition:
Photos taken with the PB.
There are two types of Event Shots:
Old shots: Shots played by the LEDscreen.
Default shots: Shots to be reproduced by default, if the remaining two do not exist.

Operation:
The LEDscreen only has the defaults Shots in memory.
The old Shots will be played directly from the USB of the PB. If this is disconnected, the oldShots will no longer be available, so we can only play the defaultShots.
If the setting is off or there is no USB connected, they will not be displayed.

5.7 ELEMENTS USB

The USB must be connected to the PC before starting the PhotoBooth.
If a new USB is connected, it is advisable to wait one minute to be able to ensure that the player has been notified that the media containing the other USB no longer exists.
You must create a directory in the root of the USB called **"LEDScreen"**.



CUSTOMSHOTS

Definition:
Customizable image files.

Operation:
A customShot is played when Event shots are finished, only if there is a USB with a directory called "LEDScreen / LEDCustomShots /" with images that will be the customShots inside (there is no maximum number), if it does not exist it goes directly to the following Shots.
In case there is more than one shot, all will be played without being repeated, and once all have been played, they will start to play in random.
If the setting is off or there is no USB connected, they will not be displayed.

CUSTOMVIDEO

Definition:
Customizable video files.

Operation:
In order to visualize the custom video, simply connect a USB to the PhotoBooth that contains one or several videos within a directory called "LEDScreen / LEDVideos /".
If there is more than one video, all will be played without being repeated, and once all have been played, they will start playing at random.
If the setting is off or there is no USB connected, they will not be displayed.

6-PRINTER

WARNING: The printers are not interchangeable

·Protective Measures

This printer is designed to operate with PhotoBooth systems. Do not remove any inside components. Do not try to repair or manipulate it. Before printing, install an Ink sheet and paper.

Never insert any object into the unit.
Foreign objects of any kind inserted into this unit is safety hazard and can cause extensive damage.

Do not place anything on the digital color printer.
Heavy objects placed on the digital color printer can cause damage or obstruct proper ventilation.

Do not remove the cabinet.
Touching internal parts is dangerous, and may lead to malfunction. Contact the sales dealer to carry out internal checks and adjustments. Before opening the cover for eliminating a jammed paper, etc ... , be sure to disconnect the power cord plug.

When transporting the unit.
When transporting the unit, remove the ink sheet and print paper from the unit.

Be careful around print paper exit slot.
Do not insert your hand or any material into the paper exit slot during printing.
Do not touch the cutter blade inside the paper exit slot. Otherwise, your finger will be injured.

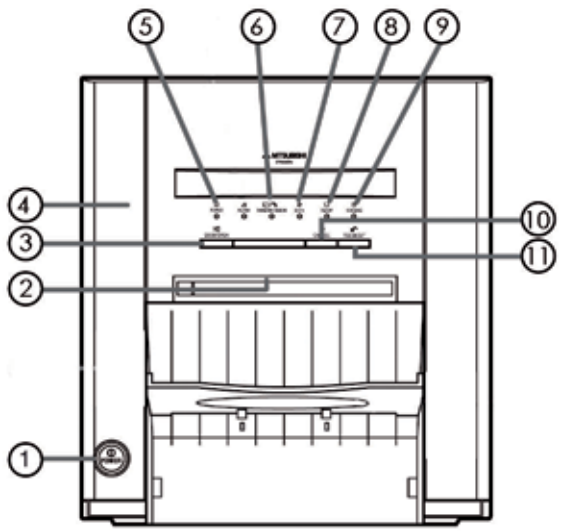
Changing the film.
When the film ends and takes it out of the printer, it may appear that there is still film. The film is left can not be exploited. The amount of ink is tied to the amount of paper.

Do not touch the thermal head.
Do not touch the thermal head (located inside the unit).
The thermal head is heated to a high temperature. This may cause injury.

Ink sheet and paper print supply.
Use only the ink sheet and paper supplied by Digital Centre, otherwise the Photo Booth system will not work, and Digital Centre does not assume any responsibility for damages or injuries.

6.1 FEATURES & FUNCTIONS

FRONT PANEL



1 · POWER BUTTON
Use to switch the power ON and OFF.
Press to turn on power. Press again to turn off power.

2 · PRINT OUTLET
The printed paper comes out here.

3 · DOOR OPEN BUTTON
When you press this button while the power is on,the door will open in about five seconds.

4 · DOOR
Open this door when installing print paper or ink ribbon. Press the DOOR OPEN button 4 to open the door.

5 · POWER INDICATOR
When the power is turned on, the indicator illuminates.

When a paper jam happens occurs or when the door is open.

6 · PAPER/INK RIBBON INDICATOR
When an error concerning the ink ribbon or print paper happens occurs, this indicator illuminates or blinks

7 · DATA INDICATOR
This indicator blinks during data transfer. It illuminates during printing.

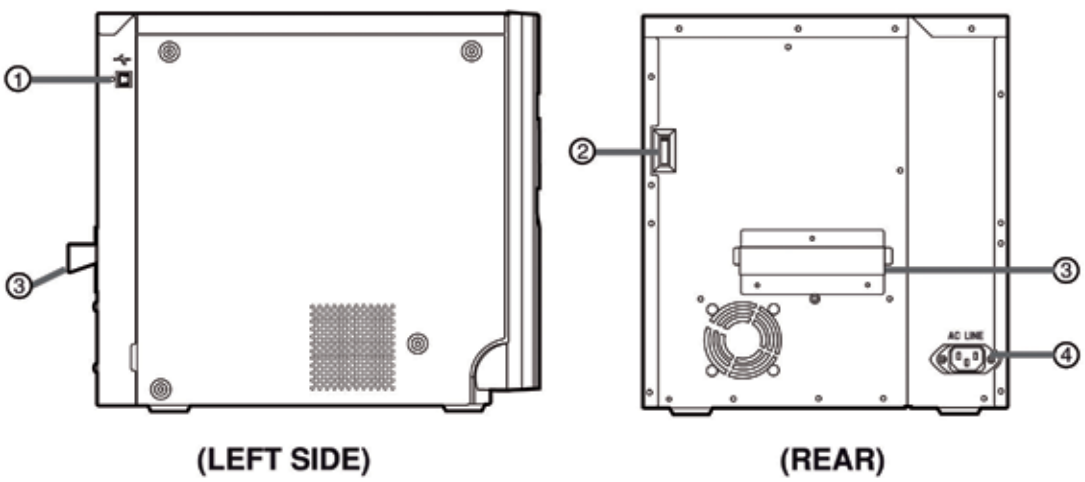
8 · READY INDICATOR
This indicator illuminates when this unit is ready to accept the data. It also illuminates during data transfer. It blinks during print canceling procedure.

9 · COOLING INDICATOR
When the unit is overheated, this indicator blinks.

10 · CANCEL BUTTON
Press this button for a little over 1 se¬cond to cancel continuous prin-ting. After the button is pressed the printing process is canceled.

11 · FEED & CUT BUTTON
Hold down this button for a little over 1 second and the printer pa¬per is fed and cut.

SIDE AND REAR PANEL



1 · USB TERMINAL
Use to connect the USB cable.

2 · DIP SWITCHES
Never touch it.

3 · HANDLE FOR TRANSPORTING
When transporting this unit, hold this handle and the lower front part of this unit.

4 · POWER SOCKET (AC LINE)
Use to connect the provided power cord. Insert the cord firmly.

6.2 BEFORE OPERATION

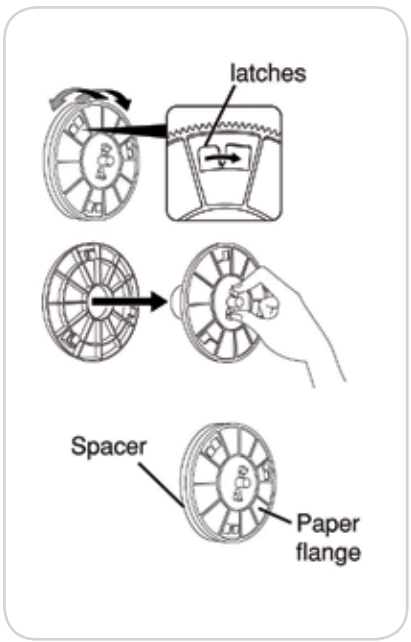
6.2.1 INSTALLATION OF PRINT PAPER

·SPACERS

The spacers are attached to the paper flanges. The spacers are necessary, for reasons see the Quick Setup Guide. Re¬move the cushions put between the paper flange and spacer when using them.

How to attach and remove the spacers
1. Turn the spacer until the latches are unlocked.
2. Remove the spacer with the paper flange's stoppers retracted.

When you use the print paper with the correct spacers that have to be used, attach the spacers to the paper flanges by reversing the removal procedure as shown on right.



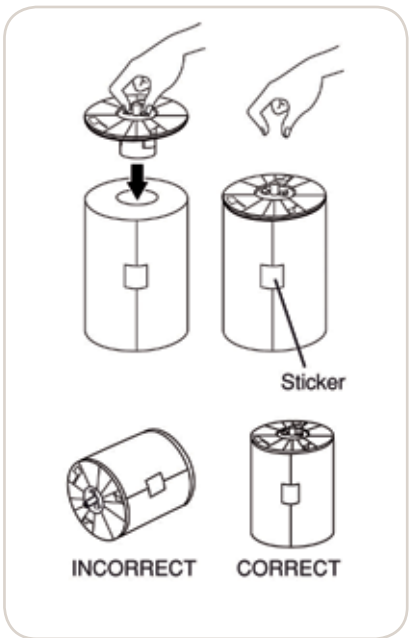
Attach the supplied paper flanges to both sides of the print paper. When you pinch the latches on the paper flange, the stoppers retract into the shaft. Attach the flanges to the print paper with the stoppers retracted. Make sure that the flanges are attached to the print paper securely, and release the latches.

NOTE

· Be careful not to pinch your fingers.
· Do not remove the sticker on the print paper yet.
· Do not slack the paper. Any slack in the print paper may degrade the print quality.

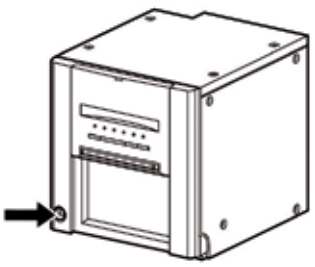
CAUTION

· When placing the print paper, remove one flange and keep the print paper upright on its side with no flange.
· When you put the print paper sideways, it may roll and fall. This may cause injury.

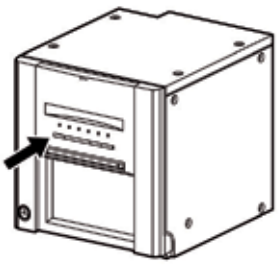


NOTE

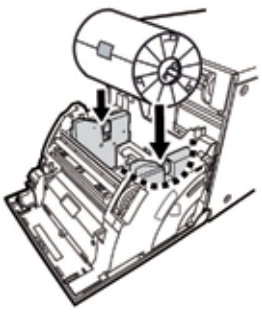
· Do not touch the thermal head.
· Fingerprints or dust on the thermal head will degrade the print quality.



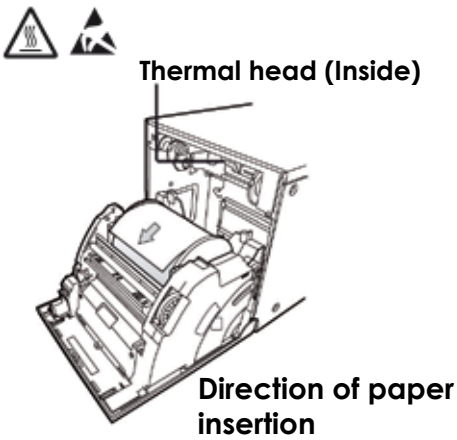
Press the POWER button to turn on the power.



Press the DOOR OPEN button to open the door. Take the ink cassette in the printer out.



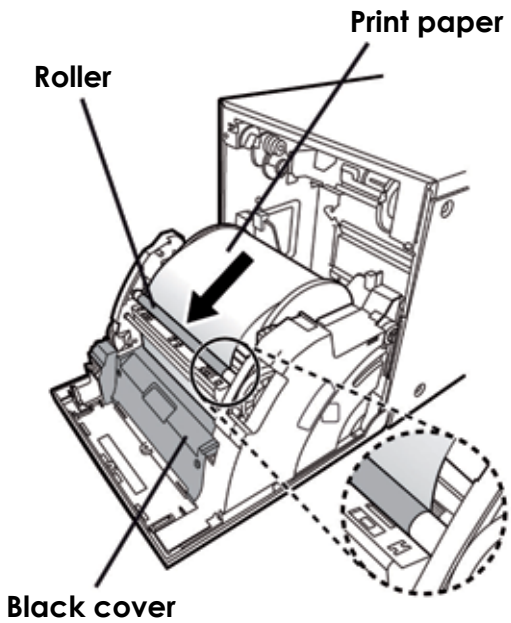
Install the print paper into the unit. Make sure to install the print paper firmly.



NOTE
Install the print paper into the unit slowly. If it is dropped along the ditches, the unit or accessories may be damaged.

CAUTION
Do not touch the thermal head right after printing because it is extremely hot. Otherwise you may get burned or injured.

NOTE
Note that the thermal head is quite sensitive to static electricity. When you touch the thermal head while carrying static electricity on your body, the thermal head may be damaged.



Remove the sticker, insert the print paper between the rollers as shown above, and feed the print paper until it reaches the black cover.

Remove the sticker before inserting the print paper between rollers. Make sure to insert the paper straight.

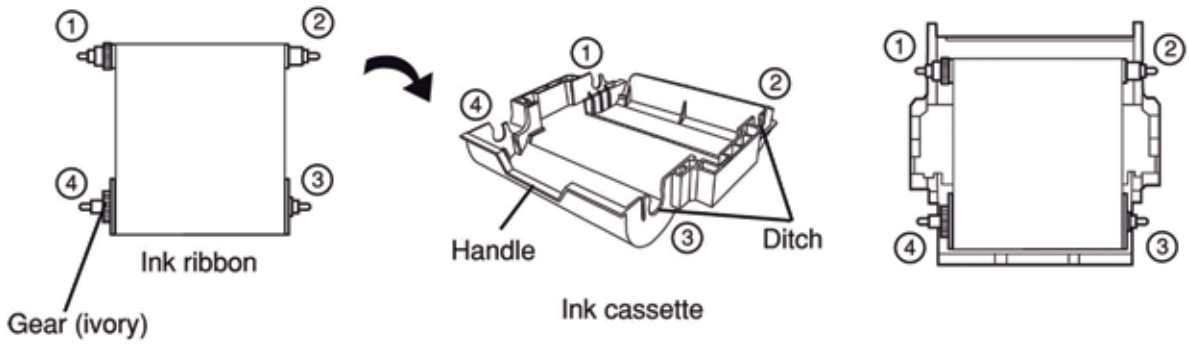
NOTE
- Keep the roller clean.
- Dirt on the roller may degrade the print quality.

NOTE
- When taking the print paper out, pull it up toward you.
- Make sure to turn on the power before replacing the print paper.
- Make sure to eliminate any slack from the print paper. If you carry out the following steps without eliminating the slack, the print paper may be damaged.

6.2.2 INSTALLATION OF INK RIBBON

After installing the print paper, load the ink ribbon in the ink cassette.
Then install the ink cassette into this unit.

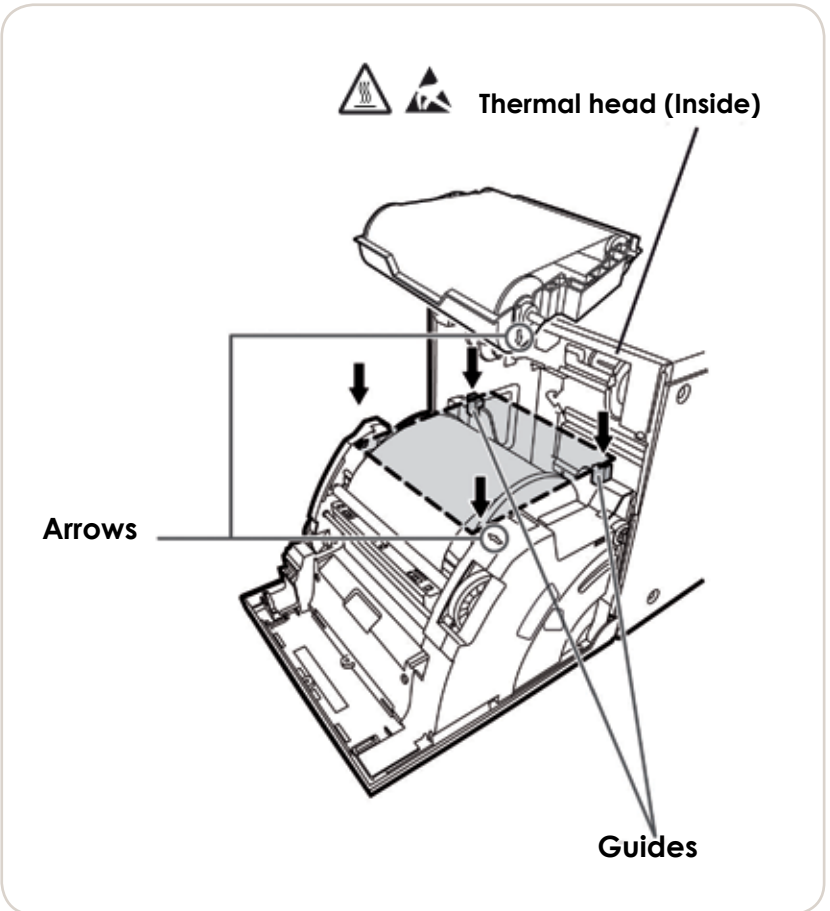
NOTE
- Place the ink cassette on a flat surface, when loading the ink ribbon.
- Select a place that is free of dust when loading the ink ribbon. Dust or dirt settling on the ink ribbon results in poor print quality.
- Make sure that the shafts of the ink ribbon fit into the ink cassette firmly.



6.2.3 INSTALLATION THE INK CASSETTE

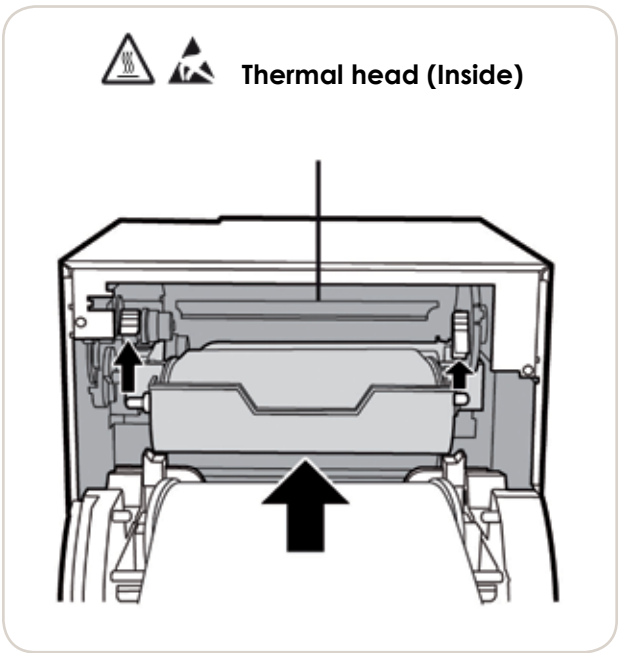
Place the ink cassette containing the ink ribbon in the position as shown above.
Place the ink cassette on the print paper with the shaft (thicker one) around which the ink ribbon is wound located to the front. Align the arrows marked on the sides of ink cassette with those on the unit. Place the rear of the ink cassette along the guides that are provided inside the unit.

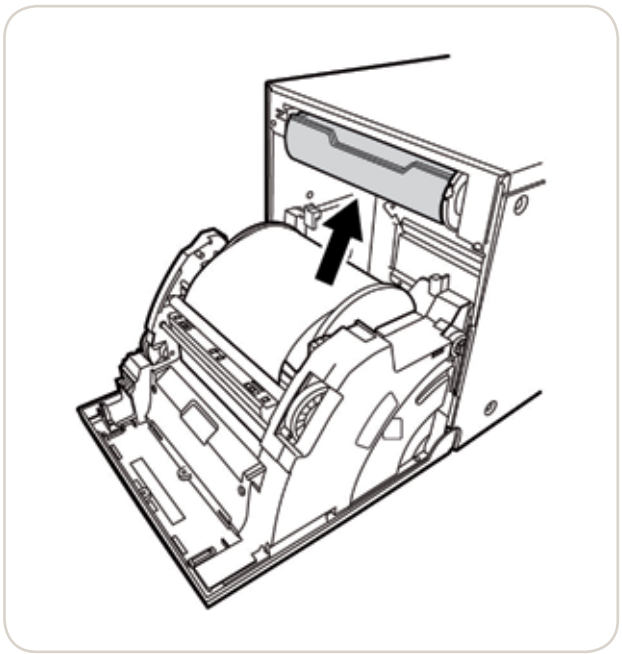
Make sure to set the ink ribbon roller to the ditches firmly. Turn the ivory roller to eliminate any slack.



Push the ink cassette toward the back of the unit.
Hold the handle of the ink cassette and push it straight toward the back of the unit.
Then raise it until you hear a click to secure it in the ink cassette holder.

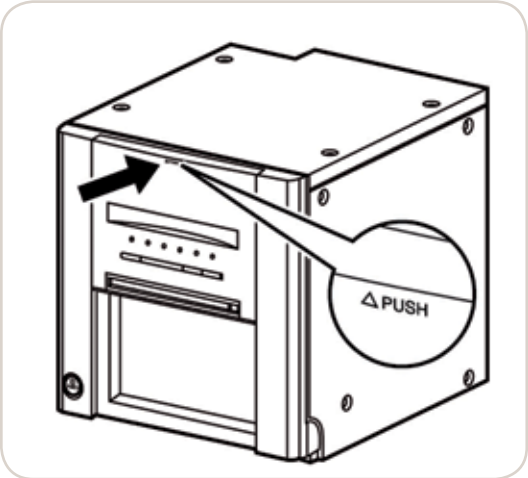
NOTE
If the ink ribbon is used up, repeat the steps 1 and 2 to replace the print paper and the ink ribbon.

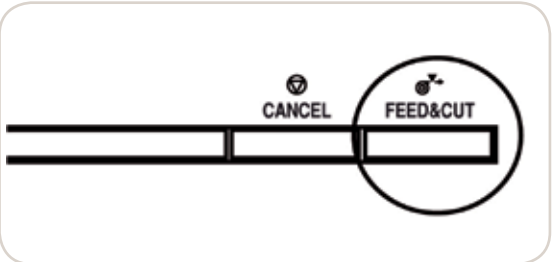




Push the center of the door to close.
The print paper setting is initialized two minutes after you close the door.
When the auto feed & cut mode has been selected, the FEED & CUT procedure is repeated three times after you close the door. When the print paper with the post card printing on its reverse side is installed, the FEED & CUT procedure is repeated five times.

NOTE
- When closing the door, push it until a click is heard.
- If the PAPER/INK RIBBON indicator illuminates when the door is closed, the print paper may have not been installed correctly.
  In this case, open the door to make sure that the print paper has been installed correctly. Then close the door again.
- On the auto feed & cut mode, when the print paper is installed more than three times, the print paper may be used up earlier than the ink ribbon.



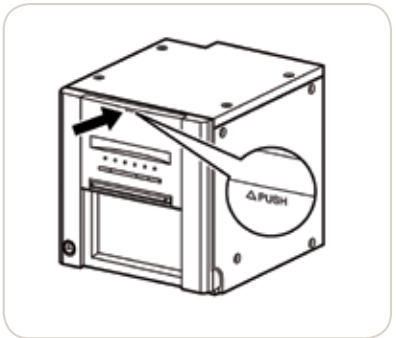


When the manual & cut mode has been selected
When the manual feed & cut mode has been selected, hold down the FEED & CUT button for 1 second or longer. Repeat the manual feed & cut three times. When the print paper with the postcard printing on its reverse side is installed, repeat this procedure five times.
To select the auto feed & cut mode, see "Setting of the DIP switches"

Installation of the print paper and the ink ribbon is completed.

NOTE
· Make sure to replace the print paper and the ink ribbon at the same time.
· When replacing them, throw away the paper chips in the paper strip **bin.**

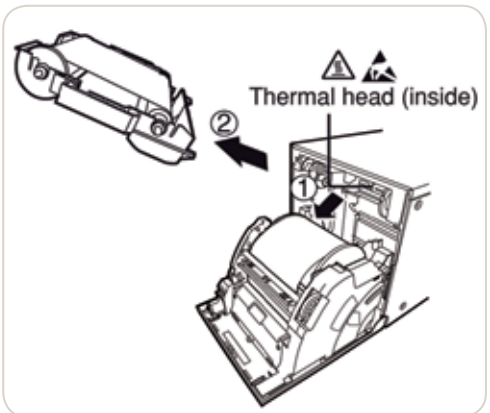
6.3 ERROR MESSAGES & COUNTERMEASURES

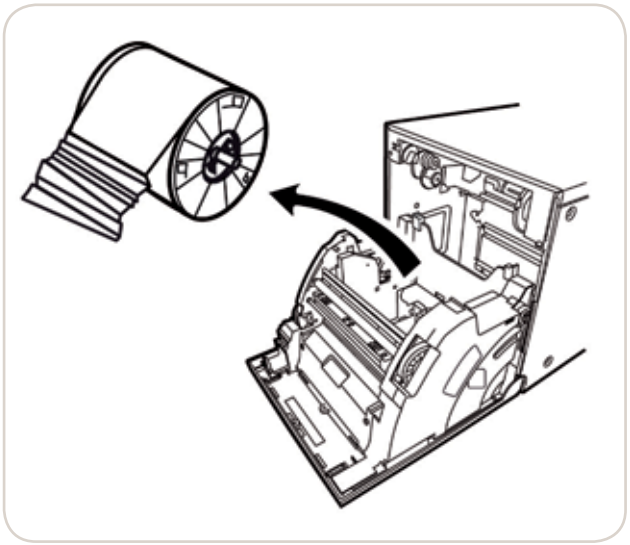


OVERCOMING PAPER JAMS

1 · Press the DOOR OPEN button to open the door.
Make sure that the power is turned on before opening the door.
If the door does not open, turn off the power and turn it on again.
Then press the DOOR OPEN button again

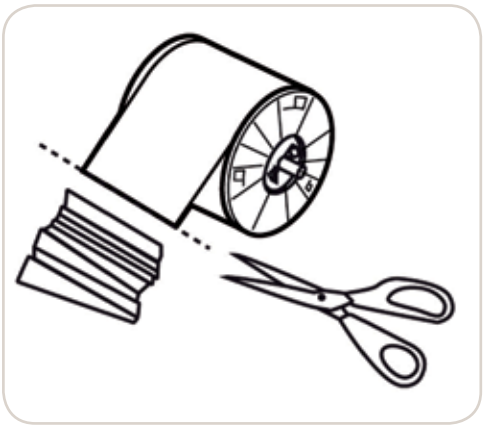
2 · Remove the ink cassette.
Push down the ink cassette as shown by the arrow 1 and pull it out.





3 · Take out the print paper.
When taking the print paper out, pull it up toward you.

4 · Cut off the defective part of the print paper with scissors.

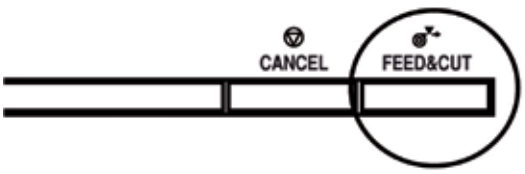


NOTE
Make sure to cut off the printed part of the print paper. Failure to do this may result in the ink ribbon sticking to the print paper and being torn.

5 · Install the print paper and the ink cassette with the ink ribbon.

6 · Push the center of the door to close.
The print paper setting is initialized two minutes after you close the door.
When the auto feed & cut mode has been selected, the FEED & CUT procedure is repeated three times after you close the door. When the print paper with the postcard printing on its reverse side is installed, the FEED & CUT procedure is repeated five times.

When the manual feed & cut mode has been selected, hold down the FEED & CUT button for 1 second or longer. Repeat the manual feed & cut three times. When the print paper with the postcard printing on its reverse side is installed, repeat this procedure five times.
For how to select the auto feed & cut mode, see "Setting of the DIP switches"



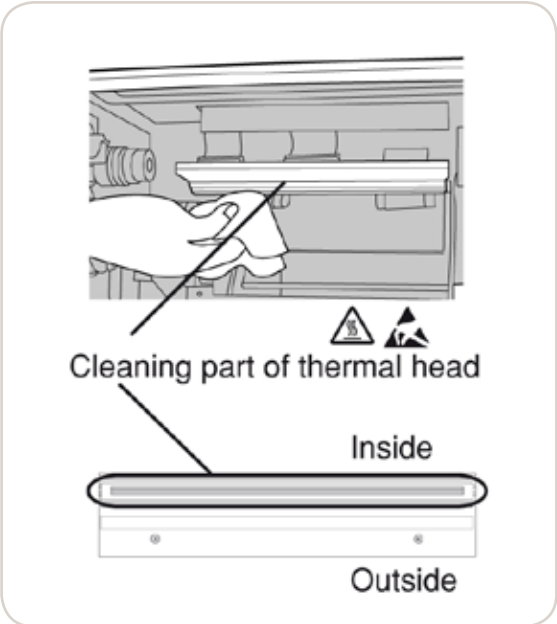
6.4 CLEANING

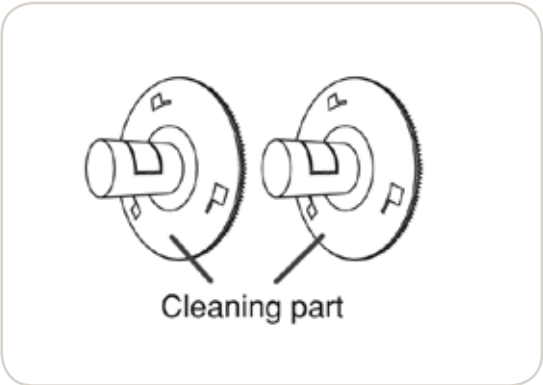
Cleaning as indicated below will help maintain stable printer operation and extend the printer's life.
Preparations:
Alcohol (isopropyl alcohol)
Tissue paper (Fold in half about four times, and use the folded side to clean.)
Other : Cleaner pen (option)*, Cleaning ribbon (option)*
* Please ask the dealer about options.

PREPARATIONS FOR CLEANING
1 Press the POWER button to turn on the power.
2 Press the DOOR OPEN button to open the door.
3 Remove the ink cassette.
4 Take out the print paper.
5 Press the POWER button to turn off the power.
Make sure to turn off the power before cleaning.

THERMAL HEAD CLEANING
Clean the heat-generating part below the thermal head. Wipe the head cleaning part carefully with tissue paper dampened with a small amount of alcohol.

NOTE
- Do not damage the thermal head.
- When the poor print quality is not corrected even if the head has been cleaned, replacement of the thermal head may be required. Contact your dealer.





CAUTION

· Thermal head is hot right after printing. Wait until the head is cold before cleaning the thermal head.

NOTE

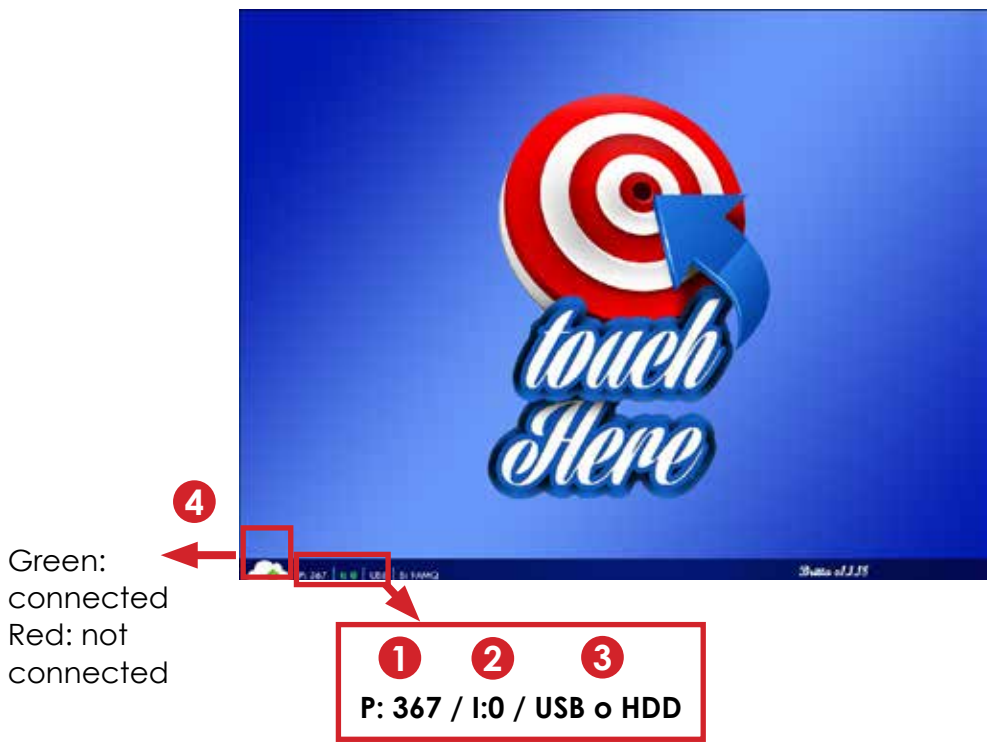
· The thermal head may be damaged if you touch it while static electricity builds up on your body.

PAPER FLANGE CLEANING

Clean the parts that contact the print paper sides as shown above.Wipe the parts carefully with tissue paper dampened with a small amount of alcohol.

7-USING THE PHOTOBOOTH

7.1 GENERAL OVERVIEW



1 Displays the film stock

2 Displays the photos that haven't been uploaded to the Cloud, if X=0 it means that there are no photos waiting to uploaded to the Cloud.

I : x → "x" Internet Functionality is OFF means that your photos are not uploading to the cloud.

I : 0 (green) → "0" means that there are no photos to be uploaded, your photos are already uploaded to the Cloud.

I : 1 (green) → "1" In green means that the connection to the Internet and to the server is good and the photo is being uploaded.

I : 1 (red) → "1" In red means that 1 photo is still pending to be uploaded to the Cloud (waiting for the server connection).

3 Shows if the PhotoBooth is working with the USB stick (USB) or HDD.

SCAN QR-PHOTO

SCAN: If you press the Scan button, a screen appears where you're asked to show the QR-PHOTO at the camera. Instantly, your photo will appear on the screen and you can make extra copies.

SMARTPRINT:

If you press the Smartprint button you will be able to print the photos of your Smartphone in the PhotoBooth.
For more information visit section 6.4.2 SMARTPRINT.

This function is optional, you will need an extra hardware, provided by DC.

7.2 PRODUCTS

Select one design. 4 different shots.

7.3 PLAY

Game mode COINOP

Coinop mode, at the bottom right of the screen you can view the price of the products. You can change the price for product and format in the setup menu. (Setup Menu Products & Prices)

PAYMENT
There are 3 different options:
CASH / CREDIT DEBIT / SMARTPHONE

The default option is CASH. If there is a credit card reader it will appear on the screen.

If you have the SMARTPHONE option activated it will appear in the screen. To select this payment option you should go to MyPhotoCode and introduce your PayPal Merchant account ID.
(For more information visit MyPhotoCode manual section 4.1)

DISCLAMER SCREEN

If you select option "Print & Share", your photos will be uploaded to the Cloud and you can retrieve them anywhere and anytime and share them with family and friends. Always in a secure environment.

If you only choose print option, the photo will be printed but you will not have the access to buy it in the net.

You can enable or disable this option in the Setup Menu.

SHOTS 1
4 shots are taken. (3 shots if you enabled the logo). At the top left appears the countdown, indicating at what moment the shot will be taken.

SHOTS 2
At the bottom right of the screen ,shows how many shots have been taken and how many are left to be done.

SHOTS 3
There is only one shot missing, the last one.

SHOTS 4

You have spent all your shots.

EXTRA COPIES

You can make extra copies in the same formats.

This screen appears if the option Extra Copies is enabled in the Setup Menu.

EXTRA PRODUCTS 1

You can choose to make some extra copies in other frames or the "4x6" format.

To choose a photo click on the photo you want.

This screen appears if the option Extra Products 1 is enabled in the Setup Menu.

EXTRA PRODUCTS 1
Choose how many copies you want make.

EXTRA PRODUCTS 1
The number shown over the photo indicates the number of copies selected.
You can print more photos or check out.

EXTRA PRODUCTS 2
Make some extra copies in other frames.
You can make extra products in 4x6" format.

This screen appears if the option Extra Products 2 is enabled in the Setup Menu.

EXTRA PRODUCTS 2
Choose how many copies you want make.

EXTRA PRODUCTS 2
The number shown on the photo indicates the number of copies selected.
You can print more photos or check out.

PAYMENT
There are 3 different options:
CASH / CREDIT DEBIT / SMARTPHONE

The default option is CASH. If there is a credit card reader it will appear in the screen.

If you have the SMARPHONE option activated it will appear in the screen. To select this payment option you should go to MyPhotoCode and introduce your PayPal Merchant account ID. (For more information visit MyPhotoCode manual section 4.1)

VIDEO

This screen appears if the option Record a Video Message is enabled in the Setup Menu.

EXTRA PLAY

Take a photo with a discount applied by the owner (no extra products)

This screen appears if the option Extra play is enabled in the Setup Menu.

PRINTING
While printing, the photos you have selected will appear on the screen.
It can also show animations while printing.

Game mode
BAR MODE

BAR MODE
If you are playing in Bar mode, the payment screen appears at the end the game.
This game mode has the same game options in Coinop.

Game mode FREEPLAY (Rentals)

If you are playing in Freeplay mode, the payment screens not appears during the play.

DISCLAMER SCREEN

If you select option "Print & Share", your photos will be uploaded to the Cloud and you can retrieve them anywhere and any time and share them with family and friends. Always in a secure environment.

If you choose print only option, the photo only be printed but you will not have access to buy it in the net.

You can enable or disable this option in the Setup Menu.

SHOTS 1

SHOTS 2

SHOTS 3

SHOTS 4

EXTRA COPIES

You can choose to make extra copies in various formats. You can make extra copies in the same format.

This screen appears if the option Extra Copies is enabled in the Setup Menu.

VIDEO

This screen appears if the option Record a Video Message is enabled in the Setup Menu.

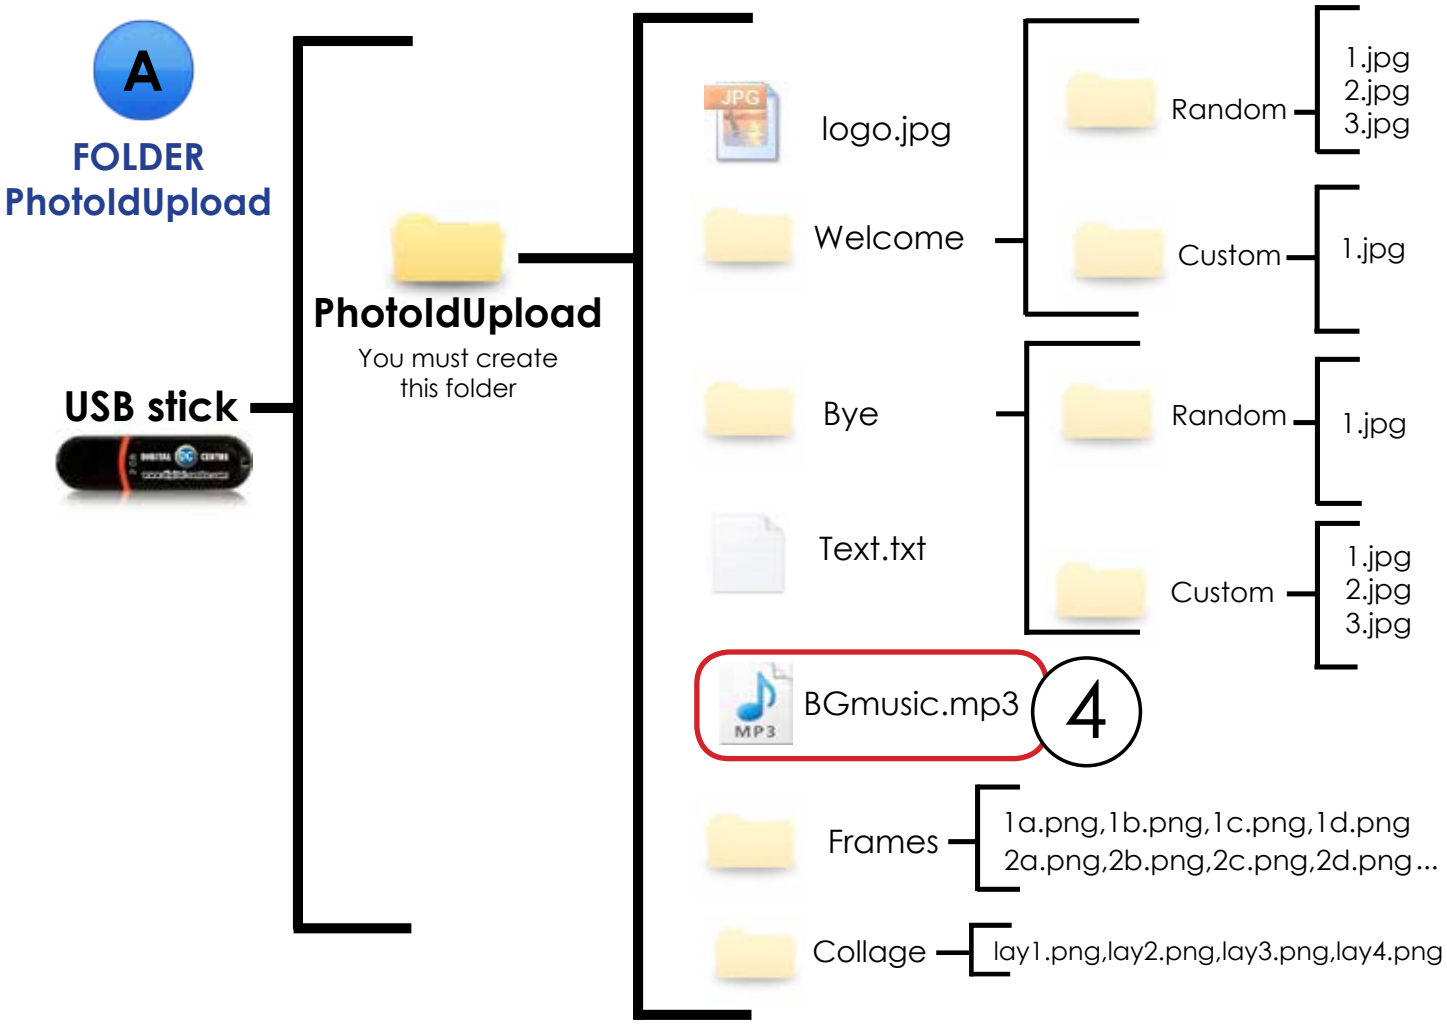
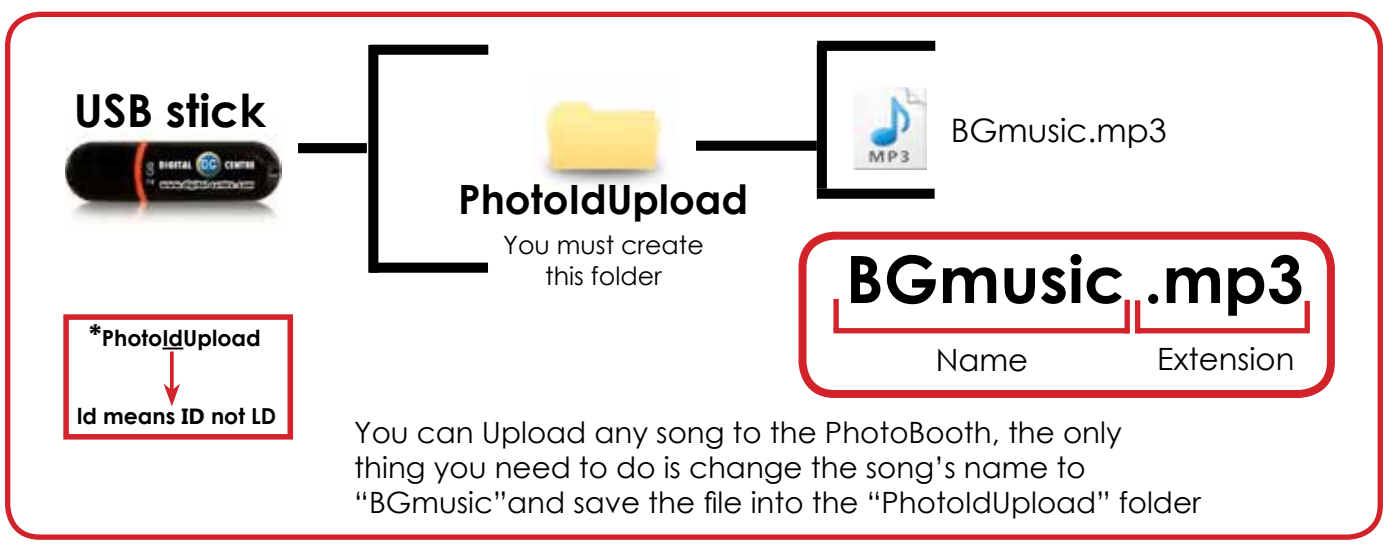
8.5 MUSIC

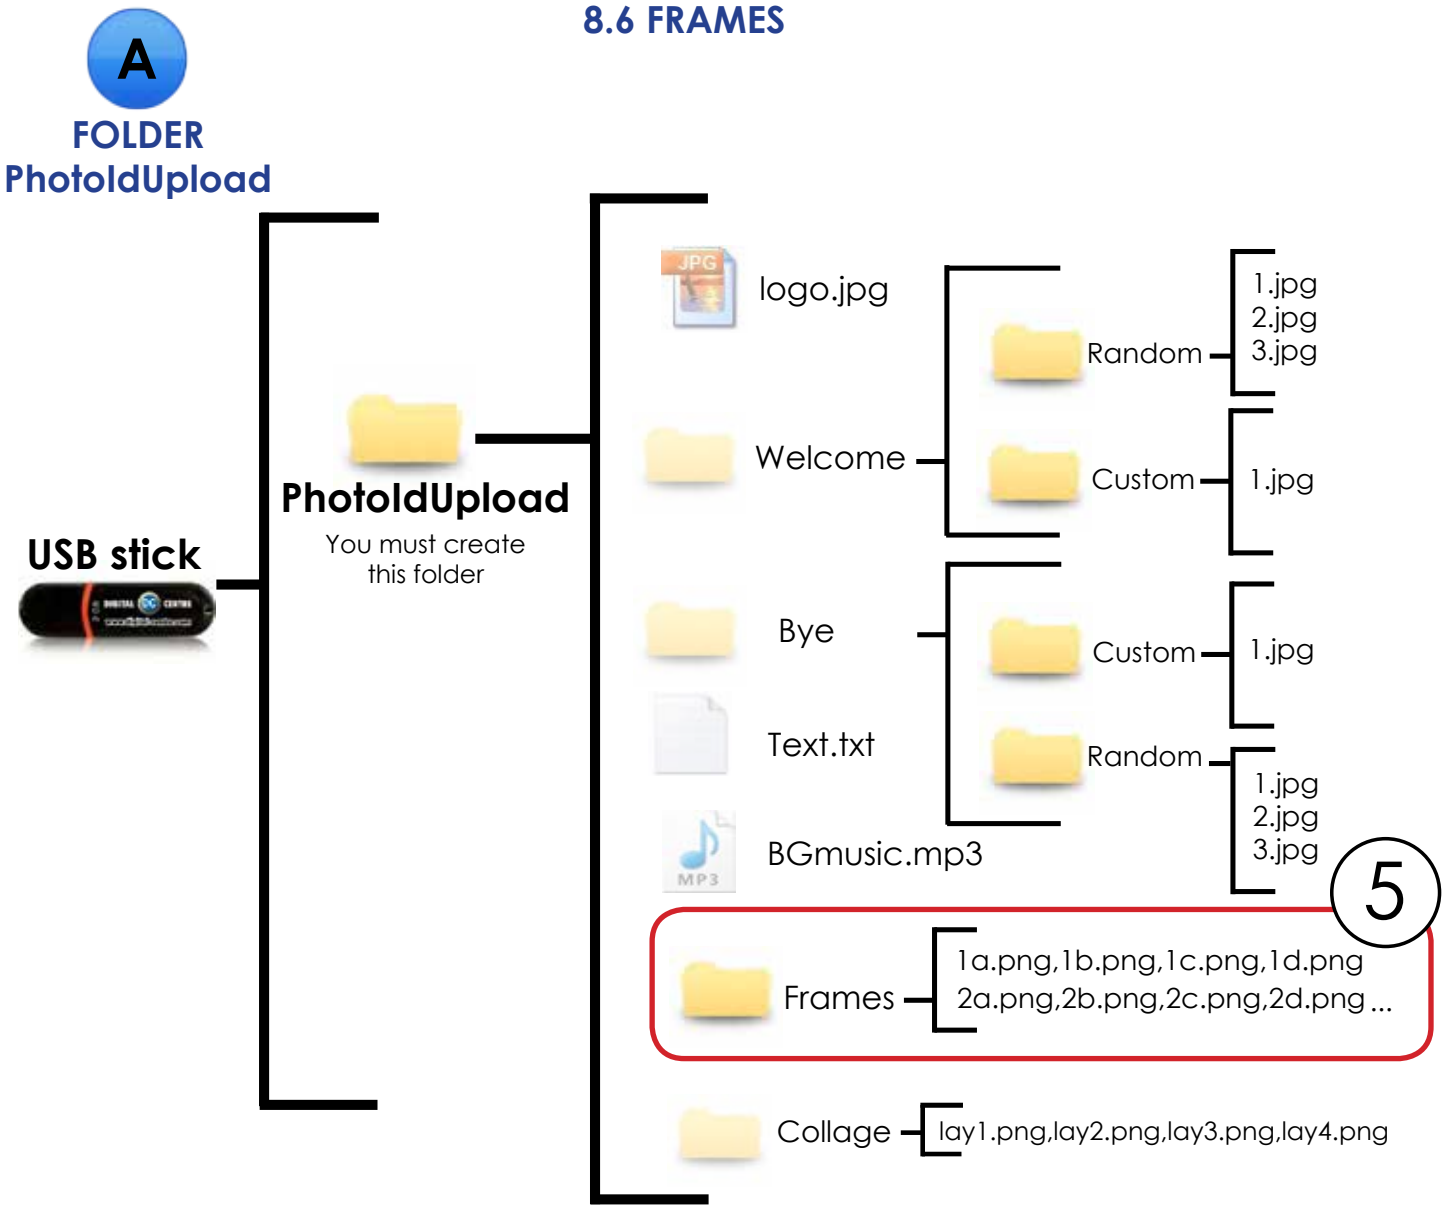


DIRECTIONS FOR UPLOADING MUSIC



You can Upload any song to the PhotoBooth, the only thing you need to do is change the song's name to "BGmusic"and save the file into the "PhotoIdUpload" folder

8.6 FRAMES



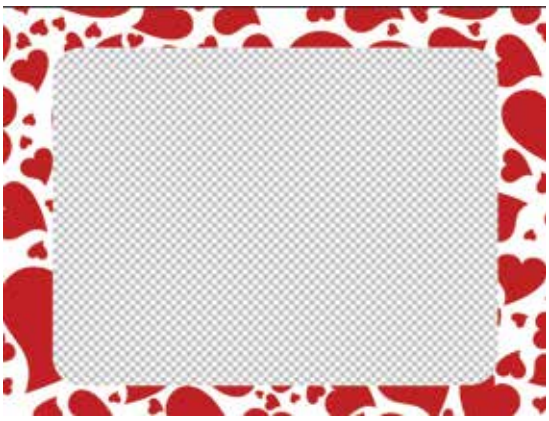
FRAMES

There are **3 screens** with frames. Each screen contains **4 groups**. That means, a total of **12 groups**.Every group of 4 frames will be printed together.

If you want to customize one group (for example number 1), you need four images (frames) 1a.png, 1b.png, 1c.png & 1d.png".

SAMPLE

To create a new framework we will create a file with the following characteristics.



Frames Technical Details:

Name: To name the different frames custom you must assemble them in groups of 4, as follows:
- Group1:1a, 1b, 1c, 1d.
- Group2: 2a, 2b, 2c, 2d
- ...

Size: width: 1280 pixels
height: 960 pixels
Resolution: 300dpi
Extension: PNG
color mode: RGB

It's very important to save the file of the frames only in PNG extension.

Create your own customized frame. Inside of the blank area is where the camera will capture the image, and your customized frame will surround the image.

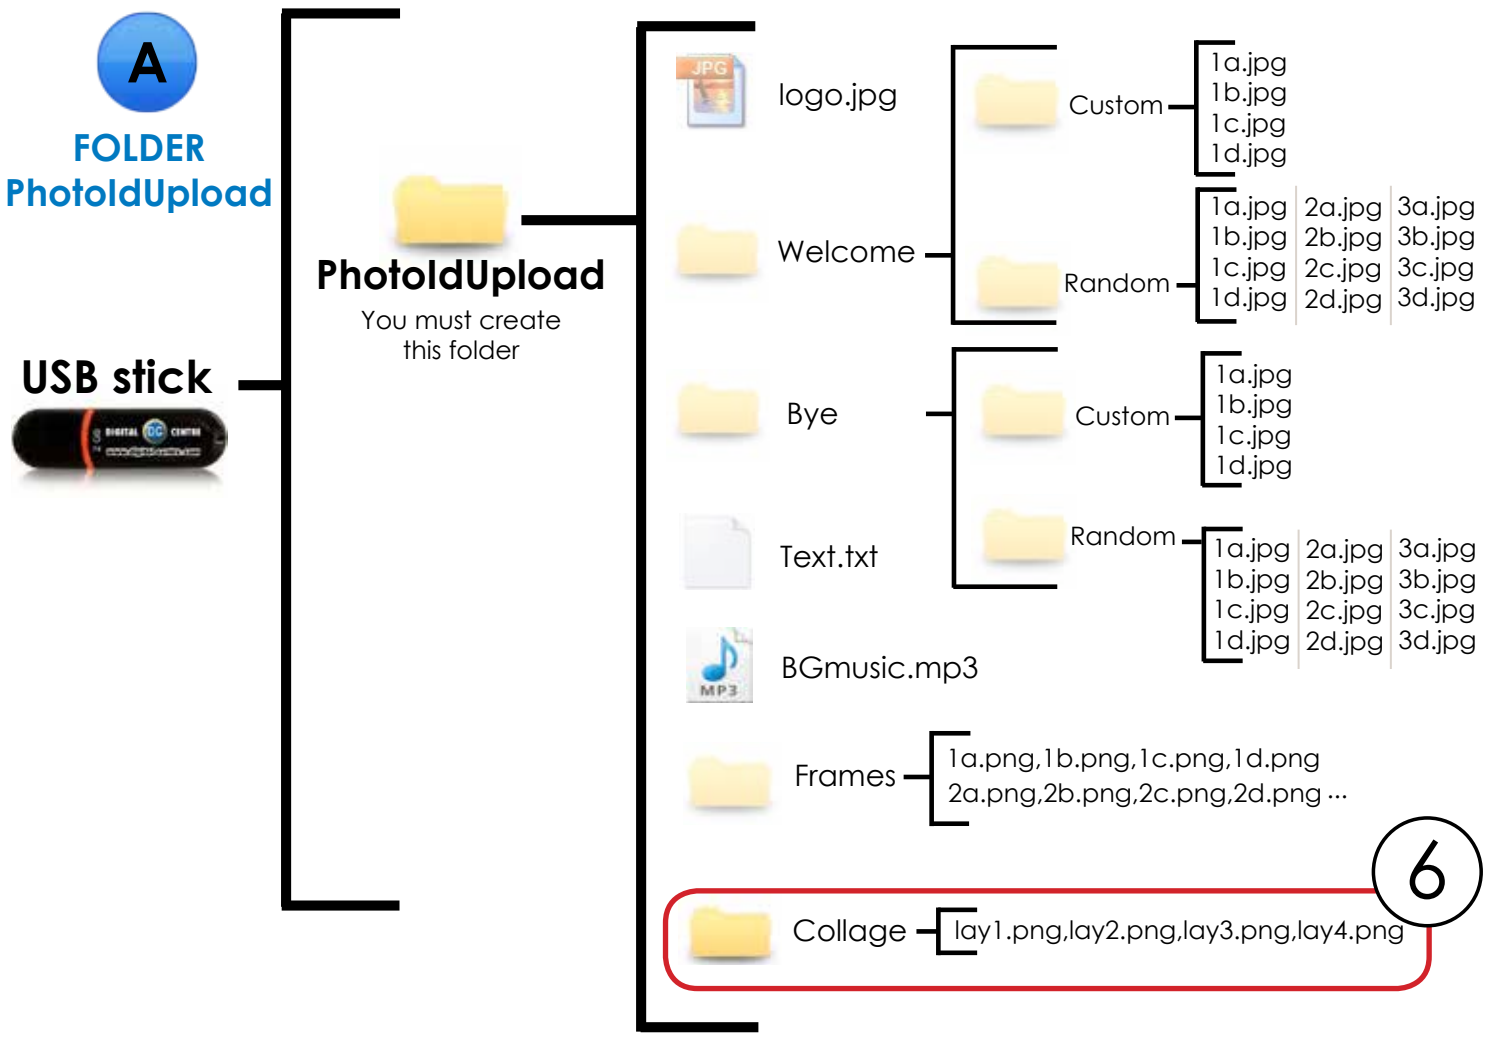
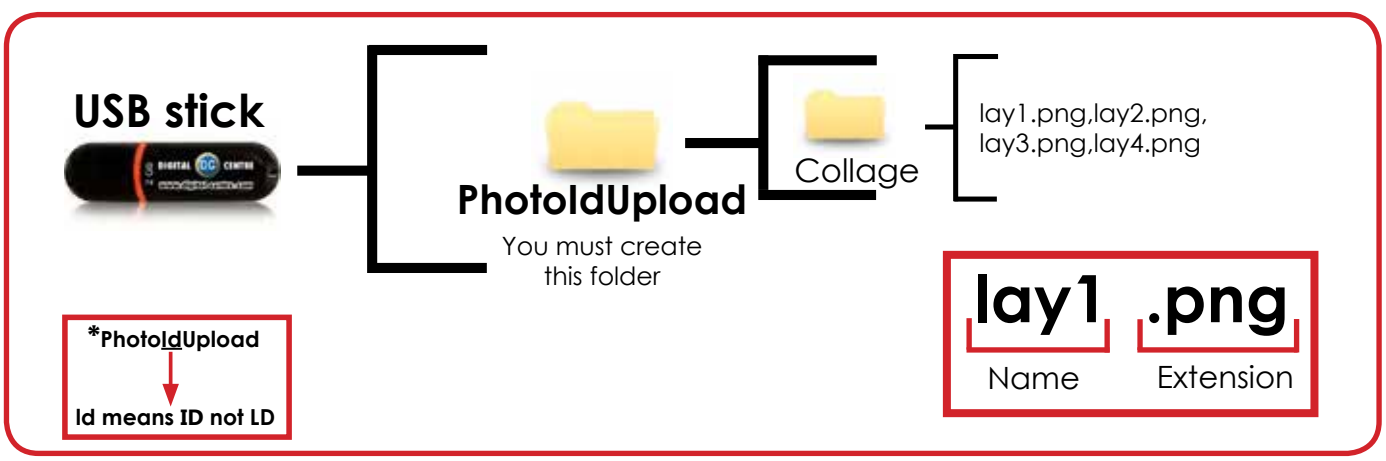
8.7 COLLAGE

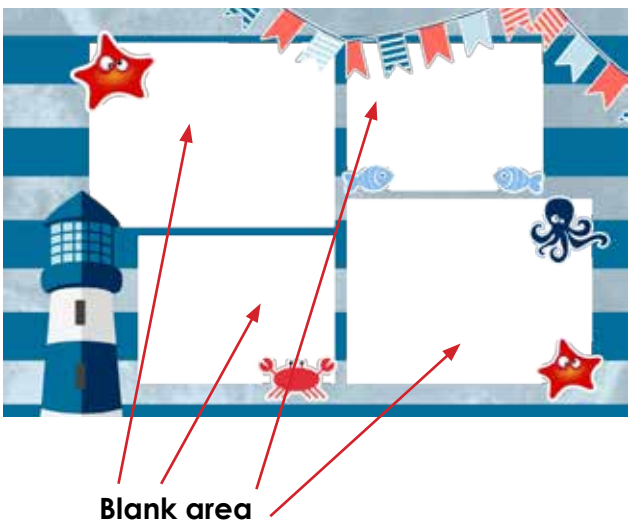


DIRECTIONS FOR UPLOADING COLLAGE



COLLAGE

There is **1 screen** with four different templates. Each template contains **4 photos**.
Each group of four photos will be printed together on the same custom collage.



Collage Technical Details:

Name:lay1,lay2,lay3,lay4.
Size: width: 2044 pixels
height: 1416 pixels
Resolution: 300dpi
Extension: PNG
color mode: RGB

It's very important to save the file of the collage only in PNG extension.

Create your own customized collage. Inside of the **blank area** is where the camera will capture the image, and your customized collage will surround the image.

HOW TO MAKE A CUSTOM COLLAGE

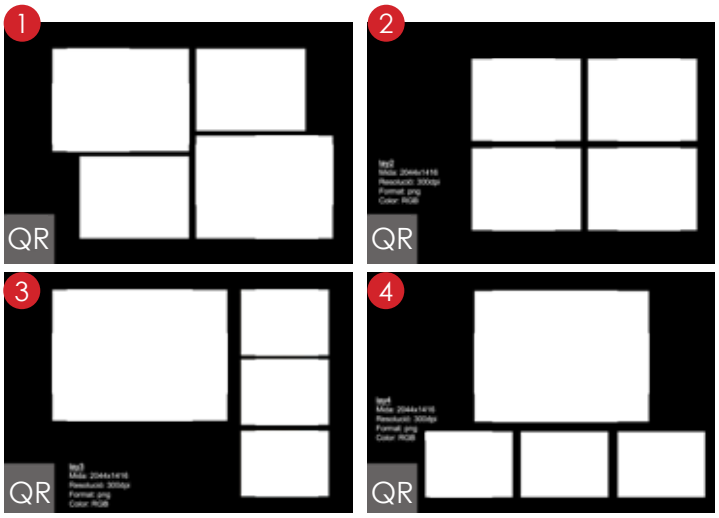
1 WHERE CAN I FIND THE COLLAGE TEMPLATES?

Log in **www.myphotocode.com**

Go to **www.myphotocode.com/home**
Click to download templates

2

Four different templates:



Collage Technical Details:

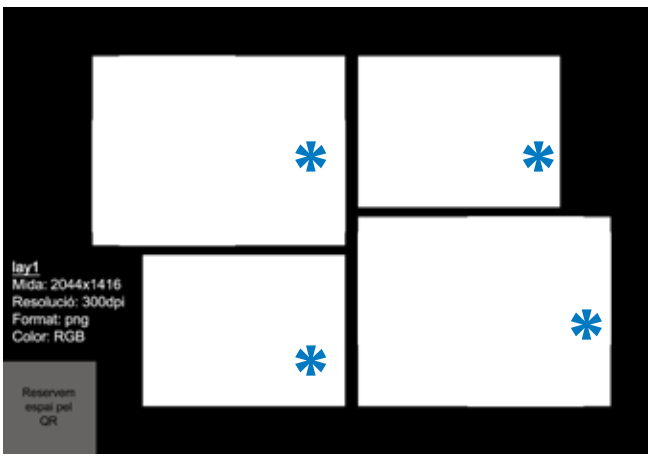
1. lay1
   Size: 2044x1416
   Resolution: 300dpi
   Extension: png
   Color mode: RGB

2. lay1
   Size: 2044x1416
   Resolution: 300dpi
   Extension: png
   Color mode: RGB

3. lay1
   Size: 2044x1416
   Resolution: 300dpi
   Extension: png
   Color mode: RGB

4. lay1
   Size: 2044x1416
   Resolution: 300dpi
   Extension: png
   Color mode: RGB

3 HOW TO DESIGN A NEW COLLAGE



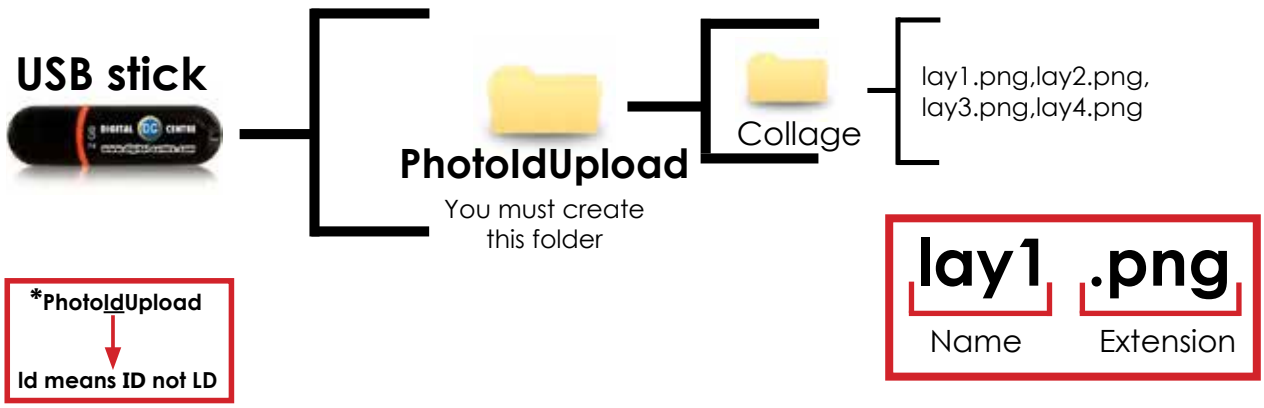
Replace the black space for your design

✱ Everything that appears in these blank spaces (transparent, png), will be seen above the photos taken by Photobooth, as shown in the example on the right.

After customizing the template is saved with the same name:
lay1.png, lay2.png, lay3.png, lay4.png.

4 SAVING YOUR DESIGN IN THE USB

Once you have designed your template which will have these dimensions: 2044x1416 pixels, RGB mode. It has to be save in a png format in a USB stick. As shown below.



5 UPLOADING THE COLLAGE

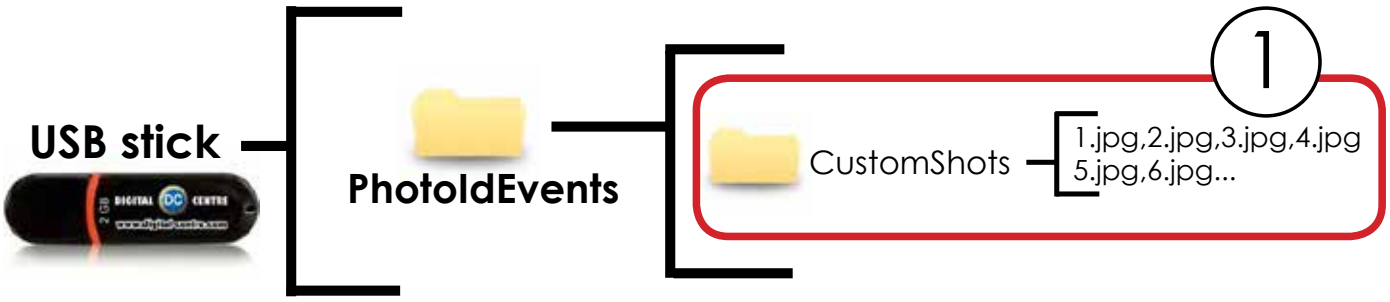
5.1 Plug the usb stick to any empty usb slot in front of the pc of your PhotoBooth.

5.2 Open the back door of the PhotoBooth and access to the configuration menu pressing the yellow button.

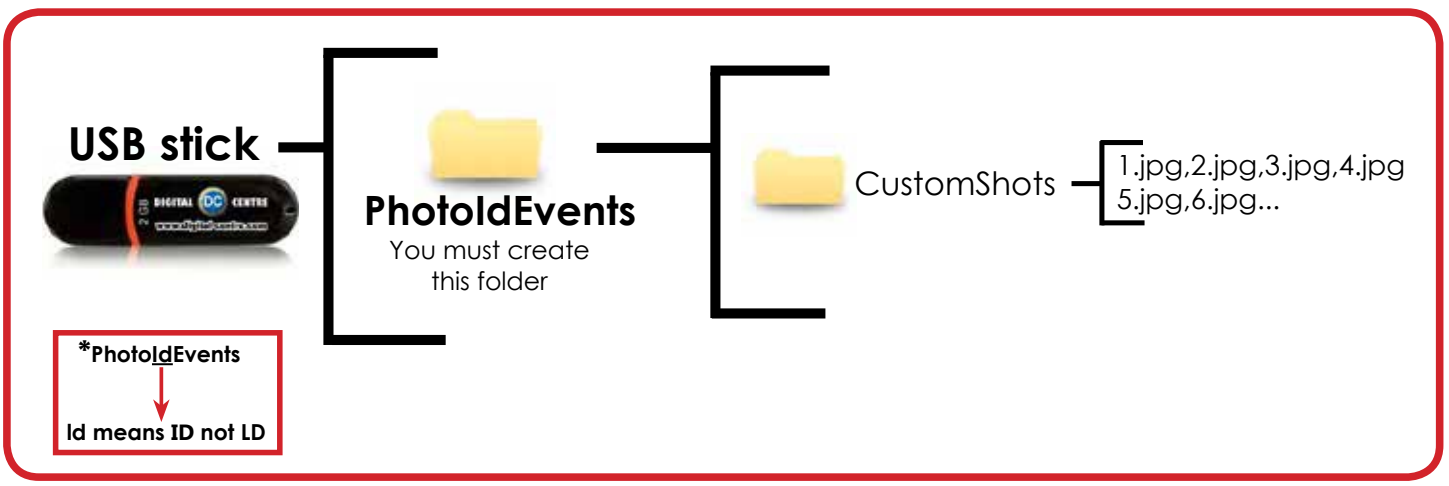
5.3 Enter to the customized menu,select:customize/collage/custom/press load/press exit.

8.8 ADVERTISING PHOTOS

B FOLDER PhotoIdEvents



DIRECTIONS FOR UPLOADING CUSTOMSHOTS



CUSTOM SHOTS are the images (made prior to the event) that we want to show on the screens during the event. An example could be for a wedding were the bride wants to show pictures from when the couple first met etc, or a company event, where they want to display brand names or products.
The CUSTOM SHOTS are shown Random during the Demonstration Mode.

SAMPLE

Name: 1,2,3,4...
Size: width: 1024 pixels
height: 768 pixels
Resolution: 72dpi
Extension: JPG
Color mode: RGB

Demonstration Mode.

Sample custom shots

1

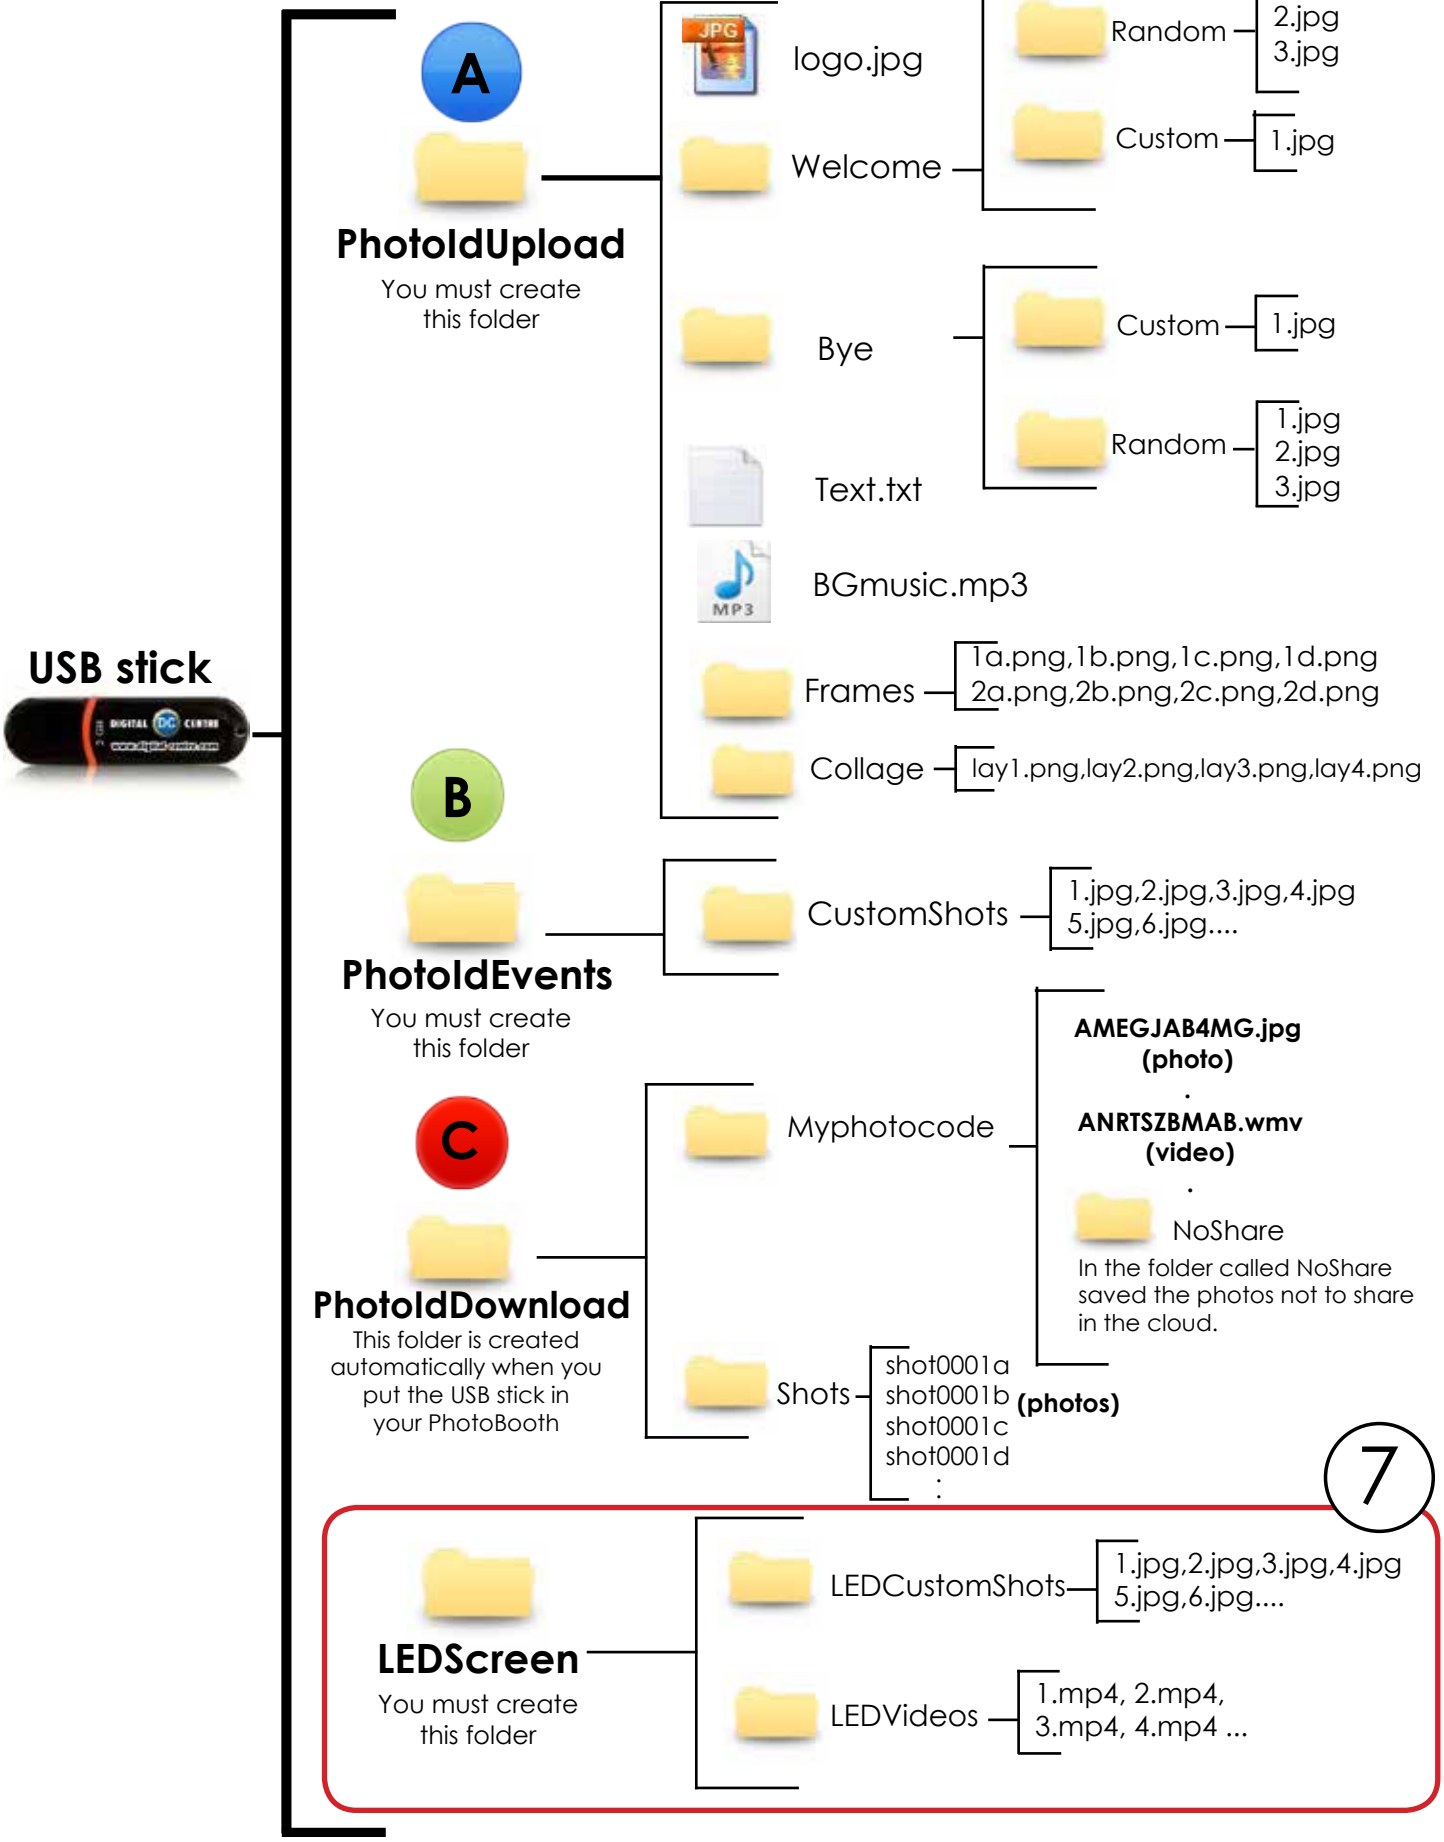
3

2

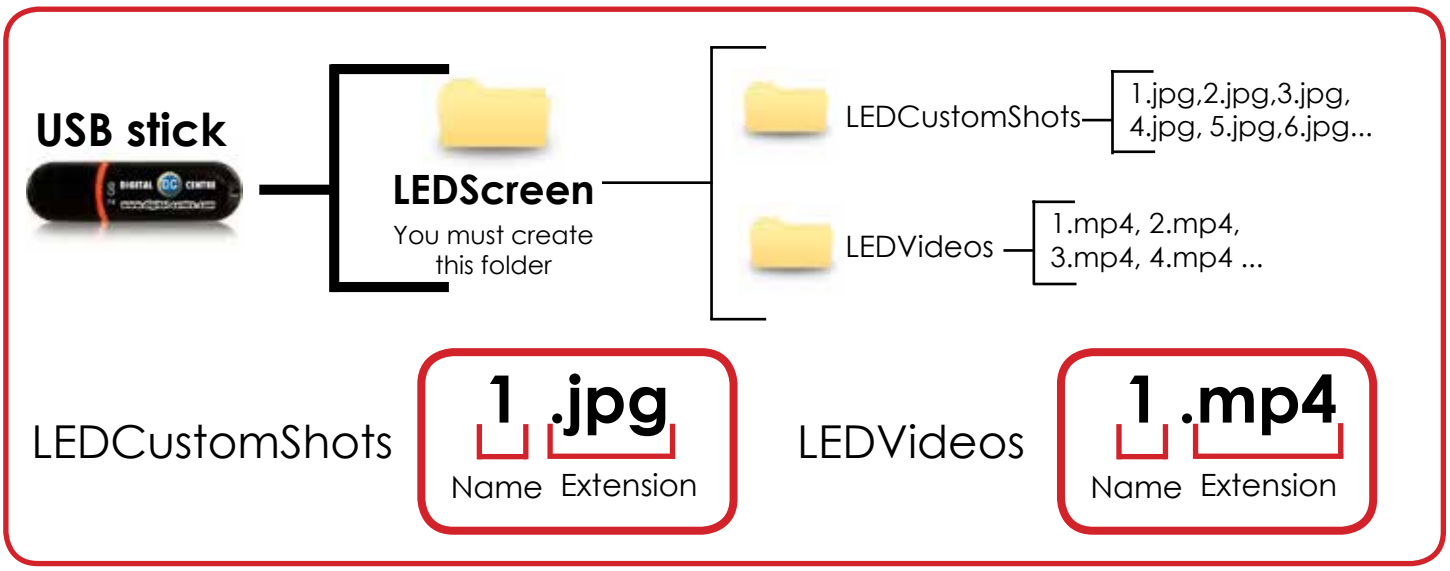
4

· You can put as many pictures as you want.
· The names of the images have to be: 1.jpg,2.jpg,3.jpg,4.jpg,5.jpg,6.jpg,7.jpg...

8.9 LEDSCREEN



DIRECTIONS FOR UPLOADING LEDSCREEN



LEDCustomShots

SAMPLE

LEDCustomshots Technical Details:

Name: 1,2,3,4...
Size: width: 1024 pixels
height: 768 pixels
Resolution: 72dpi
Extension: JPG
Color mode: RGB

It's very important to save the file of the LEDCustomShot only in JPG extension.

The format is the same as custom shots from inside the PhotoBooth: 1024x768px.
The imatges are subject to random animations and default.

LEDVideos

SAMPLE

LEDVideo

LEDVideos Technical Details:

Name: 1,2,3,4...
Size: width: 160 pixels
height: 384 pixels
Extension: MP4
color mode: RGB

It's very important to save the file only in MP4 extension.

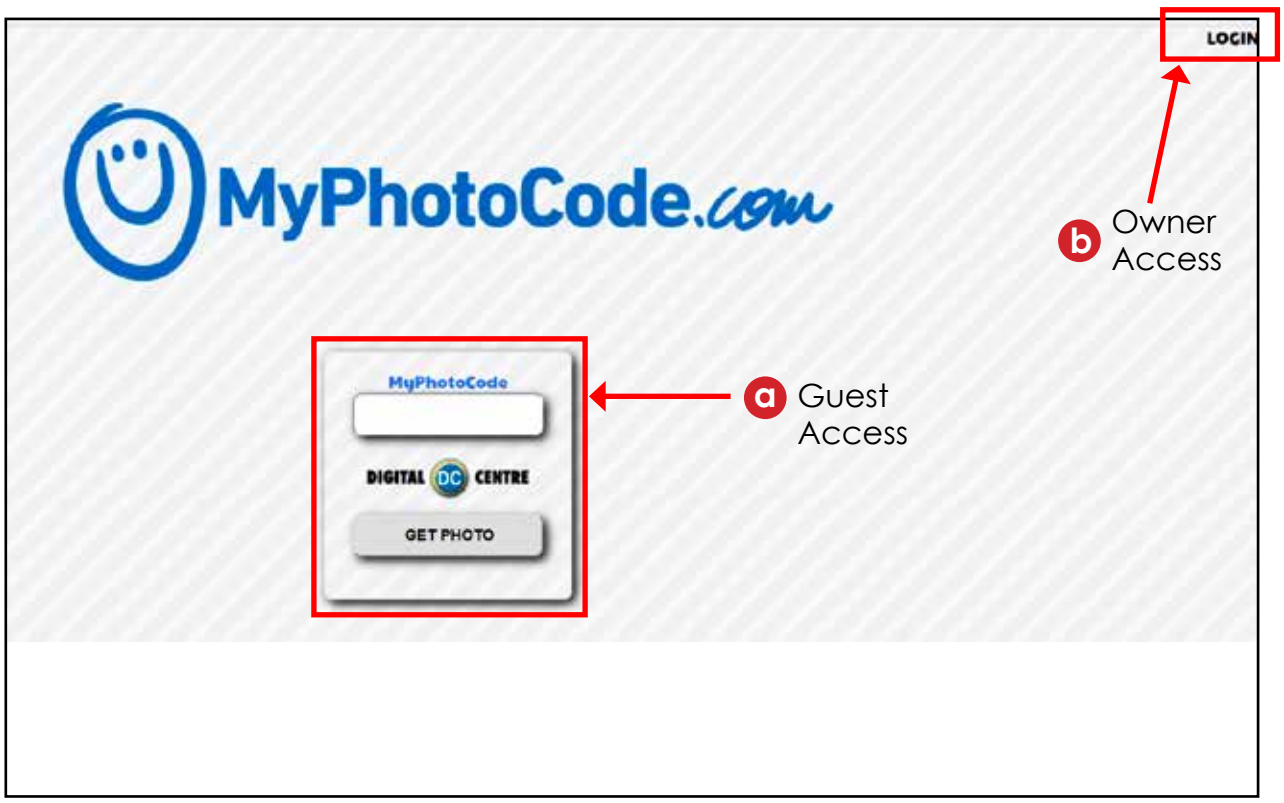
If you send a video that does not have the measurements listed above, it will not be displayed in full screen.

9-CUSTOMIZED ONLINE

9.1 ACCESS TO MyPhotoCode.com

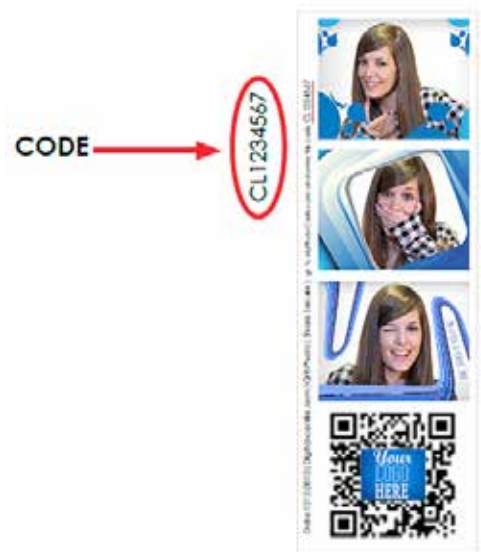
9.1.1 The home screen of MyPhotoCode.com

Go to www.MyPhotoCode.com.
On home screen of www.myphotocode.com appears:



a ***Guest Access***

If you only want to see a photo, enter the code that's on the side on the strip and click on "GET PHOTO".
This is designed for the guest to access their photos/videos.



Guests can share their photo or video on Facebook and Twitter, and send them by email.

The owner of the PhotoBooth (with which the photo was taken) can customize the background, title and a banner of this screen from their personal Cloud.

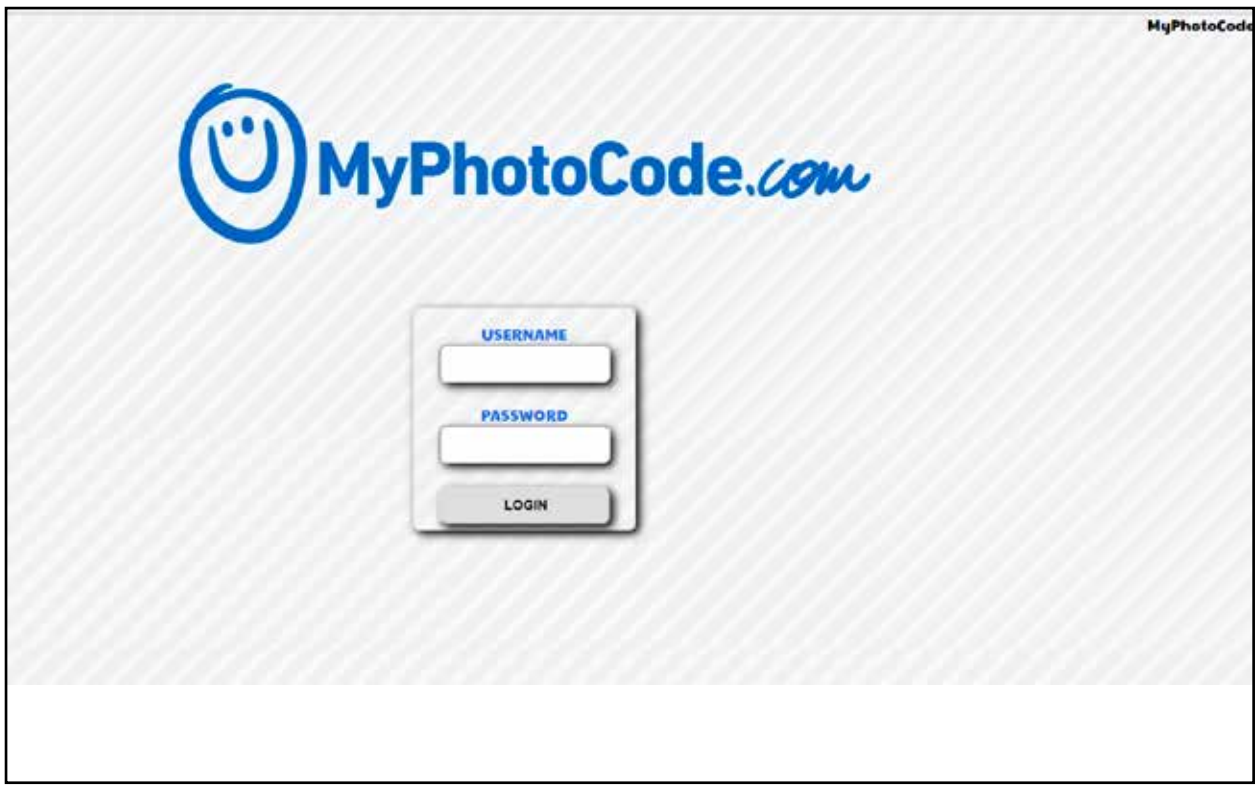
The owner can also make a questionnaire for patrons who want to see their photo. And choose if an event is private (only patrons will be able to see their photo) or public (patrons will be able to see all the photos of the event).

We'll be adding more functionalities to the Cloud, stay tuned.

Owner Access

Click "Login" if you want log into your account on MyPhotoCode.com -- ***Section 1.2***

9.1.2 Log in to MyPhotoCode.com



Enter the username and password and click on LOGIN to log into your MyPhotoCode account.

Digital Centre provides a username and password to have access on MyPhotoCode, where the PhotoBooth's owner has many options;

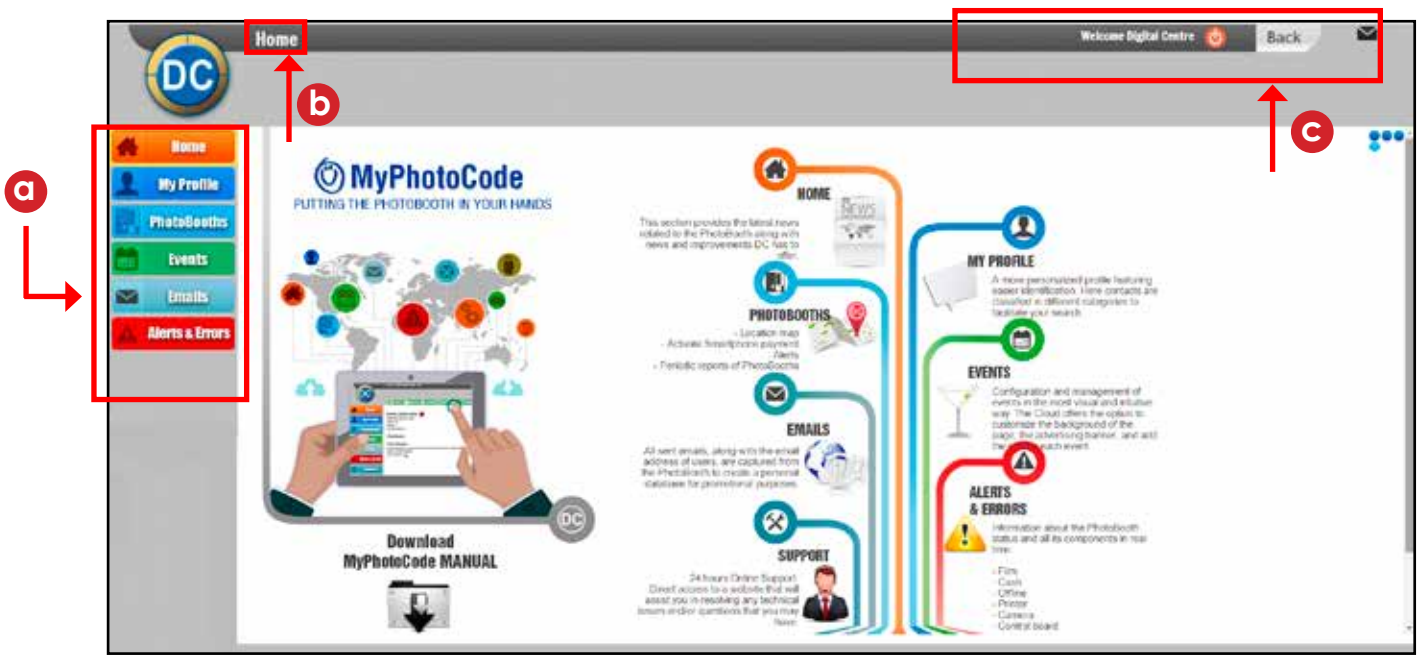
- Manage the owners information (contacts, addresses...)
- Create and customize events
- Download the photos of an event
- Capture emails from patrons to use for marketing purposes.
- Get audits, reports, alerts of the PhotoBooths
- and much more

If your company did not receive the Welcome Email, please send an email to myphotocode@dc-image.com requesting your account information. This email should contain, the name of the company who purchased the PhotoBooth, a code printed on the left side of the photo strip and the serial number from the PhotoBooth along with the PhotoBooth model.

If you forgot your password, send and email to myphotocode@dc-image.com, with your username, the name of your company and the code printed on the left side of one photo strip, and also the S/N from the PhotoBooth along with the PhotoBooth model.

9.2 ACCESS TO MyPhotoCode.com - HOME

At the home page on MyPhotoCode, you can find the lastest news about Digital Centre. Thanks to these updates we can keep you inform about our improvements, offers, new videos, and more.



a On the left side of the screen there is the main menu of MyPhotoCode which will enable you to navigate throughout the website.

The different sections of the website are:

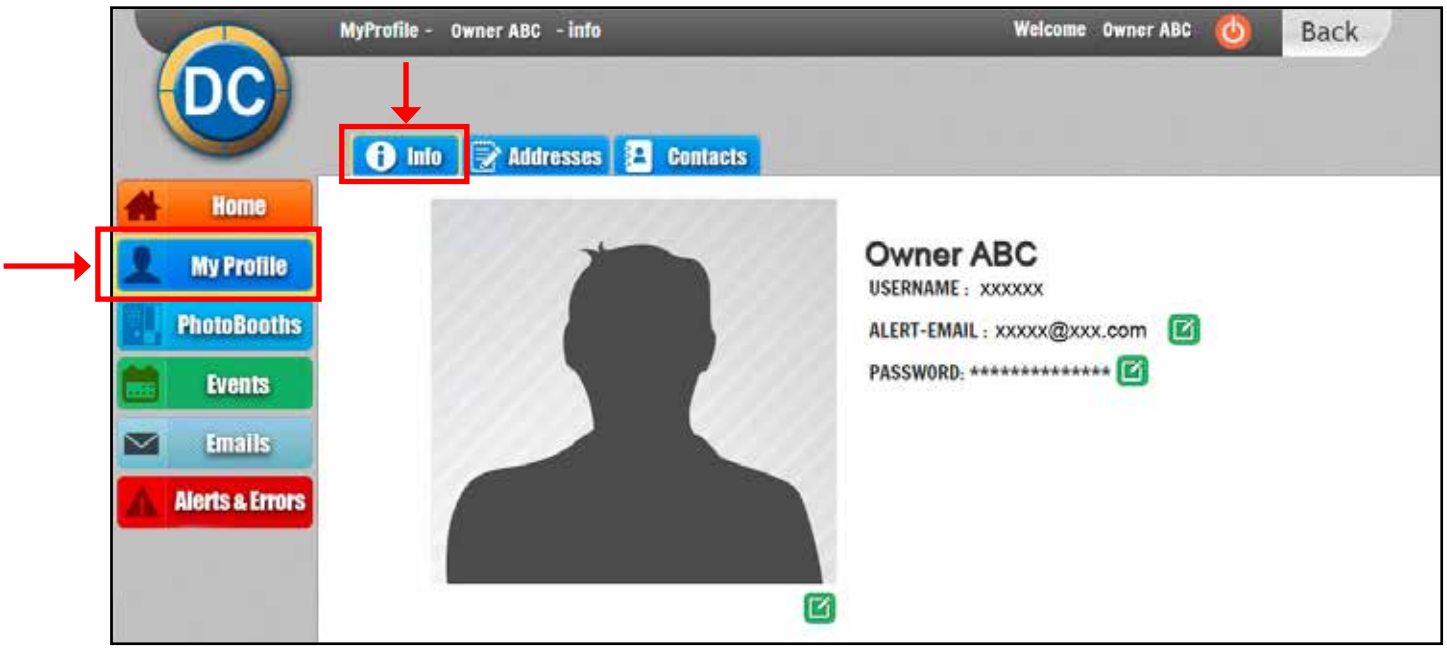
- ***Home:*** the latest news about DC offers and improvements...
- ***My Profile:*** contains information about the owner of the PhotoBooths, and contacts.
- ***PhotoBooths:*** information about your PhotoBooths.
- ***Events:*** information about the events you have created.
- ***Email:*** all guests emails collected via the Cloud.
- ***Alerts & Errors:*** alerts and/or errors that the PhotoBooth may have, listed by type. For example, the PhotoBooth is running out of film.
- ***Support:*** link that takes you to our support website.

b Info displaying the current section that you are inquiring about.

c On top right side, you can find the username, the Log OUT button, and the BACK button to use each time you want to go back on the website.

9.3 ACCESS TO MyPhotoCode.com - My profile

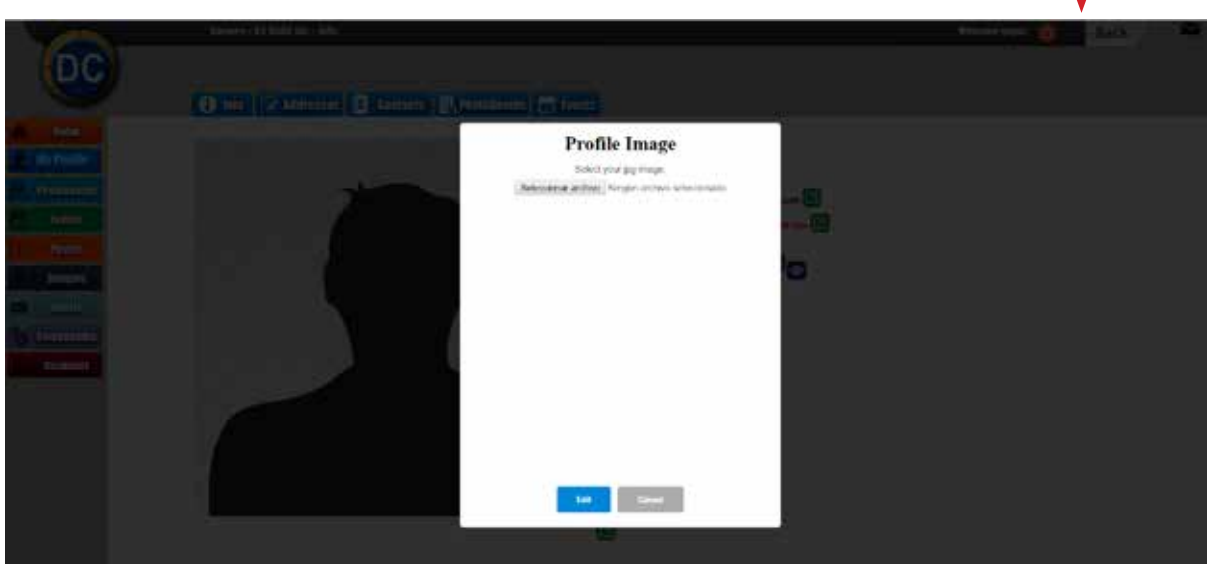
9.3.1 My profile - info



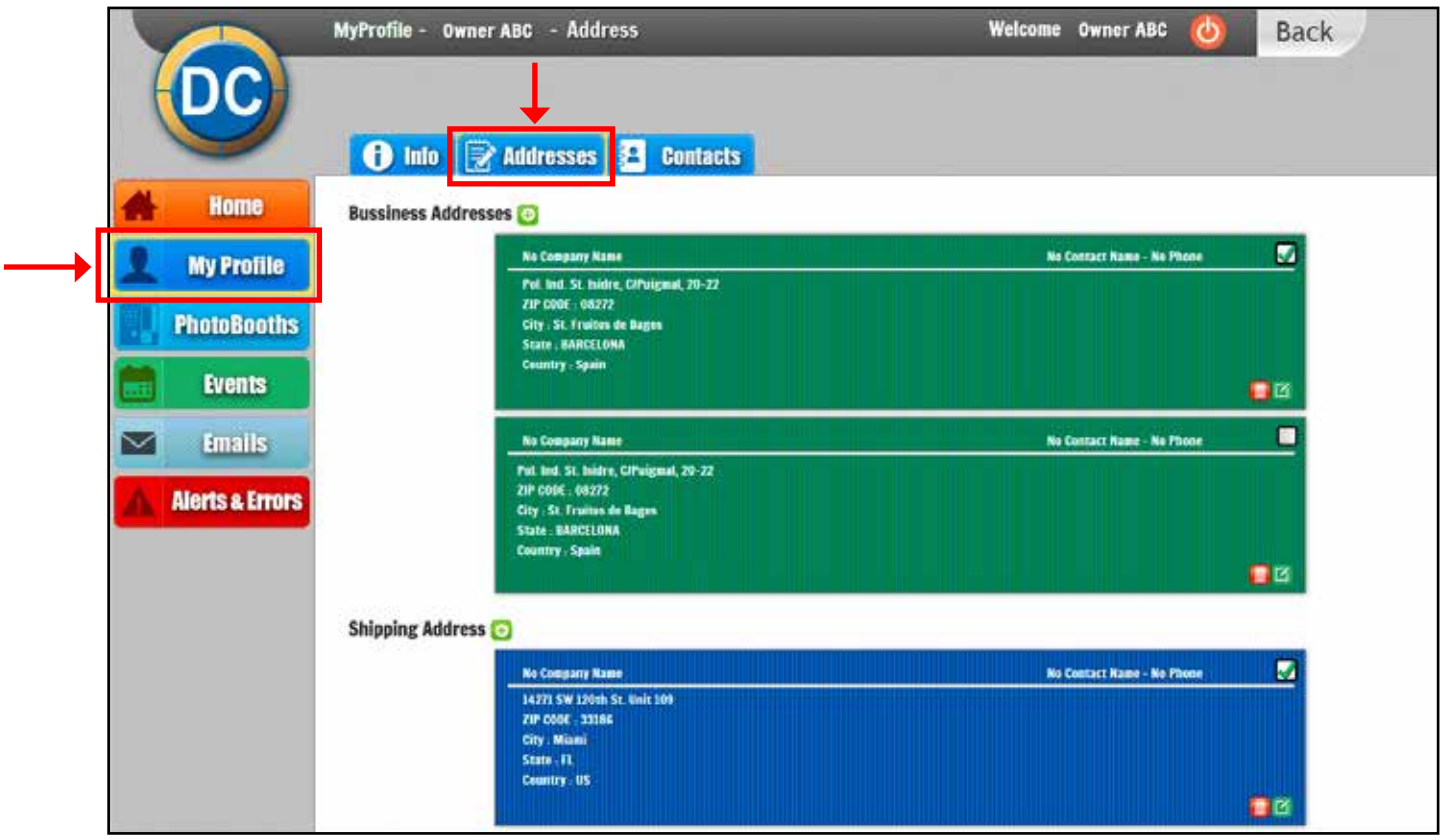
This section contains the owners information:
- ***Company name***
- ***Username:*** the username to login on MyPhotoCode.com
- ***Alert email:*** this email is where alerts, reports and/or errors will be sent.
- ***Password:*** the password to login on MyPhotoCode.com
- ***Profile picture***

When you see the icon , this means that you can edit the information by clicking on it.

When you click on the edit icon, a window will open. There you will find the instructions to edit.Here is an example, of the pop up window to edit the profile picture.



9.3.2 My profile - addresses



In this section you can store your addresses. The following are your options:

Add a new bussiness address or shipping address.

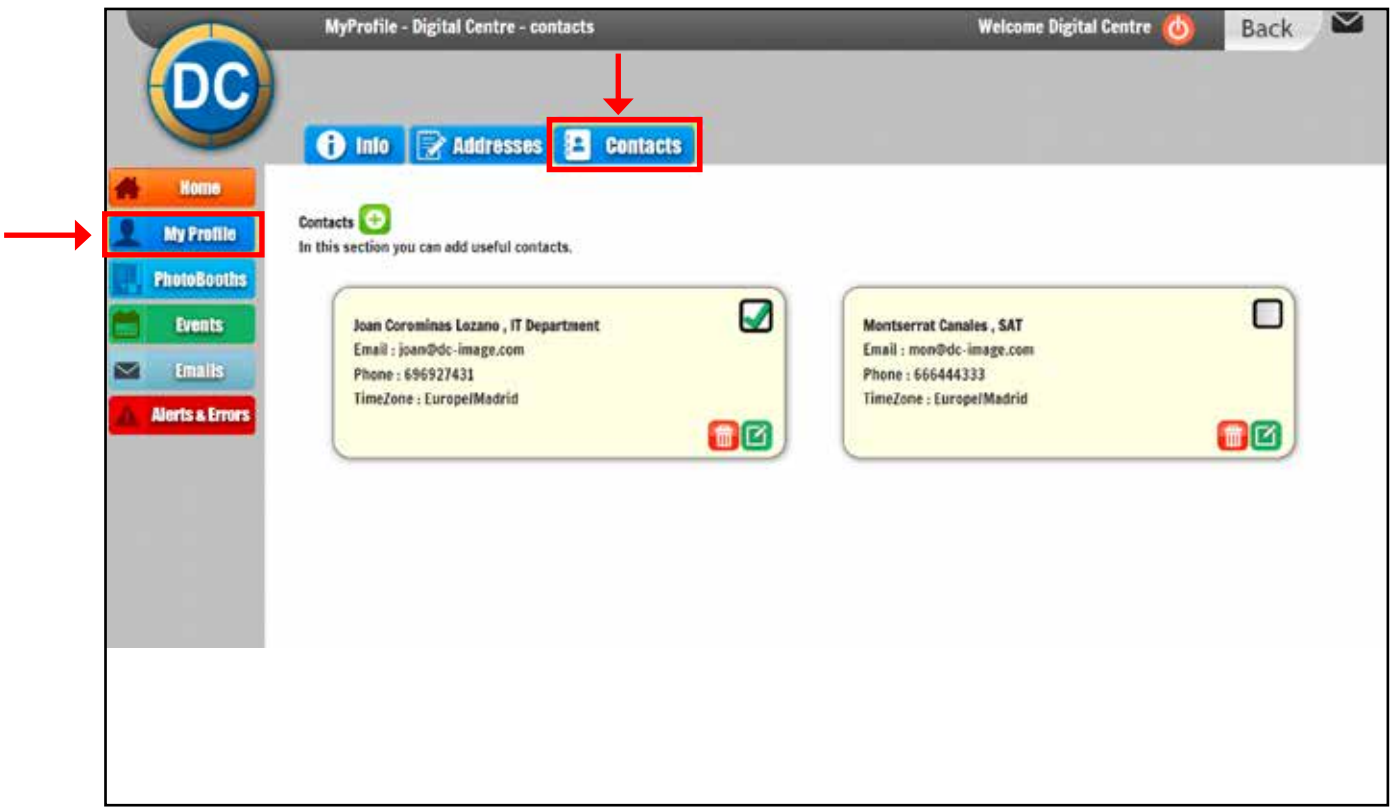
Edit the address.

Delete the address.

Default address.

The selected shipping address will be used for future purchases of film, and other items to improve your PhotoBooth.

9.3.3 My profile - contacts



In this section you can have a list of contacts of your company and your customers.

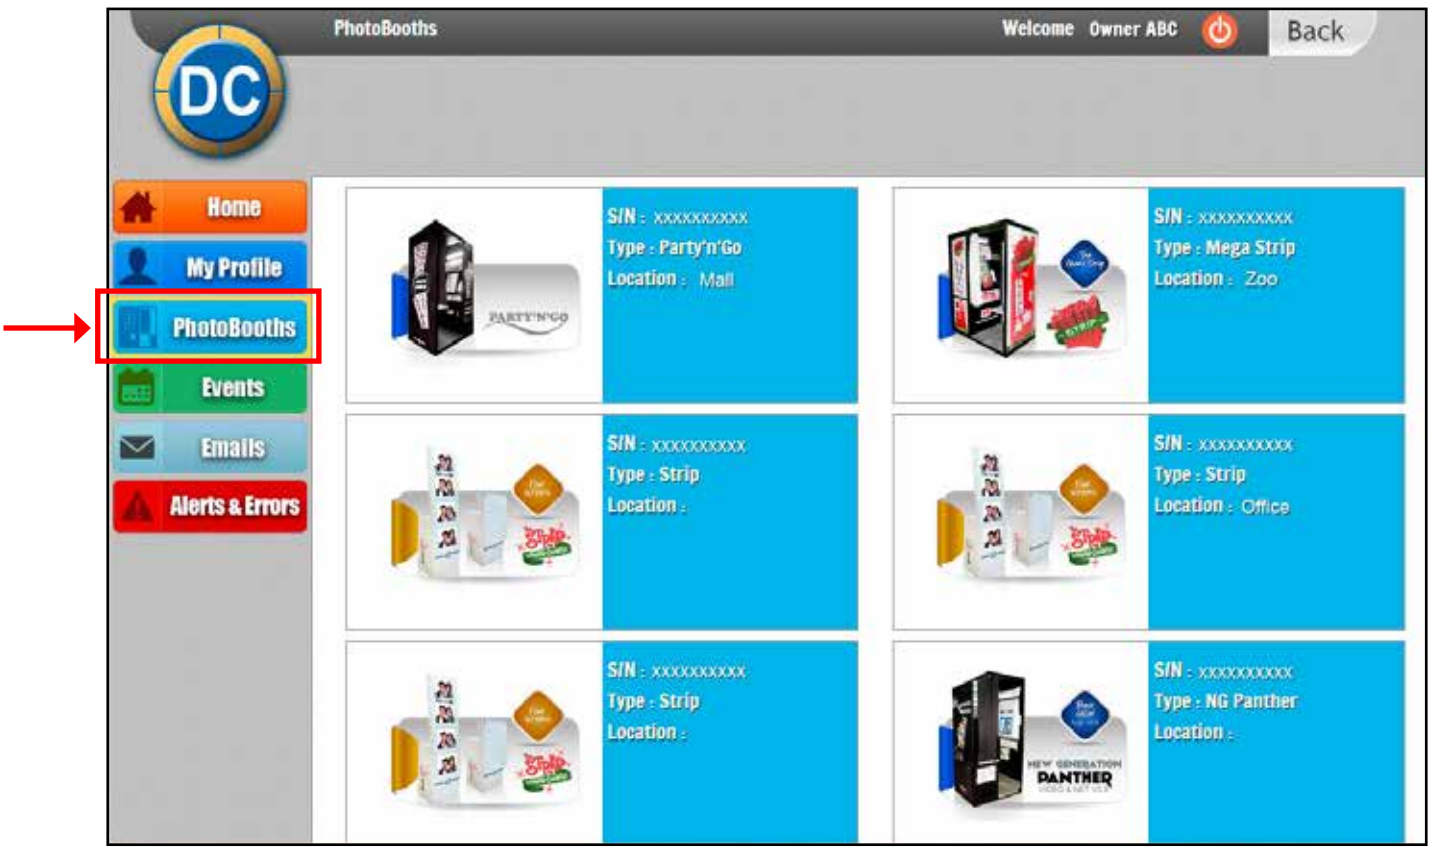
Add a new contact.

Edit each contact.

Delete a contact.

Select as the main contact.

9.4 PHOTOBOOTHS



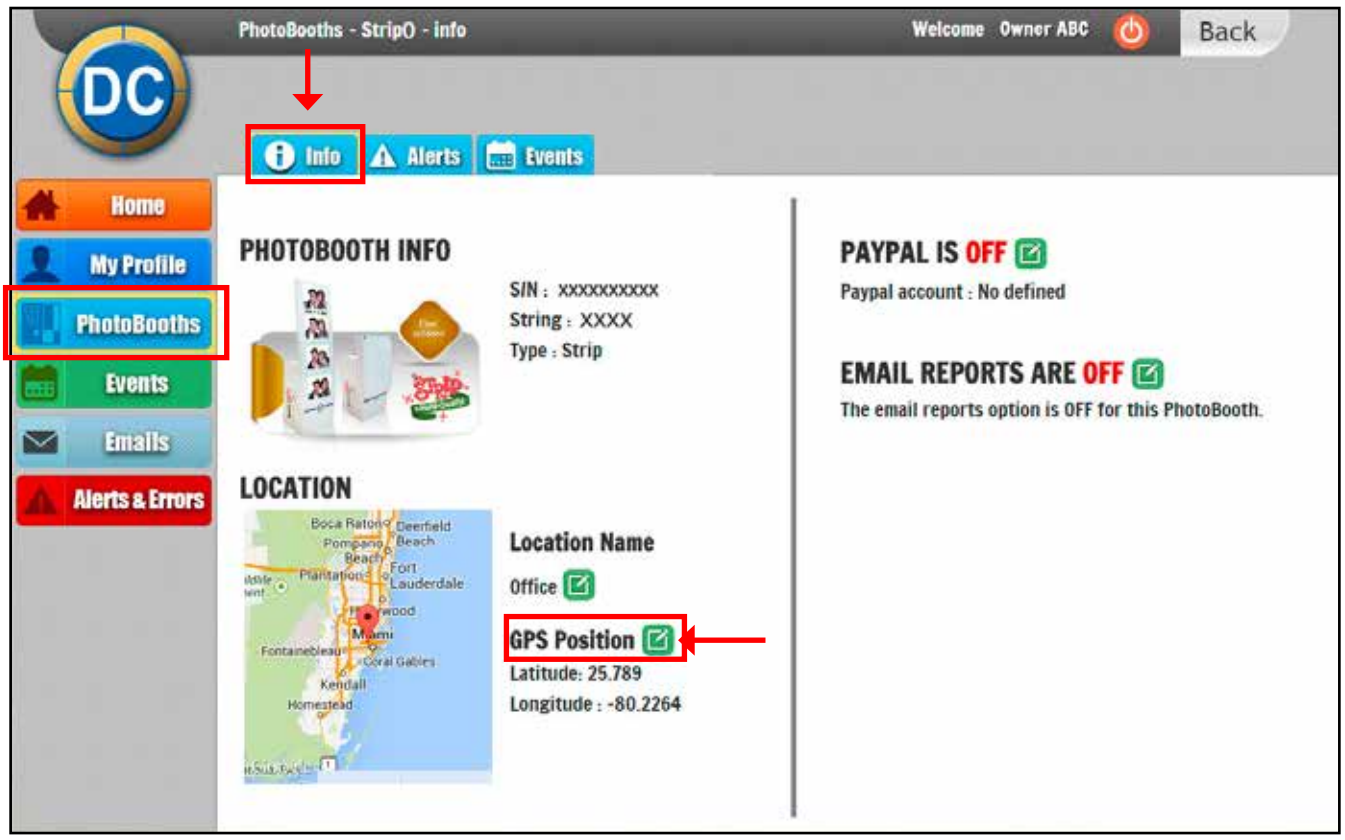
When you click on PhotoBooth it will display all of your PhotoBooths on the screen.

Each PhotoBooth shows its serial number, the type of the PhotoBooth, and the location.

On the example, you can see different models of PhotoBooths with the picture of each one and the type. In this case you can see some PhotoBooth with a location like the Zoo, the Mall or the office and some others without location.

If you click on any of the PhotoBooths, you will access the profile and information. ***Section 4.1***

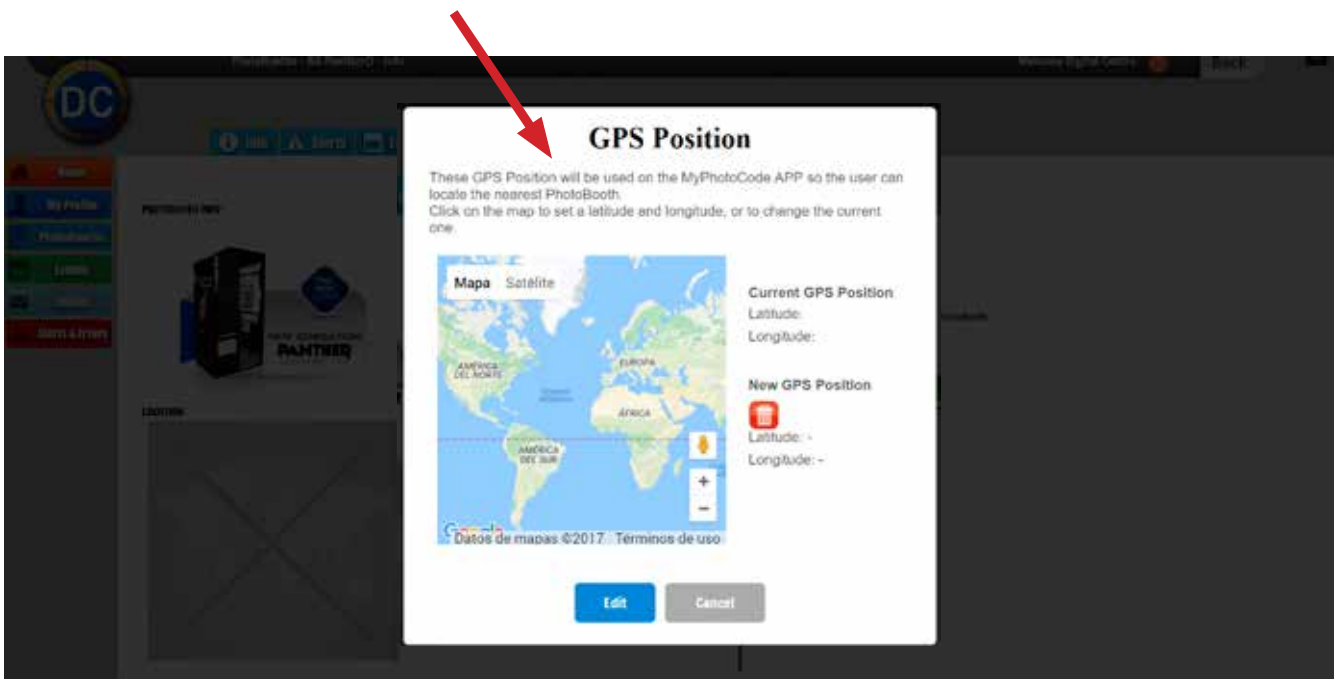
9.4.1 PhotoBooths - info



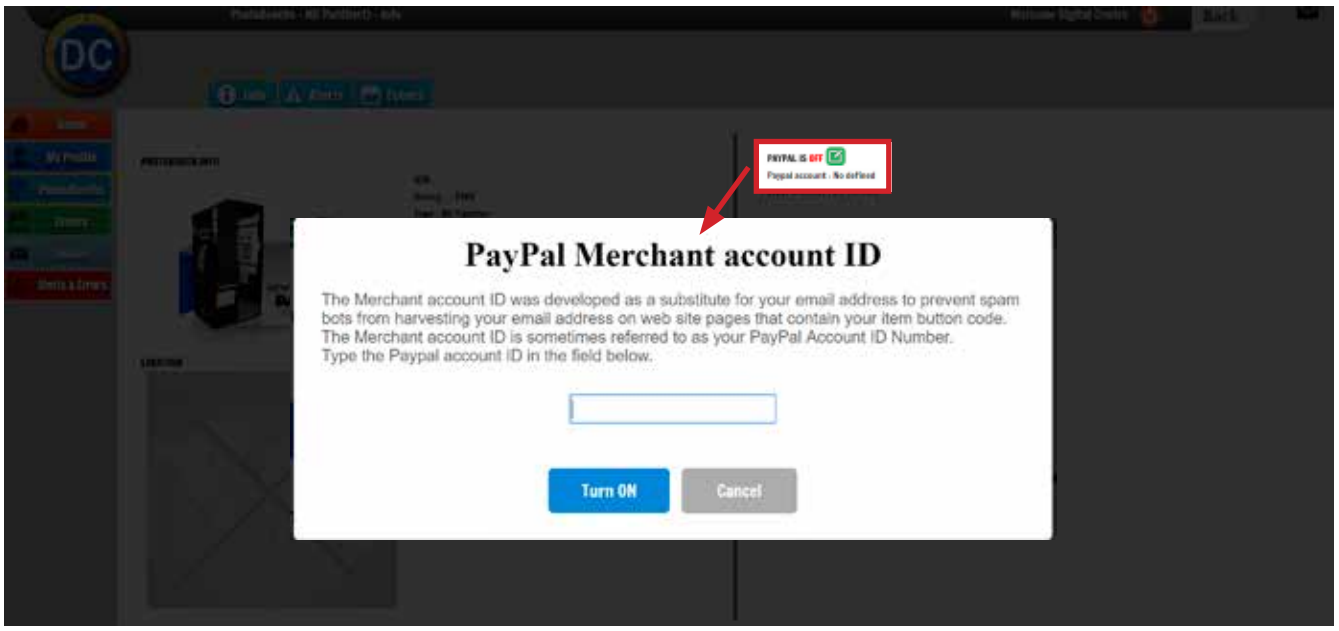
- PhotoBooth info: the main information of the PhotoBooth: serial number, string and type.

- Location: this information is important for CoinOp PhotoBooths; on location name you should type the name of the location, like a zoo, mall, cinema, bowling,...

You can also locate your PhotoBooth on a map. This will be used on the MyPhotoCode APP so users can locate the nearest PhotoBooth.

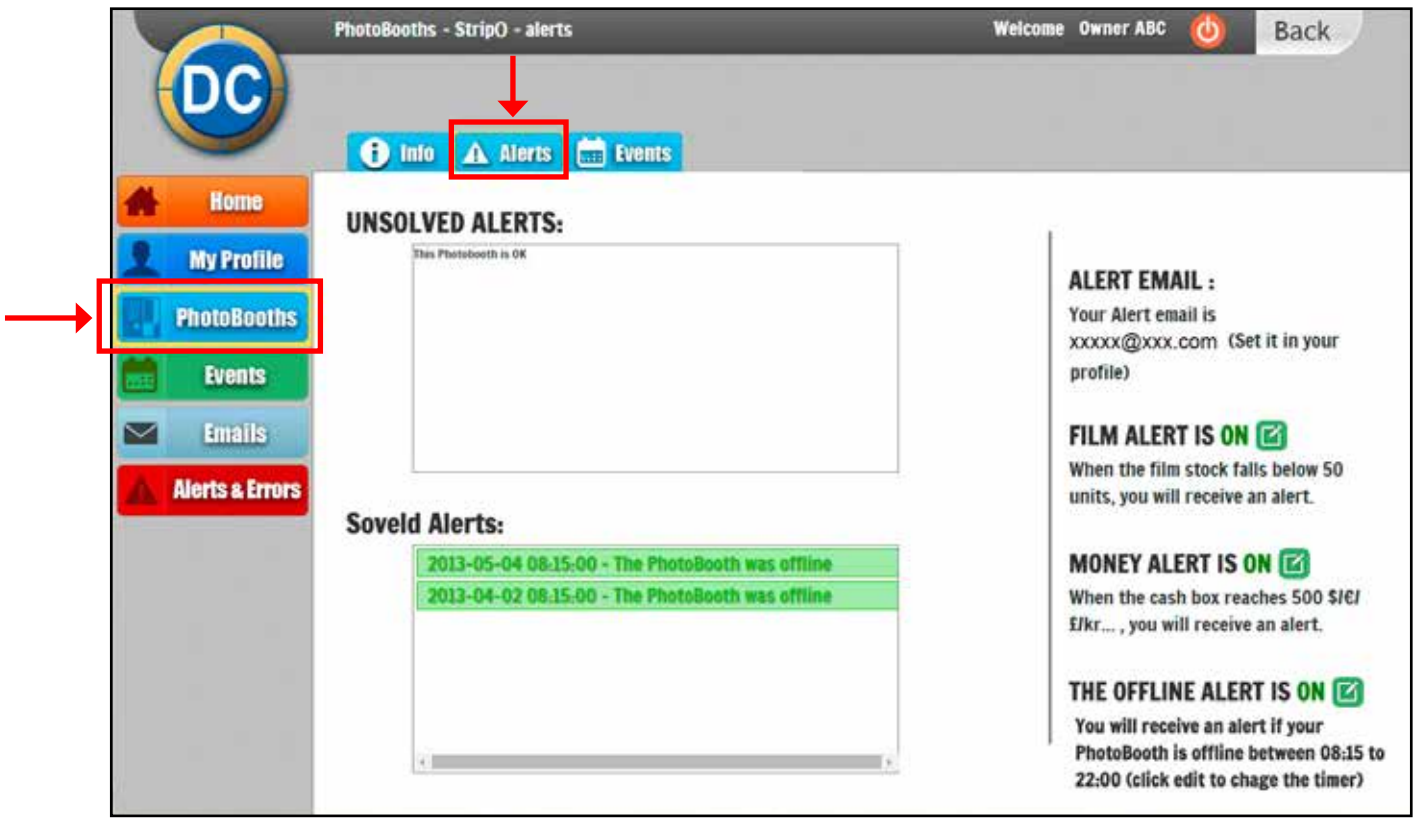


- *Paypal:* to pay via Paypal using your SmartPhone this option must be turned on.
To turn ON this option, you will need to introduce your Paypal Merchant account ID, the Merchant account ID is sometimes referred to as your Paypal Account ID number.



- *Email Reports:* by activating this option you will receive weekly, monthly and yearly email Reports along with a report of the PhotoBooth's activity (sales, cash, stock, etc...). You will receive this email to the email address that you have provided in your profile under Email Alerts. -- ***Section 3.1***

9.4.2 PhotoBooths - alerts

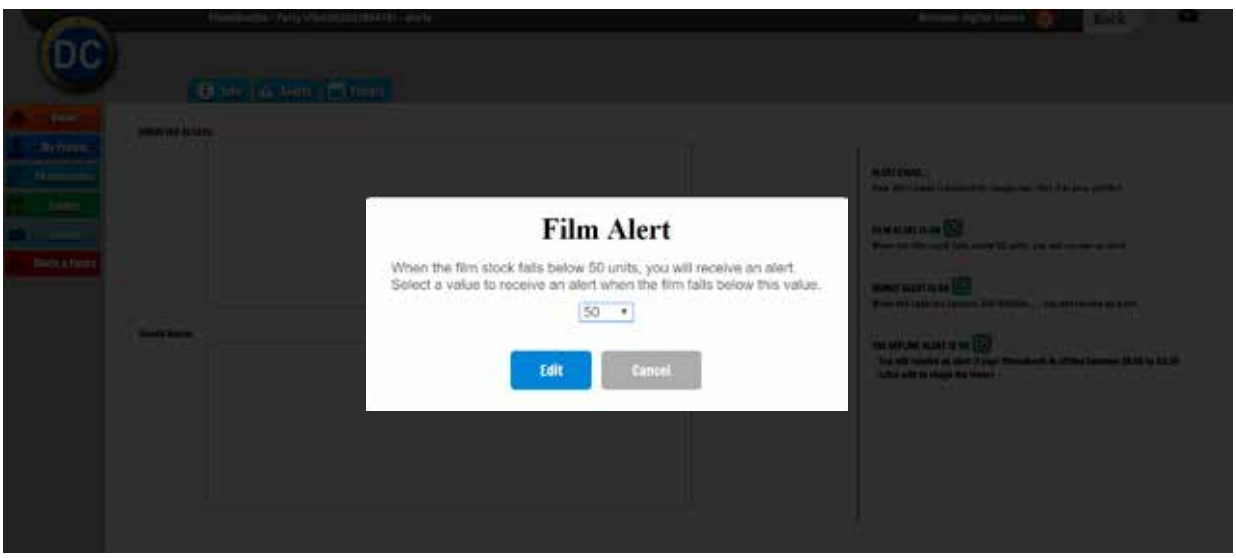


This will show any issue with your PhotoBooths. You can retrieve records of solved alerts, as well.

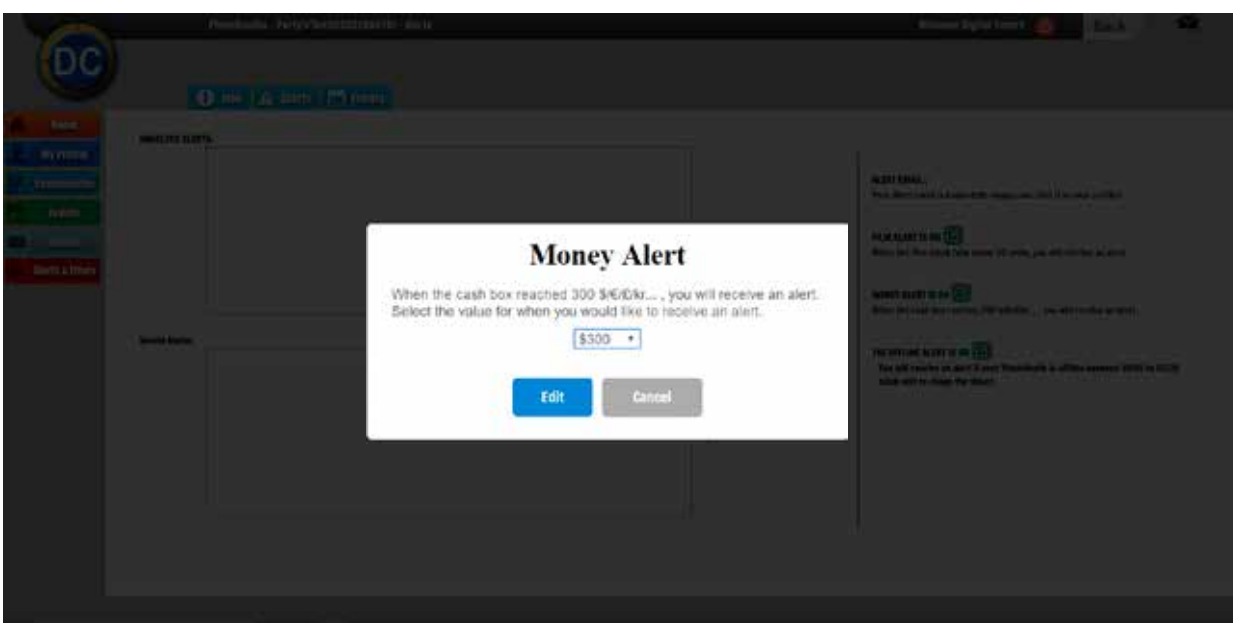
On the right side you can activate different alerts by clicking on th edit button on each one.

These alerts are:

- Film Alert: you will receive an alert when the film stock is below the value that you have selected.

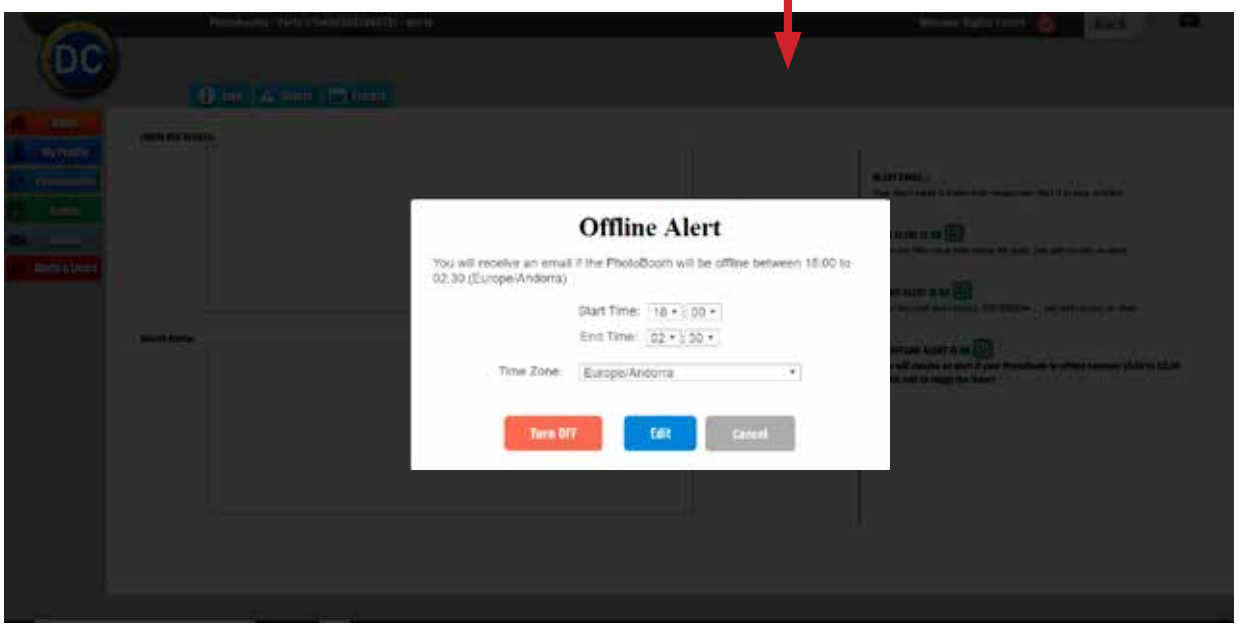


- Money Alert: you will receive an alert when the cash box has reached the value you have selected.

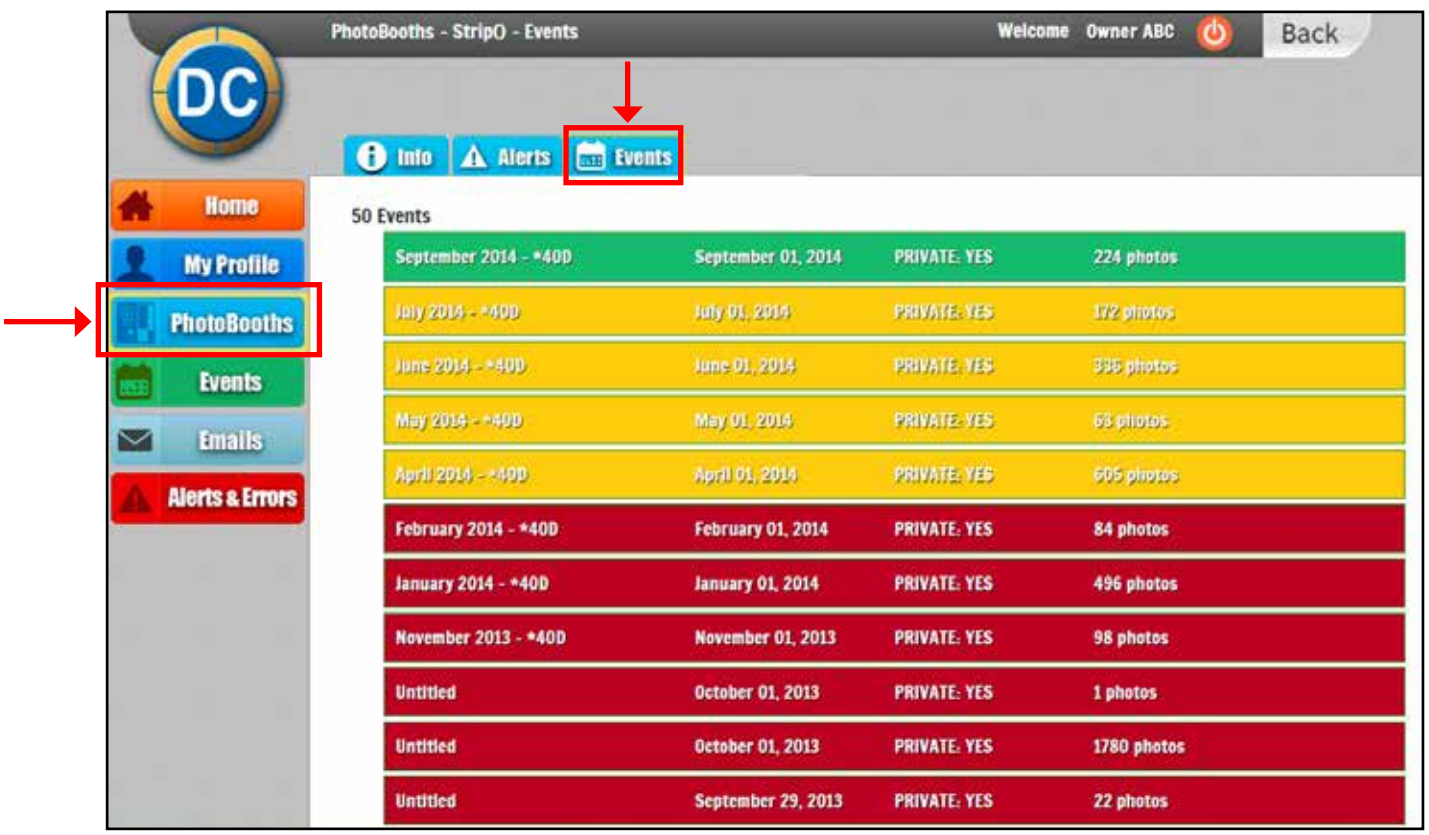


- *Offline Alert:* you will receive an alert if your PhotoBooth is offline within the period of time that you have selected.

Selected the time frame to be advised when the PhotoBooth is offline. Make sure to select the proper time zone where the PhotoBooth is located.



9.4.3 PhotoBooths - events



In this section a list of events which have been made with the selected PhotoBooth; you can also see the number of events created.

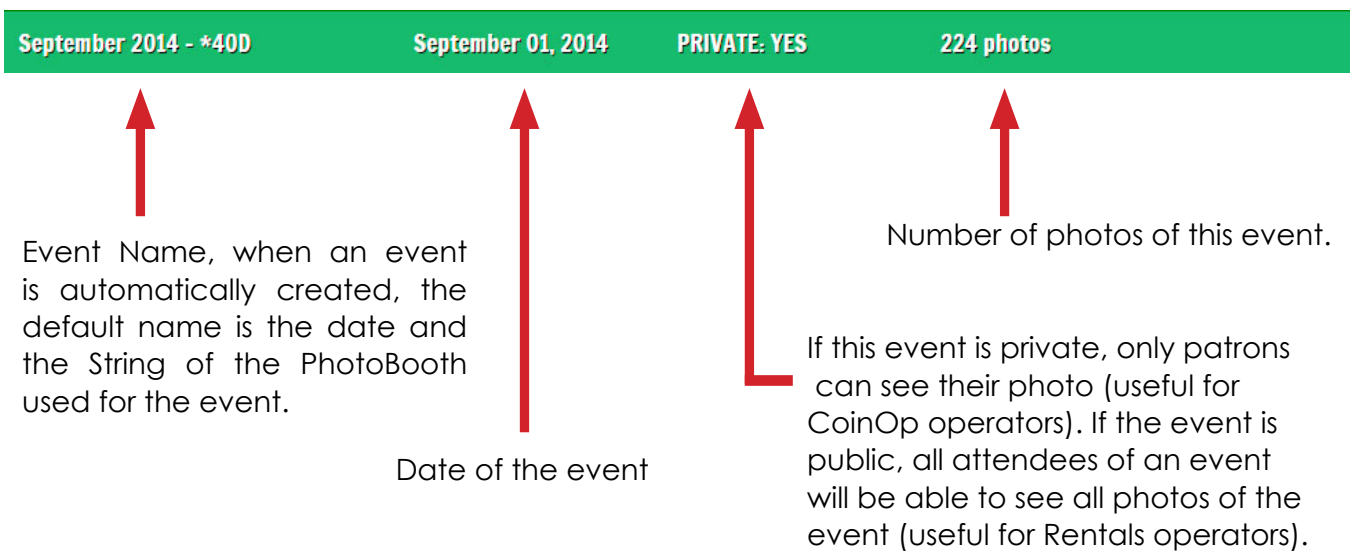
The events are organized by color:

Active event

This event has received pictures between last week and three months ago.

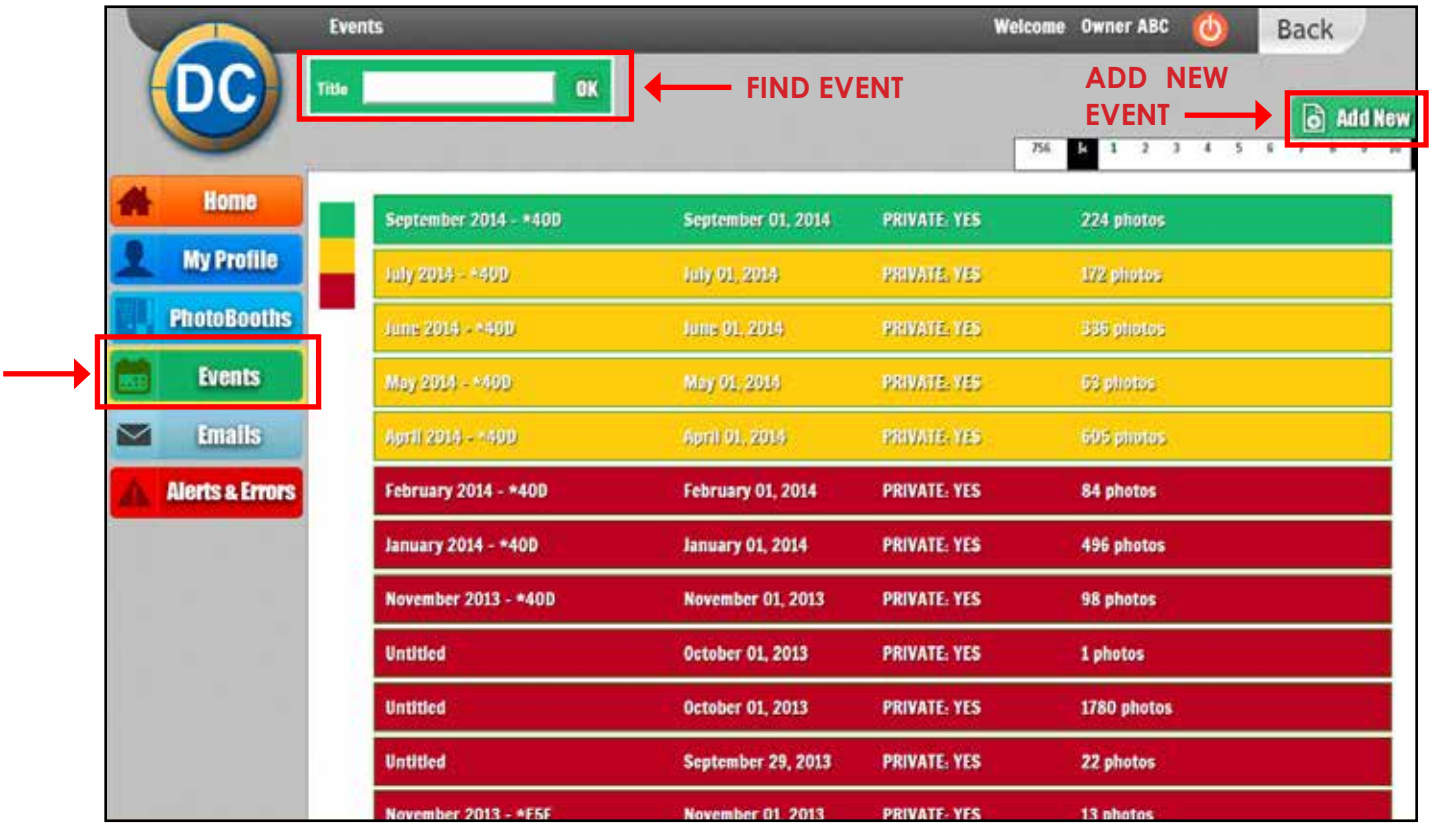
This event didn't receive a photo during the last 3 months.

The list shows the information for each event:



By clicking on one event, the contents of that event will be displayed. -- ***Section 5 (EVENTS)***

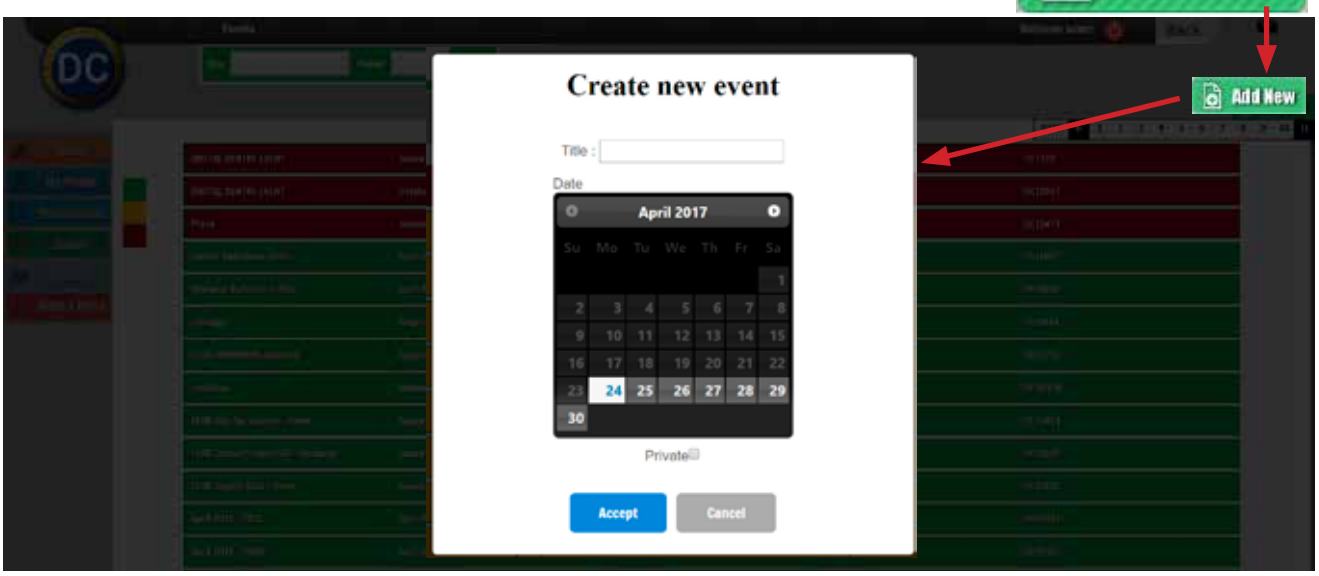
9.5 MYPHOTOCODE - EVENTS



This section shows a list of all events created for your PhotoBooths. The events are organized by color. (The list shows the same basic information of each event that was explained on the section 4.3)

- Add a New Event: In this section you can also add a new event by clicking the button "Add New".

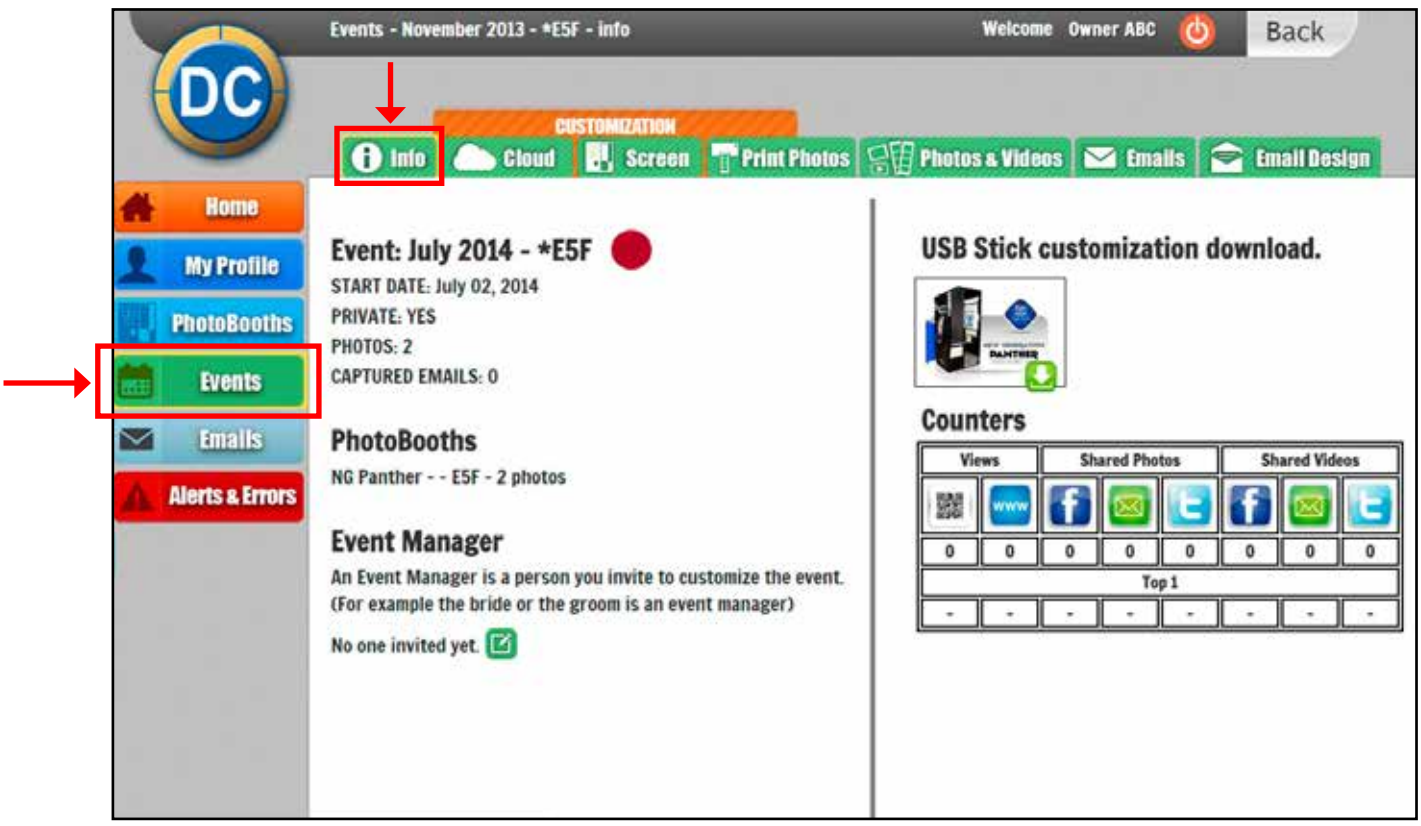
To create a new event, type the title of the event, select the date and then click on the checkbox if the event is private. Then click SAVE.



- ***Find Existing Event:*** If you want to find a specific event, type the name in the box below (located at the top left corner).

Clicking on one event will take you to he content.

9.5.1 Events - info



Info Display: (located at the top left) this shows the name of the section and event. In this case we are on EVENTS for "November 2013 - *E5F".

In the event INFO you can see a brief information about the event:

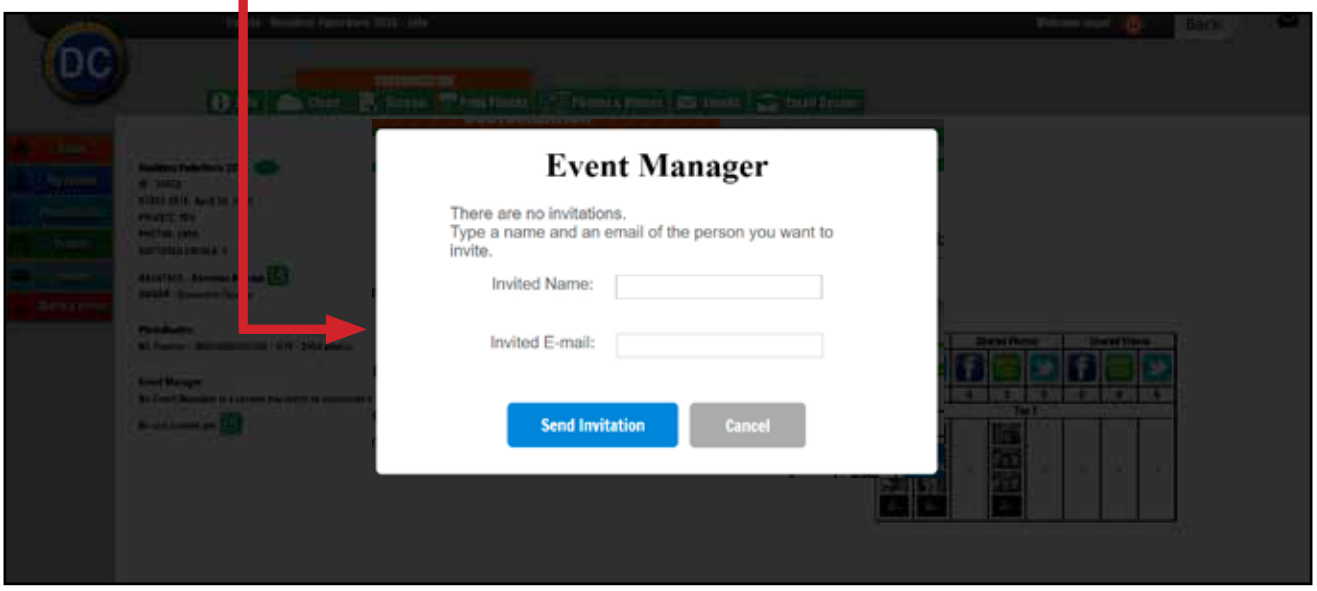
- ***EVENT:***
  - · the name of the event and if it is an active event or not (round color indicates if it is active/inactive)
  - · the start date of the event
  - · if the event is private/public
  - · the number of photos taken during that event
  - · the number of captured emails from that event

- ***PHOTOBOOTHS:*** the PhotoBooth(s) in which this event was made.

- ***EVENT MANAGER:*** the person you assign to customize the event (for example the bride or the groom).

If you want to invite an event manager, click on the EDIT button.

Type the name and the e-mail address of the person you want to assign, an click on SEND INVITATION



- ***USB Stick customization download:*** if you want to customize your PhotoBooth for an event, follow the instructions in sections 5.3 & 5.4. and return to this page to download the content to the USB stick for this event.

A zip file will be downloaded by clicking the button, then you need to unzip this file and download all onto the USB stick.

Next step will be plug the USB Stick to the front of the Computer (at the PhotoBooth), go to the customize section from the setup Menu, and click LOAD.

⚠ **UNZIP FILE:** unzip software available at www.winzip.com.

- COUNTERS:

Views: shows the number of photos which have been seen via the QR code or via the WEB.

·Shared Photos: shows how many photos have been shared by Facebook, Twitter, or have been sent via E-Mail.

·Shared Videos: shows how many videos have been shared by Facebook, Twitter, or have been sent via E-Mail.

·Top 1: here shows the photo or video with more views or shares of each category.

Counters

Views		Shared Photos			Shared Videos

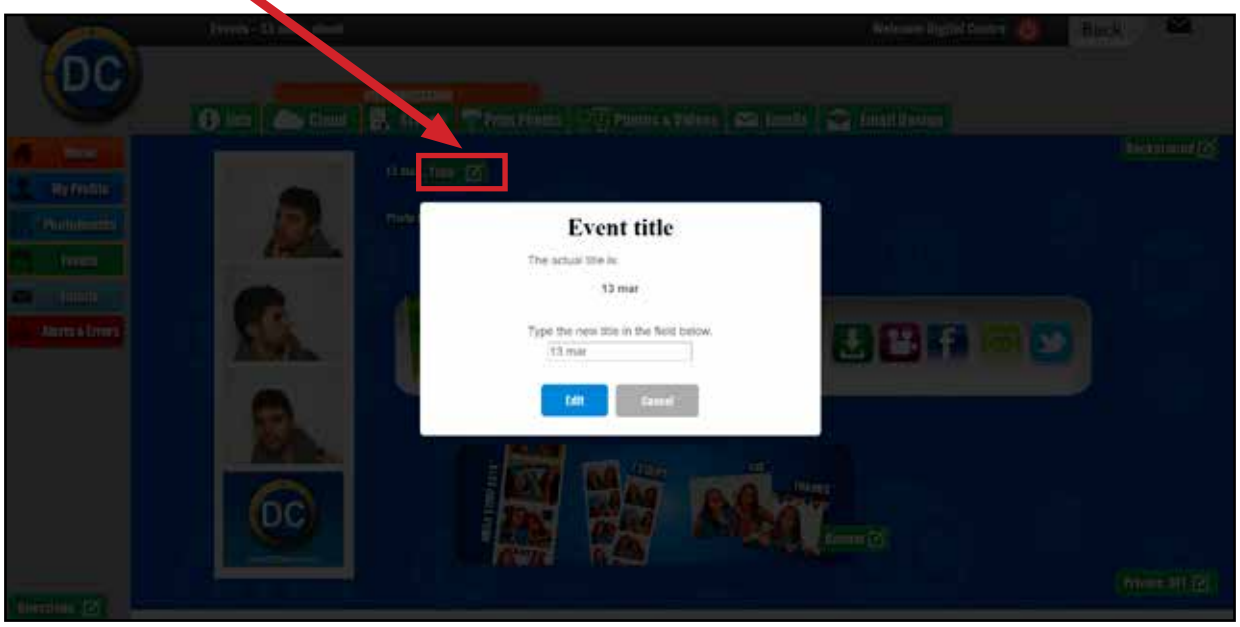
9.5.2 Events - cloud

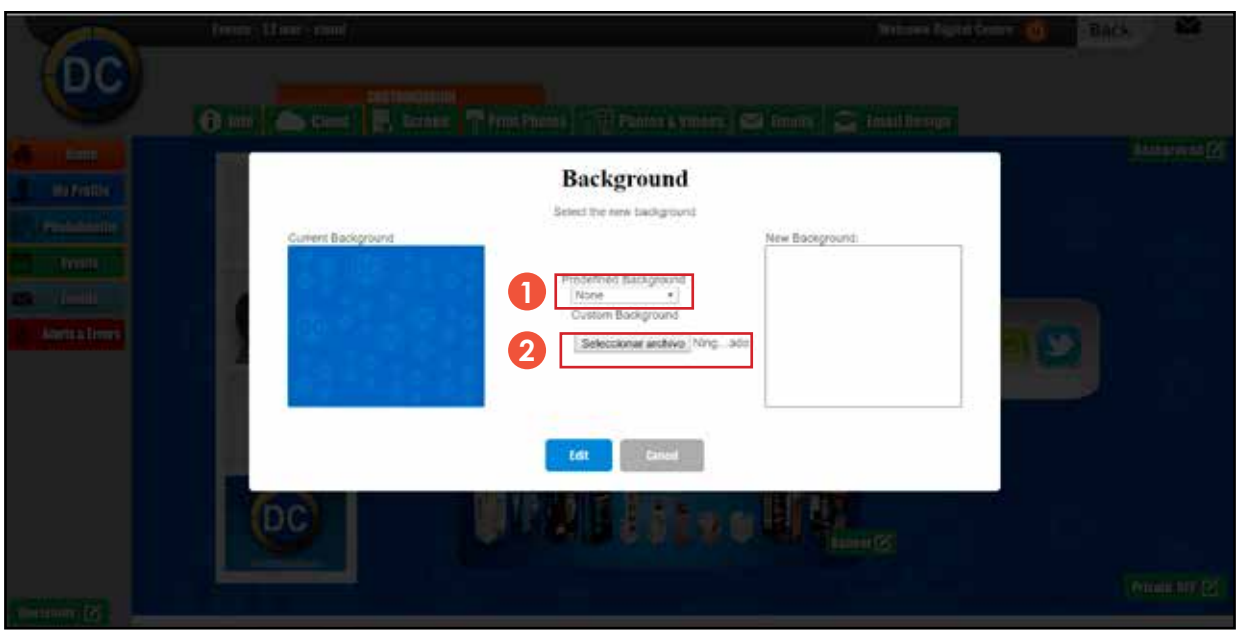
It allows to Customize what Patrons see on their Phone or Computer when they scan the QR code or type the code from their Photo to MyPhotoCode.com.

You can also customize the Cloud for each event. To customize the Cloud, click on specific buttons to edit each part.

Title Type the title you want and click on SAVE.

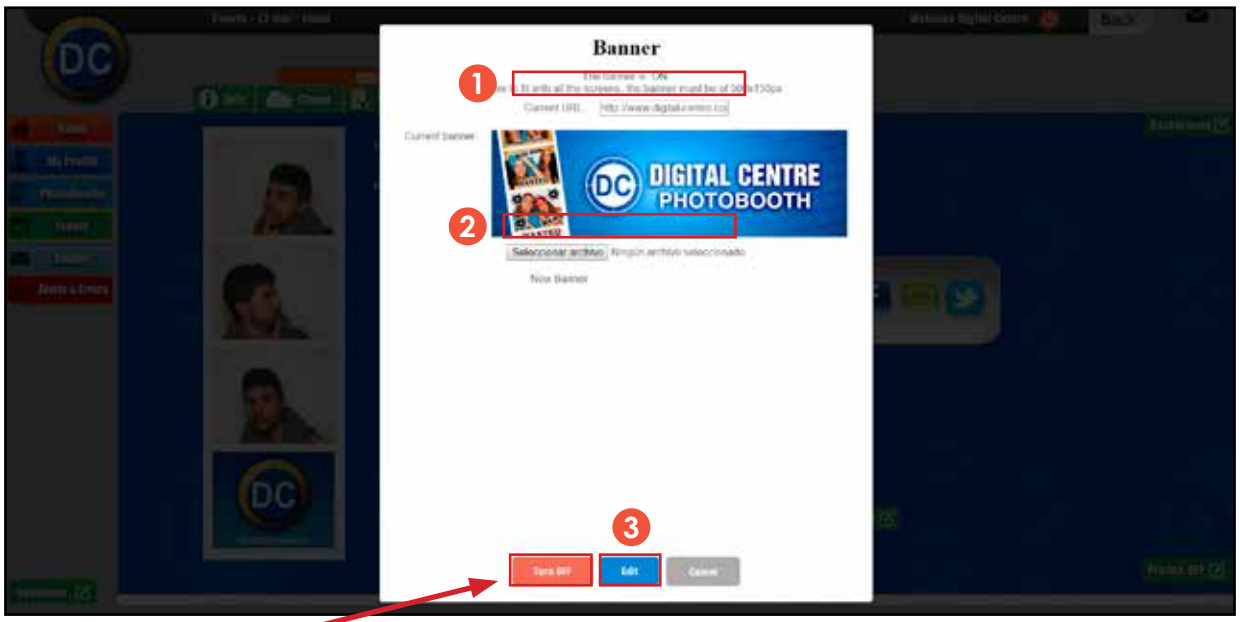


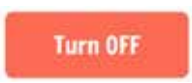
Background Select a 1 Predefined Background or 2 Upload your own.
Once selected the one you want click on EDIT.



You have the option to switch On an advertising banner that will link to your website.

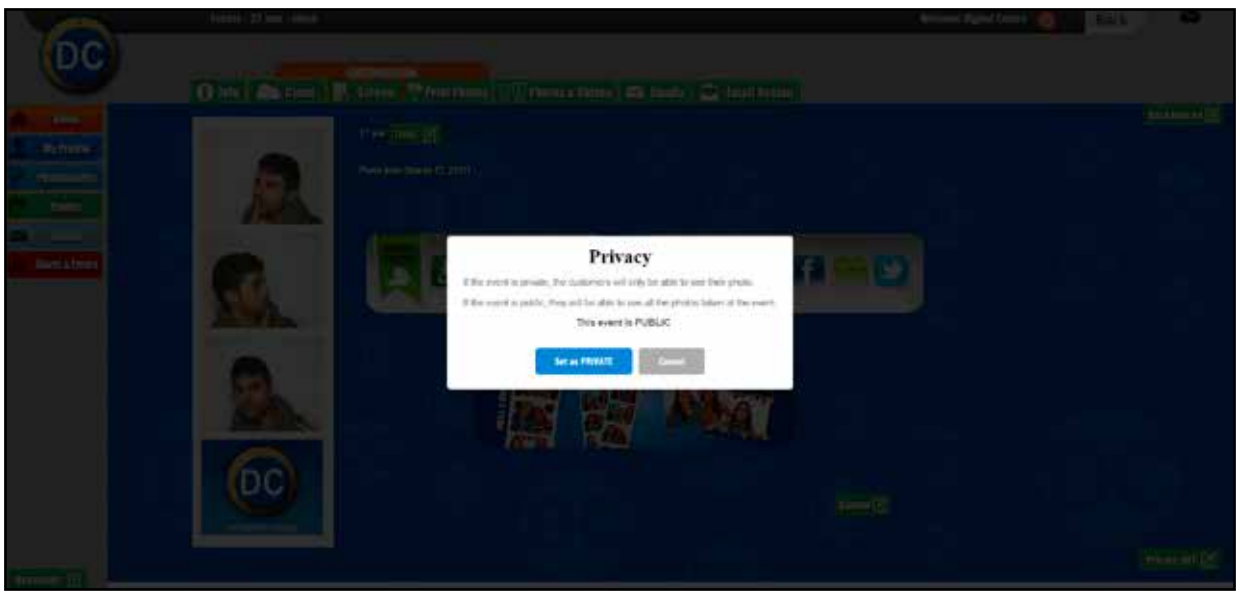
1. Type the URL that you want (for example your website), don't forget to use http://.
2. Choose an image or gif to be the banner.
3. Click EDIT.





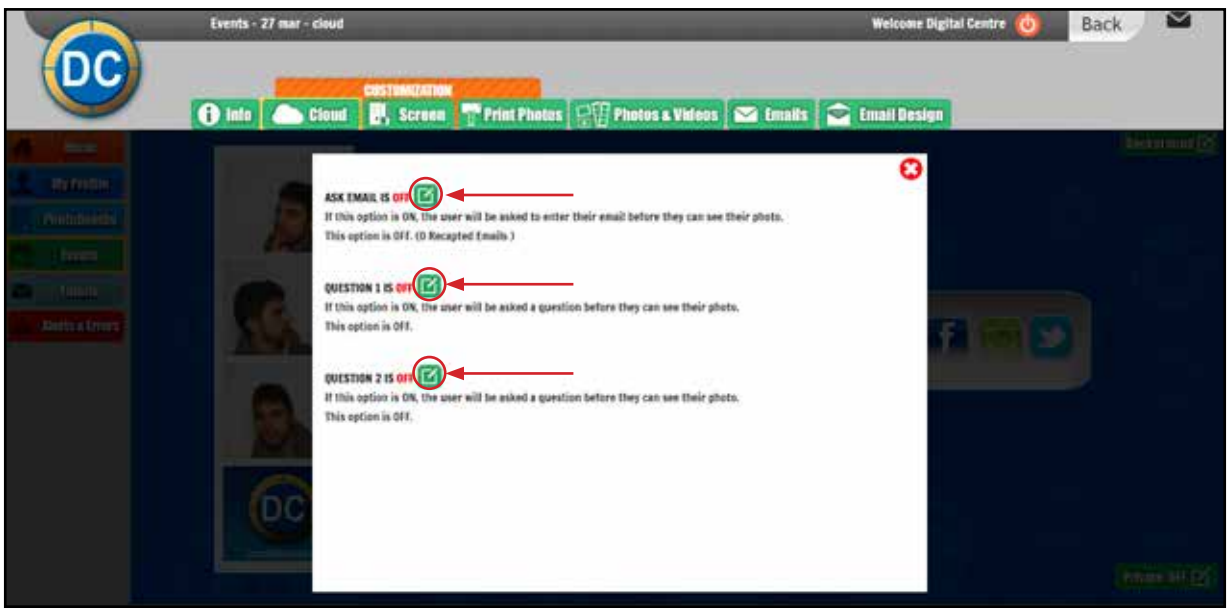
Click here to enable or disable the banner.

Here you have the option to edit the privacy level of the event.
If the event is private, patrons will only be able to see their own photo.
If public, they will be able to see all photos from the event.



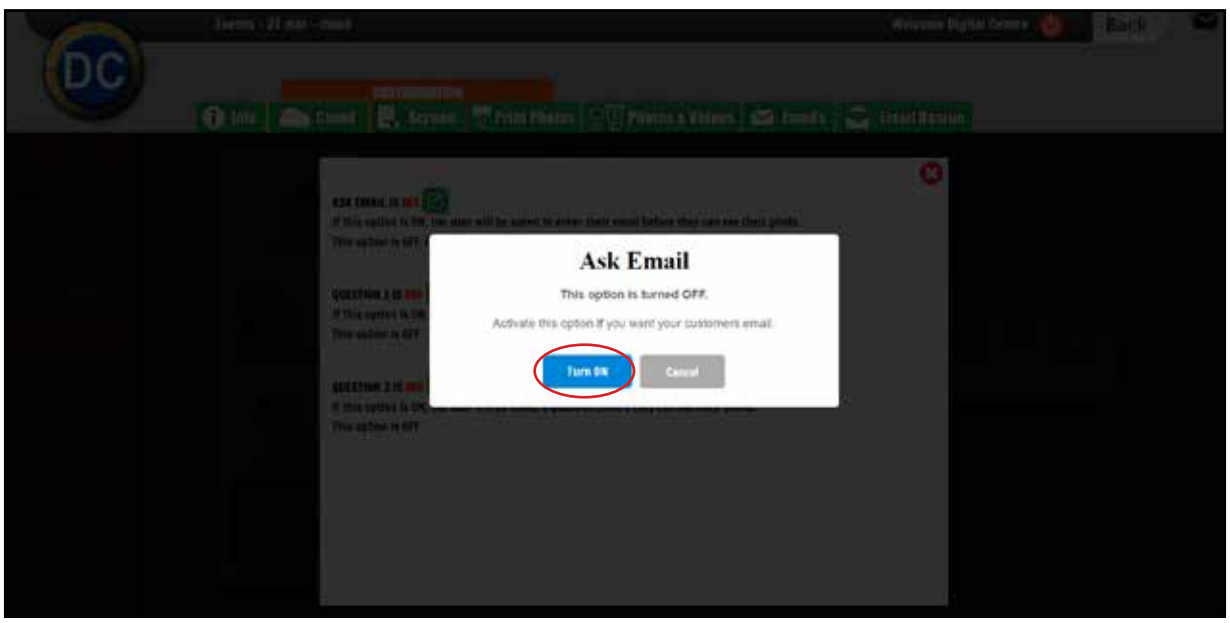
Questions

You can switch On a questionnarie section to ask patrons for their email address and their opinion.
If the section is On, patrons will answer your questions before they can see their photo.



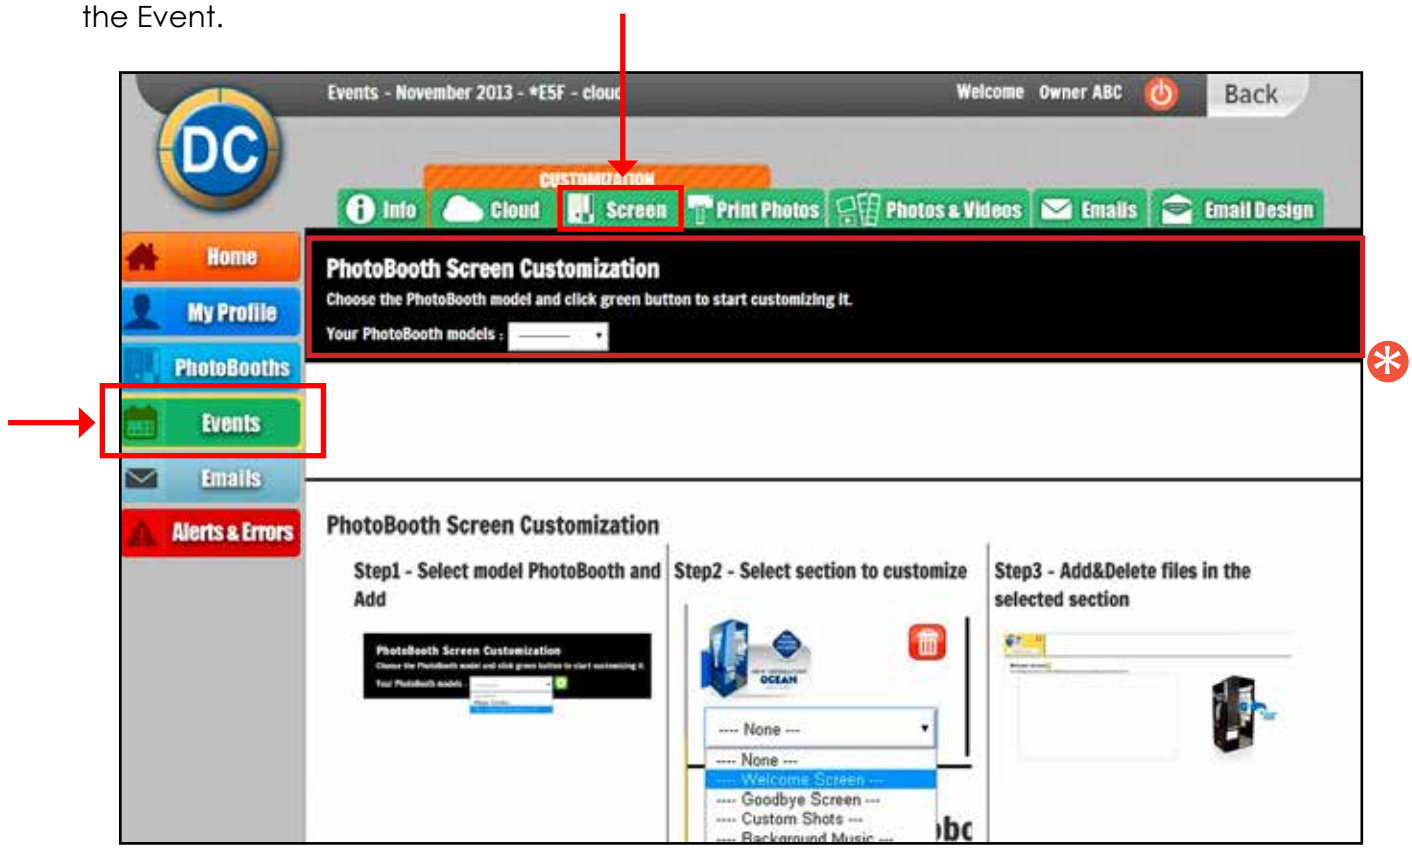
Click on each edit button to edit each option.

Turn on this option to request an email address or a question.



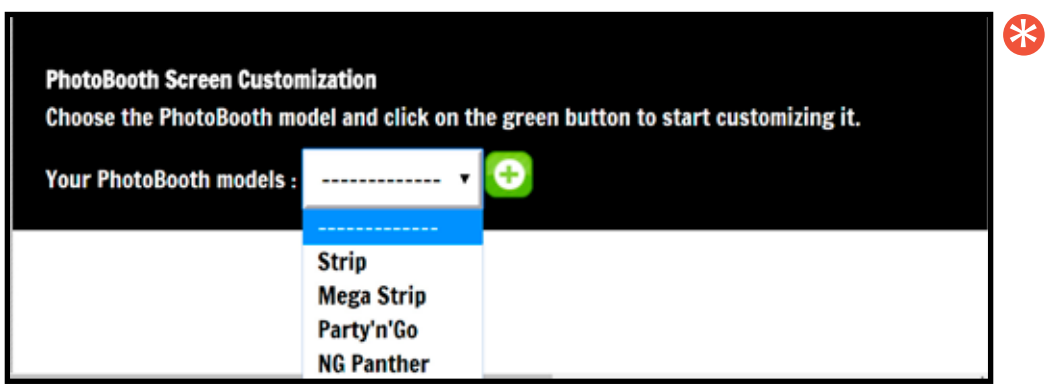
9.5.3 Events - screen

It allows to Customize what Patrons see on the PhotoBooth Screens at the location or during the Event.



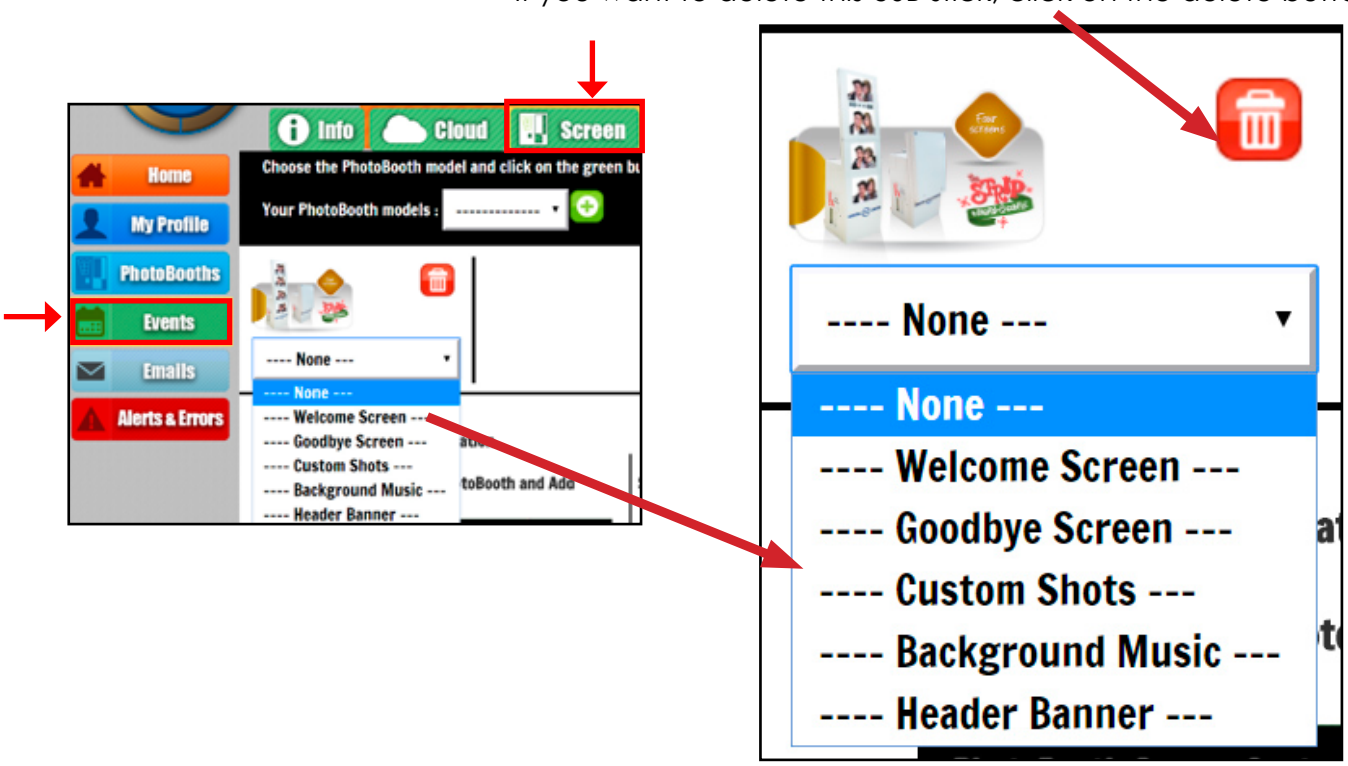
On the bottom half of this screen (image above) are the steps to follow to customize the PhotoBooth(s) for the event.

To customize the PhotoBooth, choose the PhotoBooth and click on the "add" button to start.

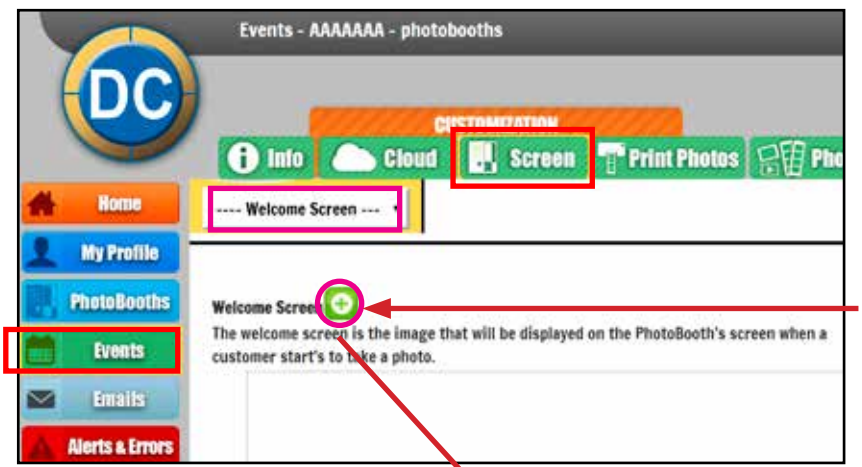


The second step will be to select the section you want to customize. The options are:
- Welcome screen
- Goodbye screen
- Custom Shots
- Background Music
- Header Banner (this one is only on the Strip PhotoBooth)

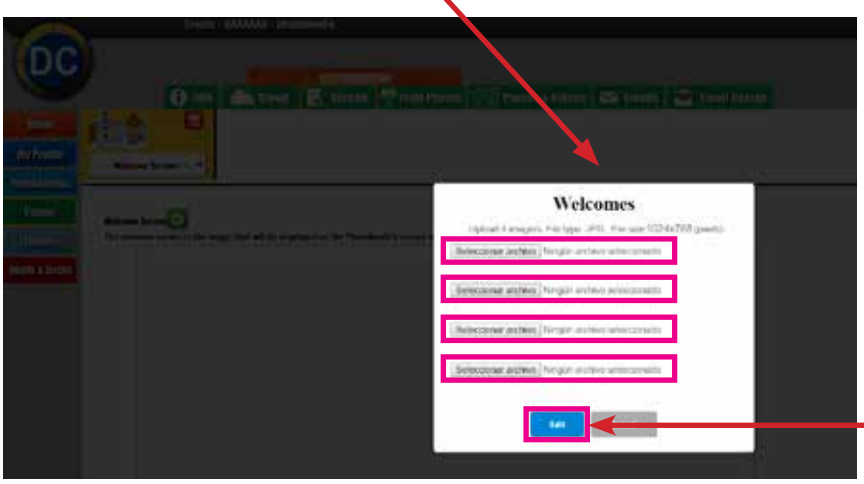
If you want to delete this USB stick, click on the delete button.



Welcome Screen: on the Strip PhotoBooth there will be 4 images. All other PhotoBooths only one image. This image will appear when a patron begins to take a photo.



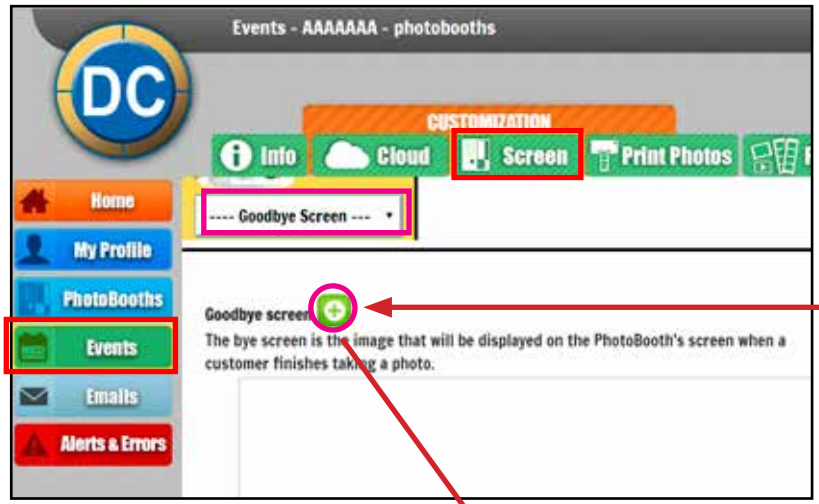
Click on the "add" button.



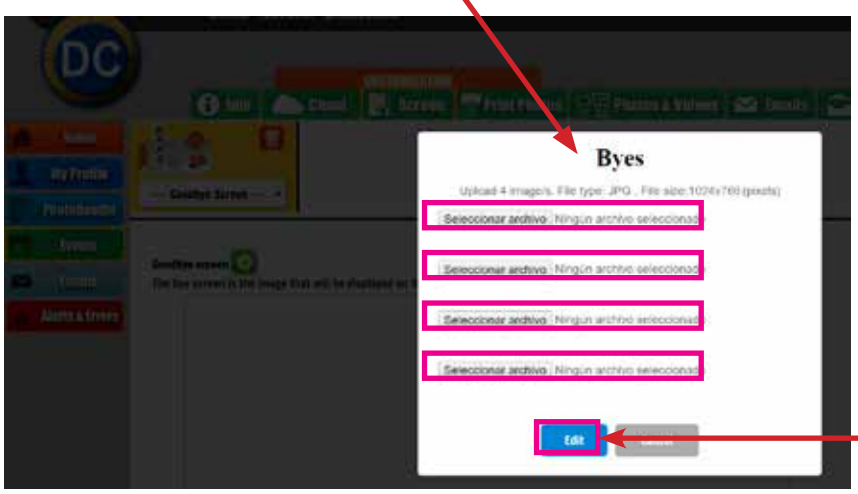
Strip PhotoBooth: In this case, as the Photobooth has four screens, we will have to upload four images. When we have a Photobooth with a single screen, for example a NG Panther, you should only upload a Welcome image.

Upload the images you choose and click on EDIT.

Bye Screen: on the Strip PhotoBooth there will be 4 images, for all other PhotoBooths only one image. This image will appear when a patron finishes taking a photo.



Click on the "add" button.

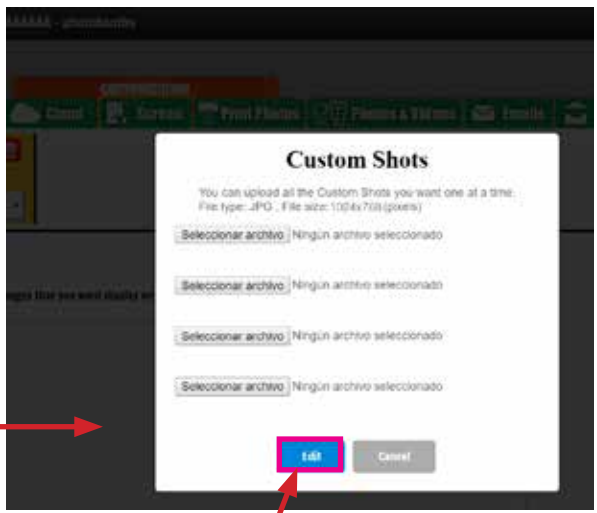


Strip PhotoBooth: In this case, as the Photobooth has four screens, we will have to upload four images. When we have a Photobooth with a single screen, for example a NG Panther, you should only upload a Goodbye image.

Upload the images you choose and click on EDIT.

Custom Shots: these are the images that appear on the screens during the event.
An example could be for a wedding were the bride wants to show pictures from when the couple first met, or a company event where they want to display brand names or products.

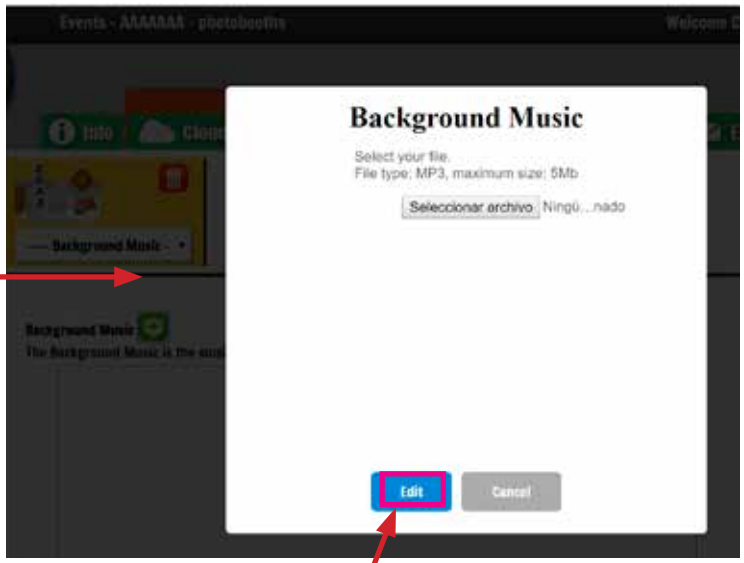
Click on the "add" button.



Upload the images you choose and click on EDIT.

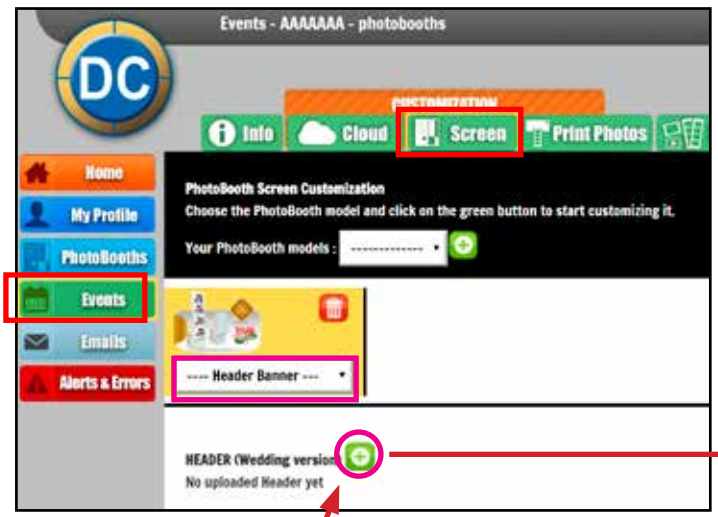
Background Music: is the music that will be play during an event.

Click on the "add" button.

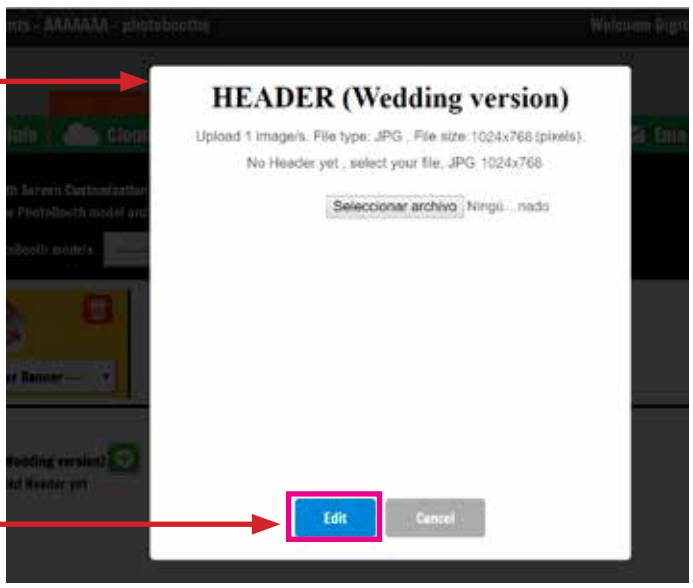


Upload the images you choose and click on EDIT.

Header Banner: is the image that appears on the top screen (1st screen) during the game. (available on the Strip PhotoBooth only)



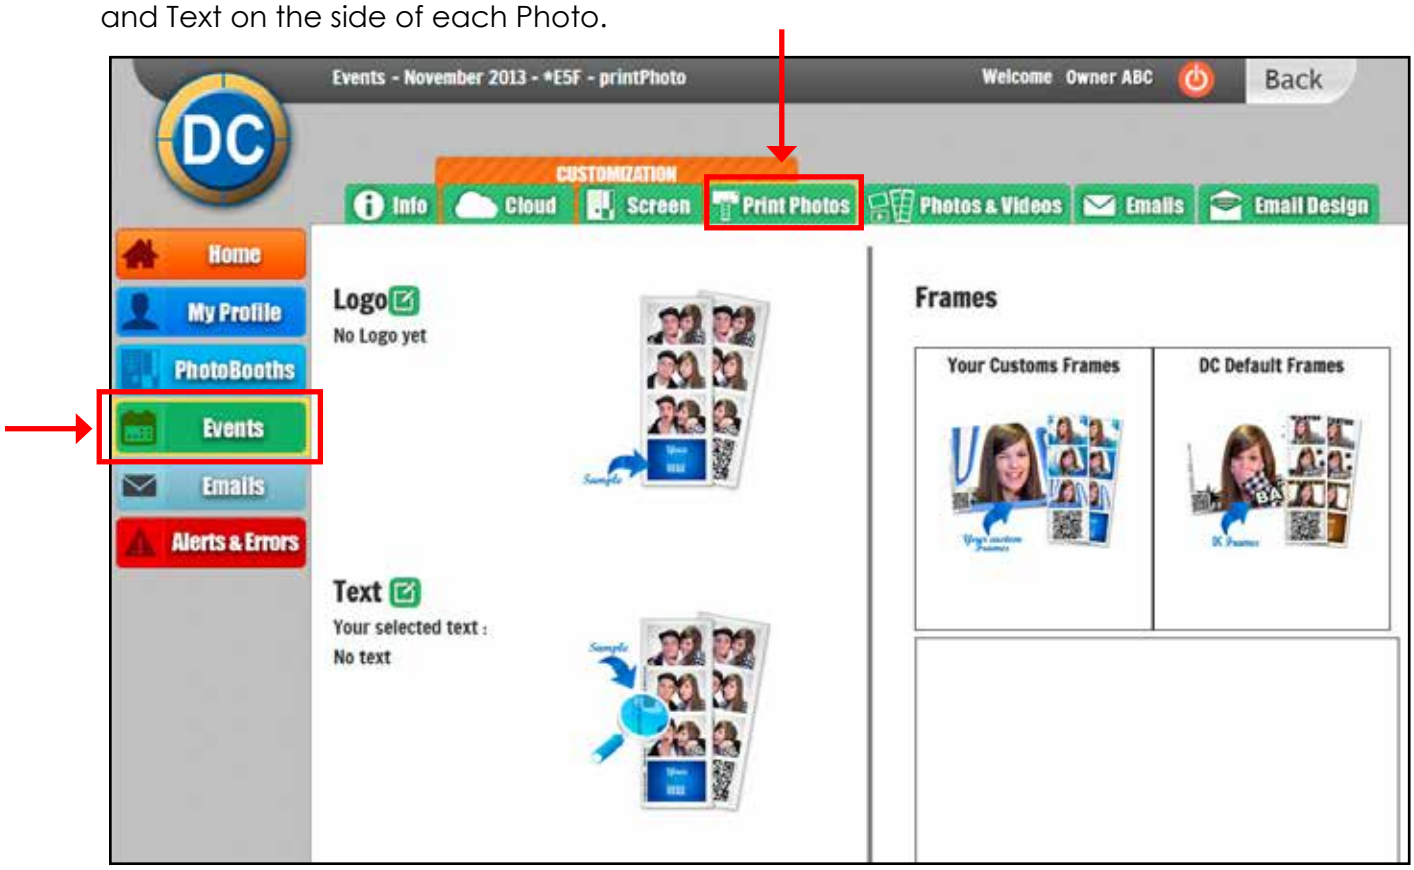
Click on the "add" button.



Upload the images you choose and click on EDIT.

9.5.4 Events - Print photos

It allows to Customize Patrons printed Photos with LOGOS, FRAMES and Text on the side of each Photo.



There are three customization options:

- *The Logo:* the logo will be print on the 4th photo of each strip. Click on the "edit" button to upload your logo.

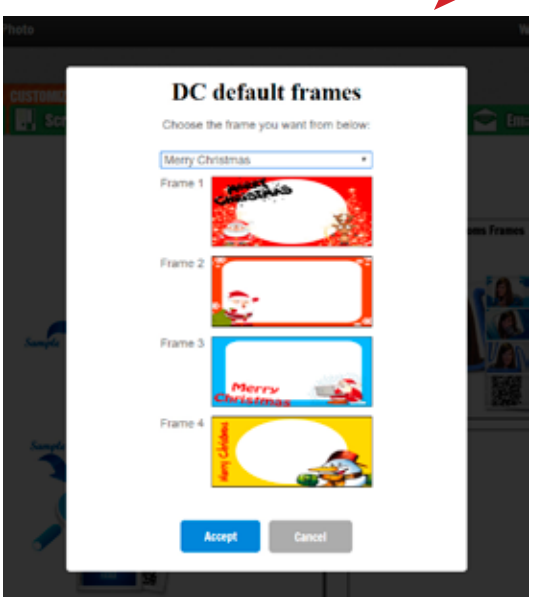
- *The Text:* this text will be print on the side of the photo. Click on the "edit" button to type the text you want to appear on each photo.

- *Frames:* you can use your own frames and/or designs as well as the DC default custom frames.

Click on "Your Custom Frames" if you choose to use your own frames. Upload the frames and click on SAVE.

Click on "DC Default Frames" if you choose to use DC Seasonal Suggested Frames.

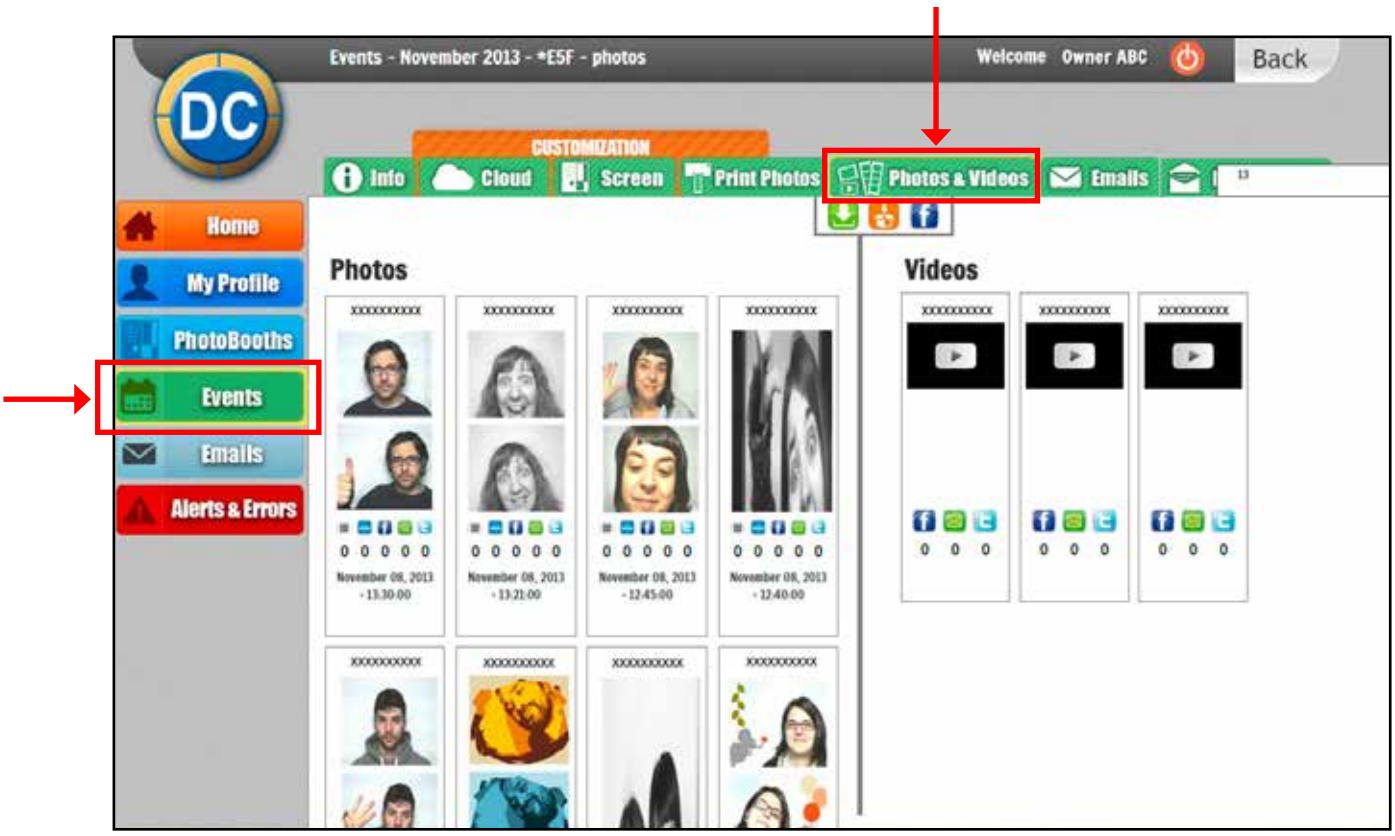
Choose the topic to see the frame designs.



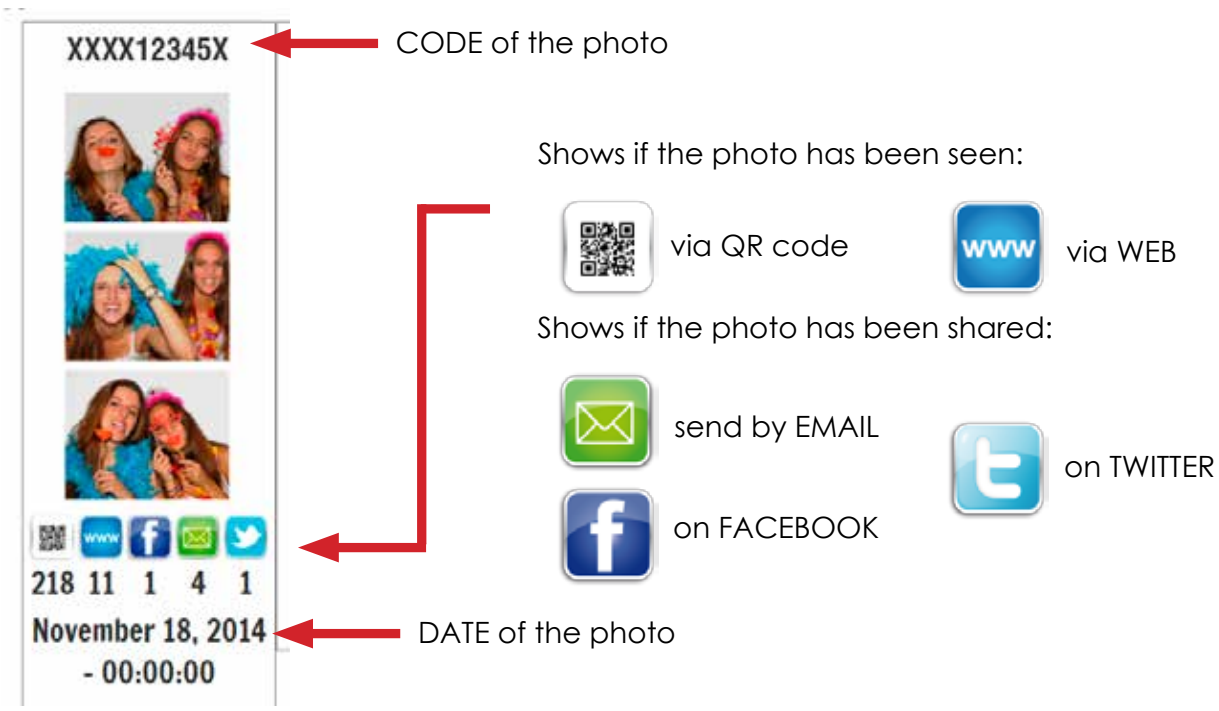
Once you choose the frames click save to add them to the Customization.

9.5.5 Events - photos & videos

This is where all of the photos and videos are stored from an event. Here you will know if the photo has been shared, which is the code, the date, etc...



This is where all of the photos and videos are stored from an event. Here you will know if the photo has been shared, what the code is, the date, etc...

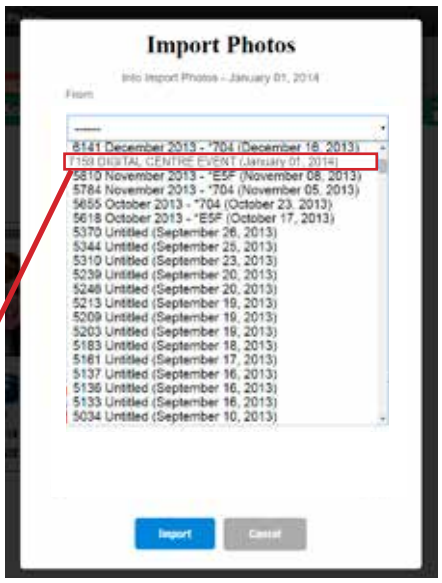


This section offers different photo options:

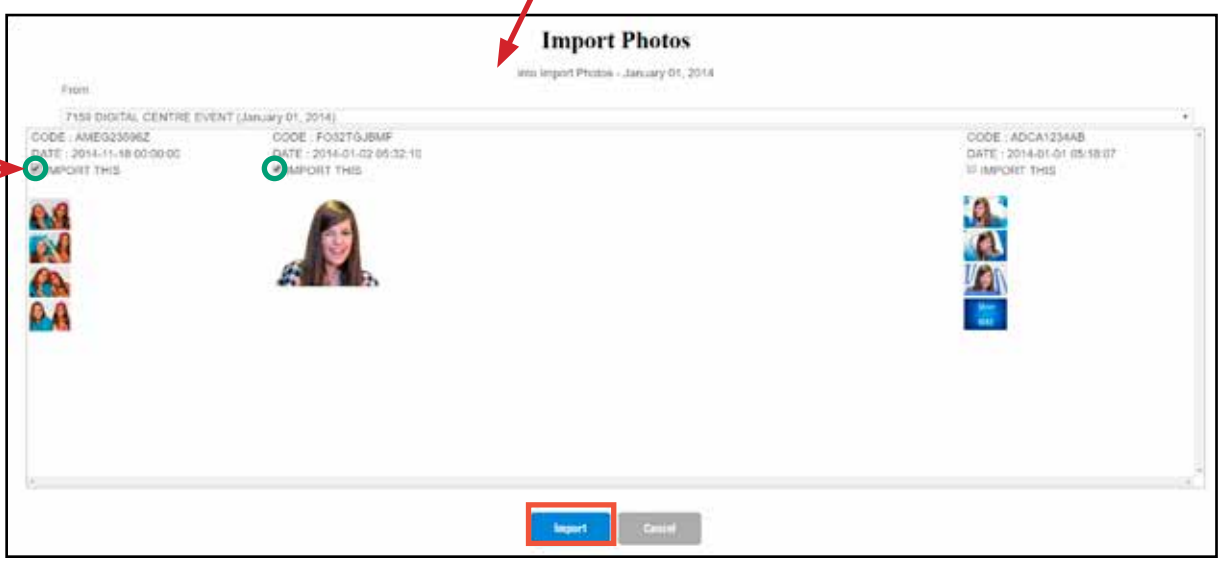
Download all photos & videos of the event (a zip file with all the photos and videos will be downloaded to your computer).

Share ALL Photos and Videos together to a specific Facebook account

Import photos of other events into this event.

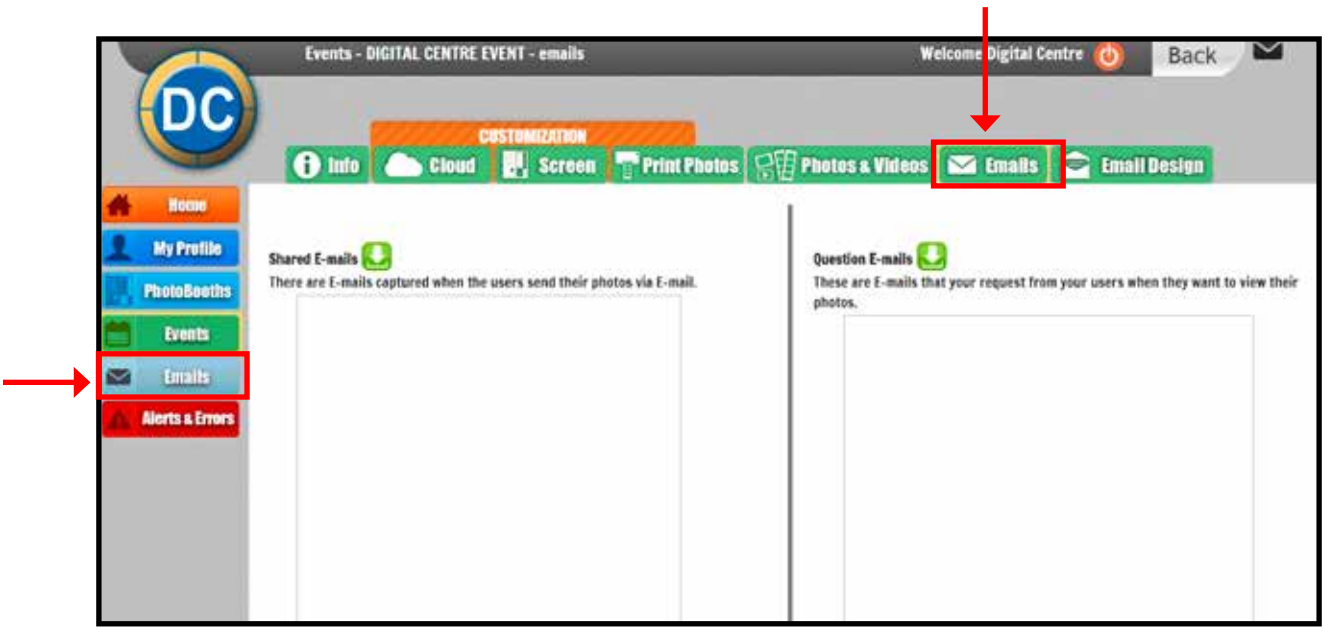


Select the photos you want to import and then click on IMPORT.



9.5.6 Events - emails

It allows to see and download Patrons email addresses.



Here is two lists of email addresses:

- Shared E-mails: email addresses captured when the user share their photo by E-mail.

- Question E-mails: these are the emails that you request (in the questionnarie module) from users when they want to see their photo.

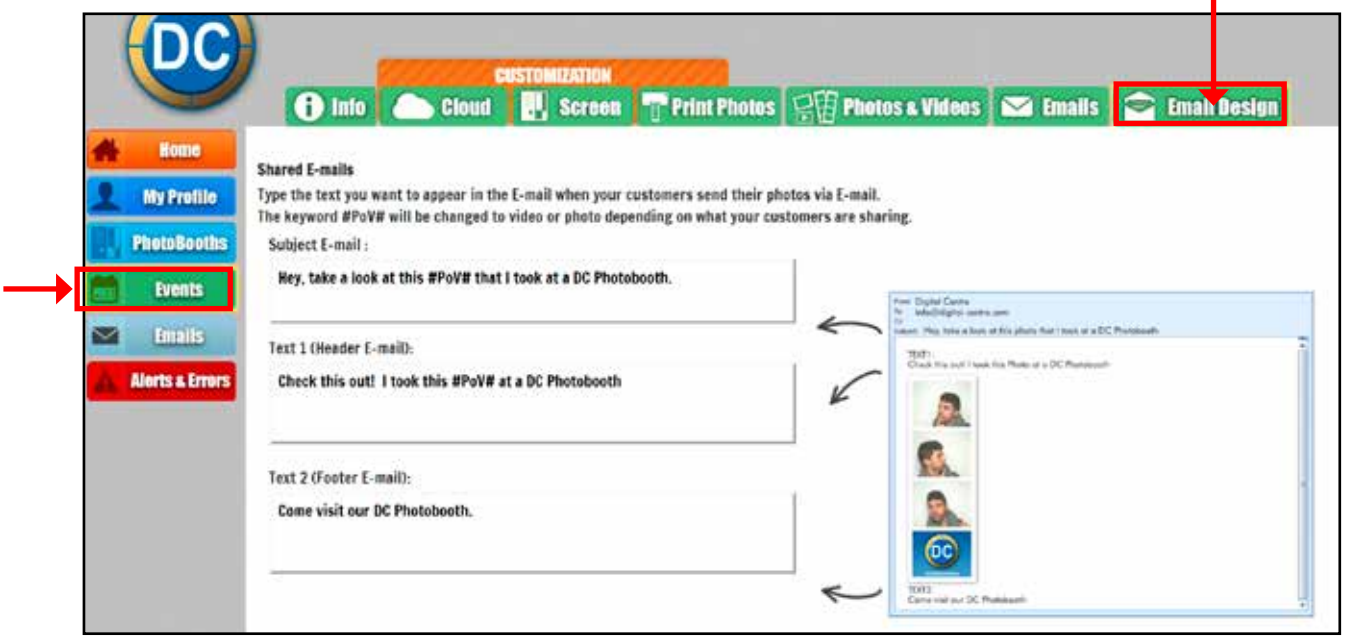
By clicking on the download button of each list, an excel file with all of the email addresses will be downloaded.

CoinOp Operators:
The emails from your clients can be used for marketing purposes. Such as "Thanks for visiting", "We look forward to seeing you again soon!", or to offer a discount, just for showing the photo strip on their next visit. The marketing possibilities are endless!

Rental Operators:
You can use all emails to offer a discount for future events, a great sales tool.

9.5.7 Events - email design

It allows to customize patron's E- Mails when they share their photos through an E-Mail.



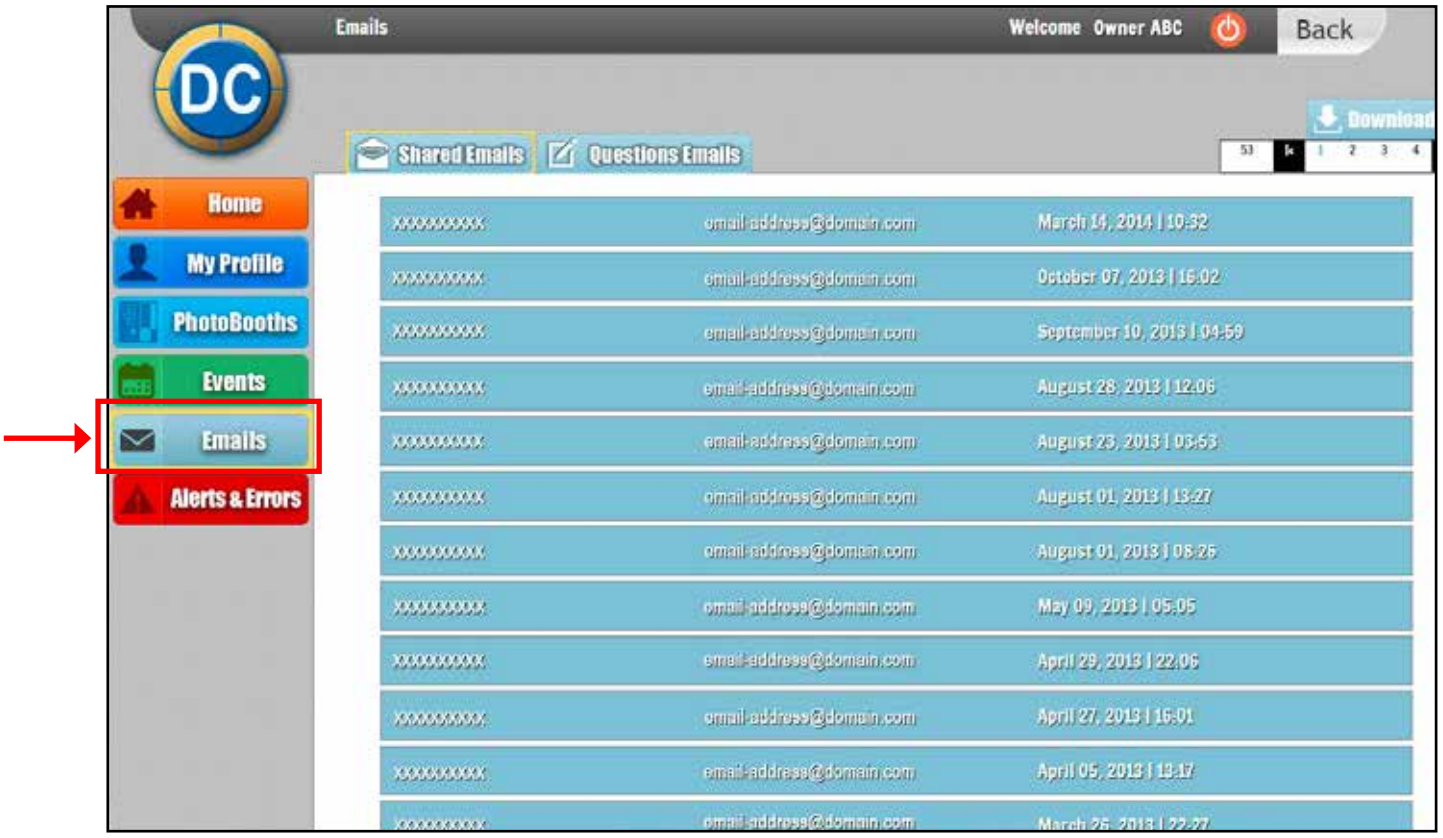
When a customer shares their photo using the email button, the photo will be sent to an email, that you can customize.

In this section there is a template of the email. Fill in the fields with the text you want. For example, you can promote your company by inserting a link to your company's website.

The customers can share their photos and videos, for this reason it's important to use the keyword #PoV#. This keyword will be changed for the word photo or video depending on what the customers are sharing.

⚠ **WARNING:** It's important that the keyword be #PoV#, you should use the pound-sign "#"; without the pound-sign, the word will not change.

9.6 MYPHOTOCODE.COM - EMAILS



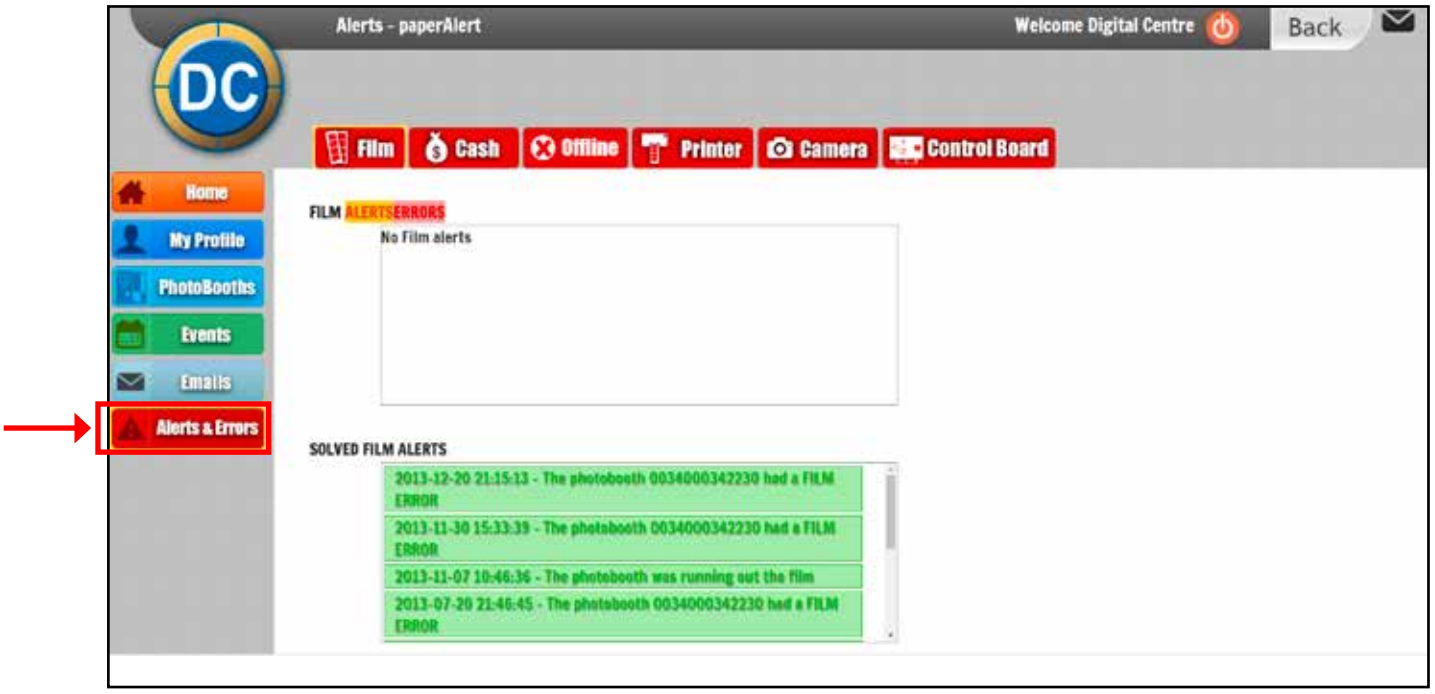
All captured emails are in this section, they are not separated by event however, listed together. The emails are only separated for shared emails and question emails.

On each line the code for the photo is displayed. Also the email captured and the date when the photo was sent by email.

On the top right corner of the screen is the download button.

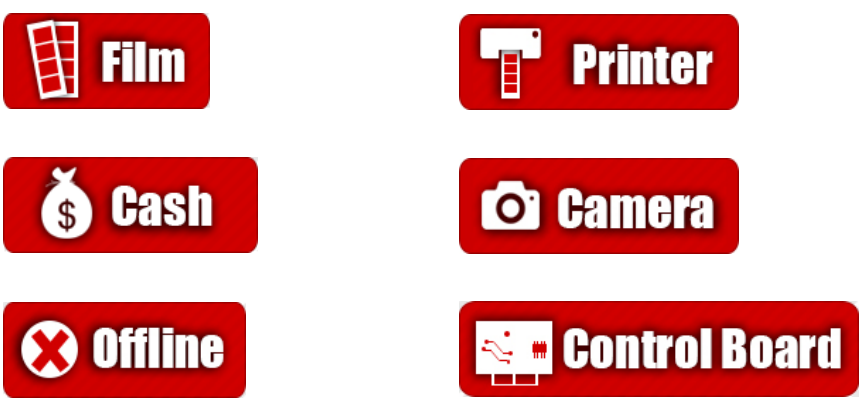
By clicking on this button an excel file with all the email addresses will be downloaded.

9.7 MYPHOTOCODE.COM - ALERTS & ERRORS



In this section you will be able to see at a glance if a PhotoBooth has an alert or error only if you have turned on the alerts for each PhotoBooth. -- ***Section 4.2***
For example if the PhotoBooth is running out of film, you will receive an email and in addition you will be able to see when the alert has been solved. Once solved it will appear in the solved alerts list.

The alerts and errors are separated by type:



9.8 MYPHOTOCODE.COM - WARNING

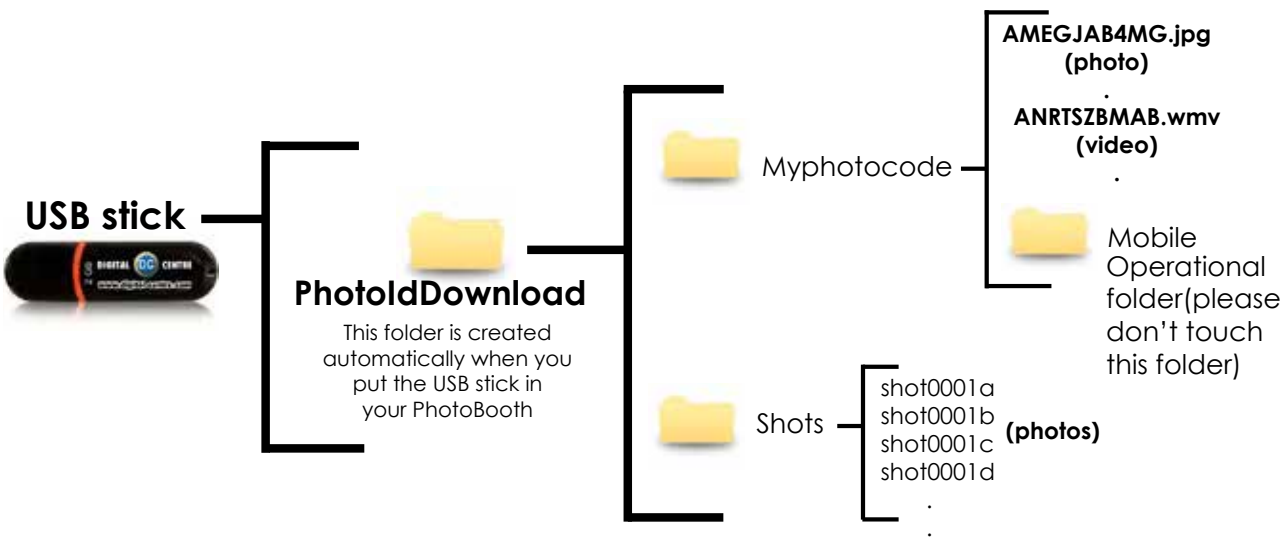
WARNING!

Remember, to get the photos, by MyPhotoCode.com, the PhotoBooth must be connected to Internet.

If there isn't connection to Internet, you can save the photos in a empty USB memory in the computer.

When the USB is detected by the computer, it will be create automatically a New Folder called PhotoIdDownload.
Inside the PhotoIdDownload folder you will find 2 folders more, the first one called "MyPhotoCode" with your images and videos inside (just in case that you have recorded a video) and the second one called "Shots" with the individual shots.

Once the event finishes, you can take off the USB memory from de computer and use it in any other computer to see your images or videos.



If the logo is activated, you will have 3 shots for each print, with the loaded logo printing in the fourth frame.

10-UPLOADING custom usb stick to photobooth

1-Switch ON the PhotoBooth

2-Open the Photo slot door*
*** You will need 1314 keys (included on your PhotoBooth)**

3-Insert the USB Stick to the PC (HP C2D) (the usb connection is on the left side of the PC)

4-Open the back door of your photobooth.

5-Press the yellow button from the Service Control Panel, to access the Setup Menu.

6-Go to Setup customize and select **LOAD**

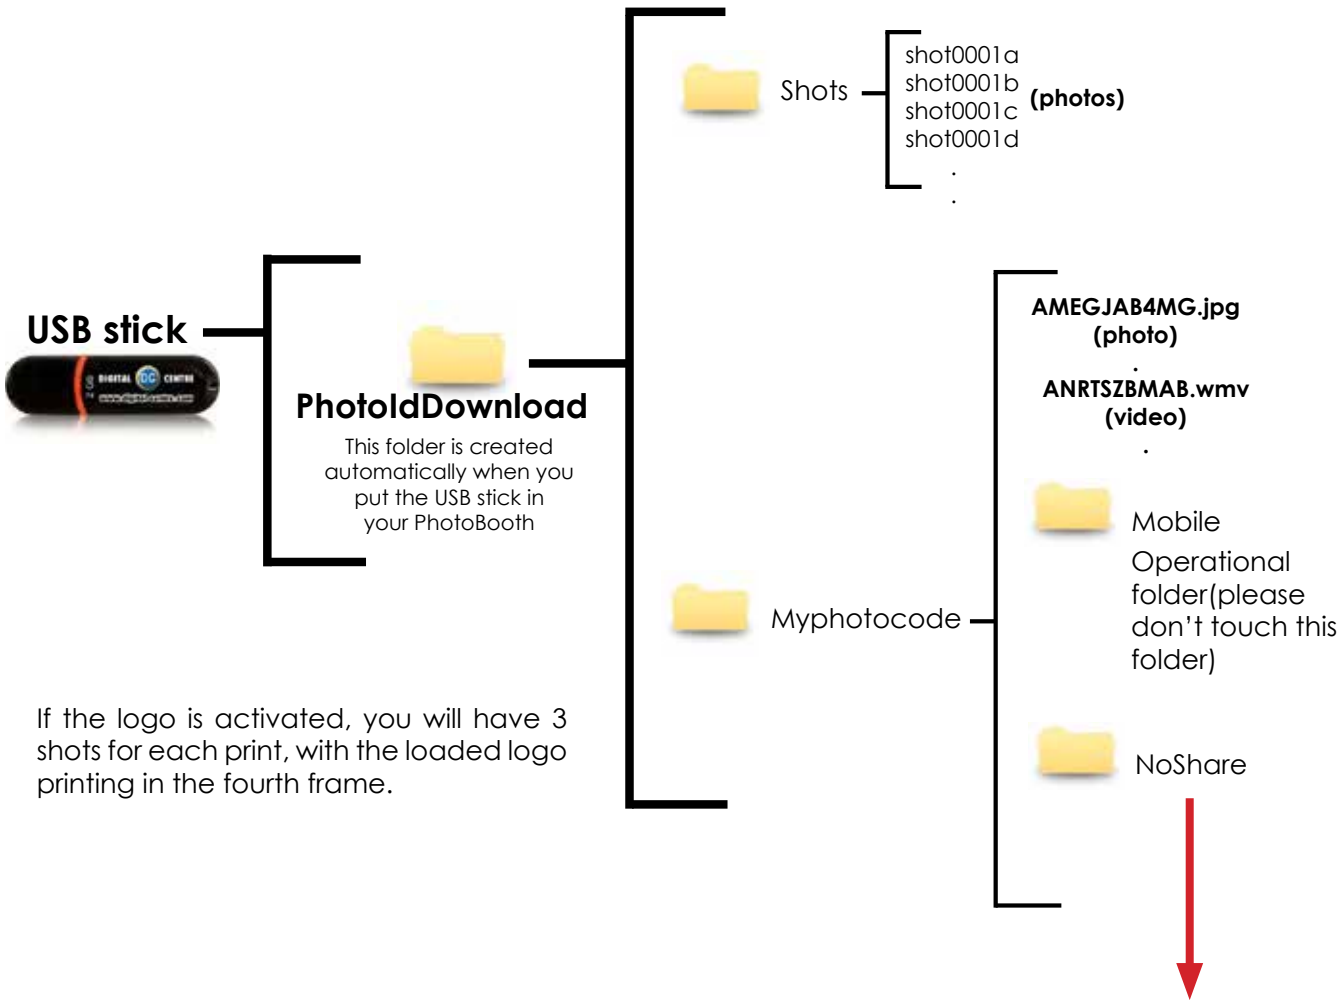
Check logo and text: You can check the logo and text that will appear in the photos. This screen disappears after a few seconds.

SERVICE CONTROL PANEL

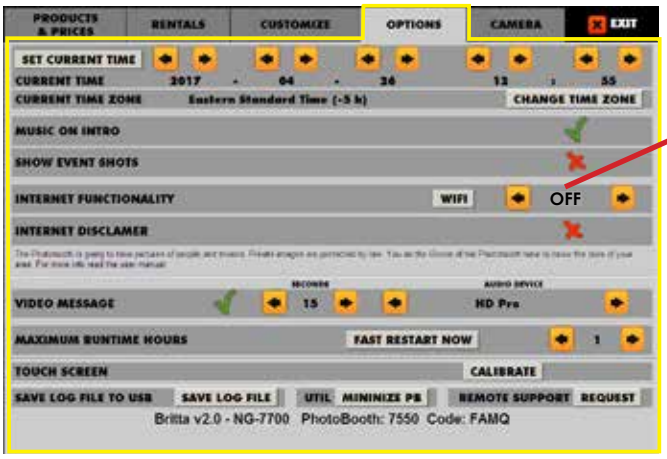
11-DOWNLOADING

C FOLDER PhotoIDownload

This folder is created automatically



If the logo is activated, you will have 3 shots for each print, with the loaded logo printing in the fourth frame.



In the folder called NoShare saved the photos not to share in the cloud. If "Internet funcionality" is in OFF mode, photos taken will be saved in this folder.

If you have the option "Internet Disclamer" and the user decides "Print Only" the picture, this photo will also be saved in the folder NoShare.

These photos are saved in this folder but not up to the cloud, will not be able to be shared.

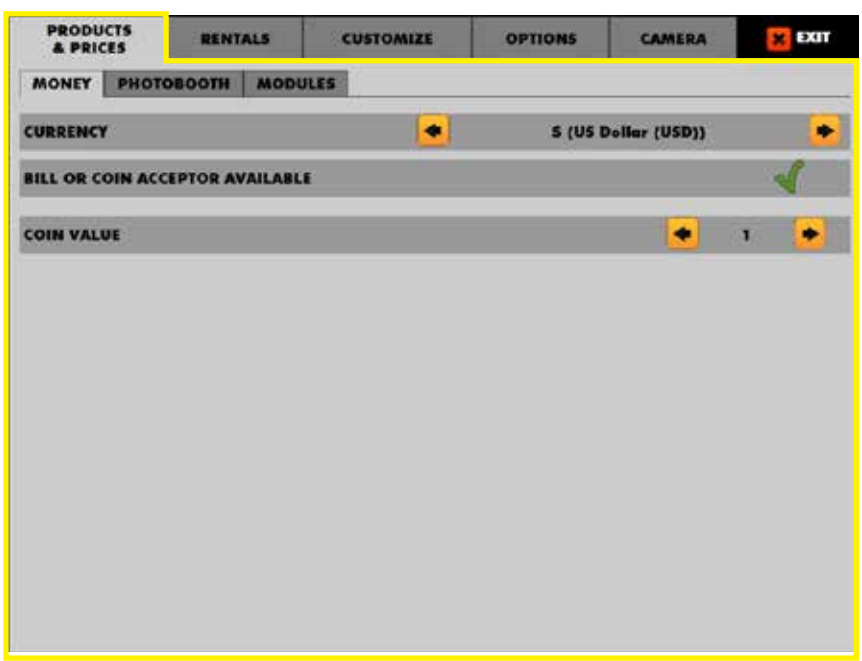
12-SETUP MENU

The setup menu is very useful for the owner of the PhotoBooth. You can configure the Photo Booth depending on what kind of service you want to offer to your clients. You can control the timer, check the prices, adjust the camera settings or consult the accounting functions. To go to the setup menu while the PhotoBooth is in Demo Mode, press the yellow button (Menu) from the Service Control panel inside the PhotoBooth.

SERVICE CONTROL PANEL

1. VOLUME Control level (Blue Button)
2. MENU (Yellow Button): It enters setup Menu and allows options such as pricing, logos, camera adjustments, and features to be changed.
3. ACCOUNTING (Black Button): It prints detailed vending report including number of prints available.
4. CREDIT (Red Button): Enable the option to play free games, valued at a price less than the value stipulated in the Set up menu (See section Products & Prices)5.
5.COIN COUNTER: It counts the coins inserted.

· SETUP MENU SCREENSHOOTS



SETUP MENU CONFIGURATION

The configurable parameters are divided in 5 groups:

- Products & Prices
- Rentals
- Customize
- Options
- Camera

If for any reason you had to change the white decal or your decal is old, click SAVE and you will have a snapshot of the background of your photobooth, thus the pictures of hats and hairstyles was not 2 different colors of background.

13-INTERNET

13.1 WHY CONNECT THE PHOTOBOOTH TO THE INTERNET?

By having the PhotoBooth connected to the Internet, you are able to get the most out of the PhotoBooth; alerts, audits, additional products for your clients...

All the photos taken will be uploaded to the Cloud, and your clients will be able to share them via social networks and/or email. You will also have access to statistics regarding your PhotoBooth. This feature will let you know if it is working, if it's online, if there is any type of issue, and if you are running low on film.

If the PhotoBooth has the credit/debit card payment option, the PhotoBooth needs to be connected to Internet. (Only USA and CANADA)

⚠ **WARNING:** Please use DC's autorized components. DC's PhotoBooths are manufactured to operate with specific hardware only. Any alterations will void the warranty.

13.2 INTERNET CONNECTION STATUS AT A GLANCE

The PhotoBooth screen displays an icon and a text giving the information you need.

1. Displays the film stock

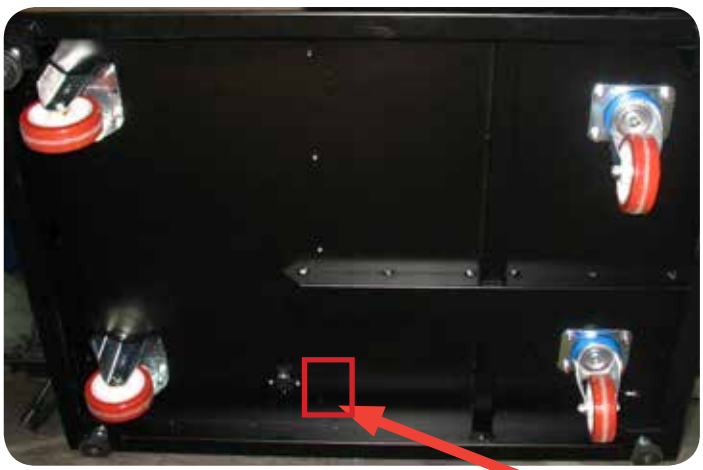
2. Displays the photos that haven't been uploaded to the Cloud, if X=0 it means that there are no photos waiting to upload to the Cloud.

I : x	"x" Internet Functionality is OFF means that your photos are not uploading to the cloud.
I : 0 (green)	"0" means that there are no photos to be uploaded, your photos are already uploaded to the Cloud.
I : 1 (green)	"1" In green means that the connection to the Internet and to the server is good and the photo is being uploaded.
I : 1 (red)	"1" In red means that 1 photo is still pending to be uploaded to the Cloud (waiting for the server connection).

3. Shows if the PhotoBooth is working with the USB stick (USB) or not (HDD).

13.3 CONNECTING VIA ETHERNET CABLE

13.3.1 CONNECTING TO A DC PHOTOBOOTH



Internet connection

- Check the distance between the internet connection and the position of your photobooth in the room.
- Ensure you have a Land Cable (RJ45 ethernet cable) that is long enough.

P.9 Land Cable
(RJ45 ethernet cable) (internet)
(not included)

⚠ **WARNING:**
- The cable just can only be plugged into one position.

⚠ **WARNING:** Please turn OFF and unplug the PhotoBooth before doing this process to avoid any injury

P.9 Ethernet cable (RJ45)

13.4 CONNECTING VIA Wi-Fi

The PhotoBooth needs a Wi-Fi adapter to be able to access to any Wi-Fi network.
The Wi-Fi adapter has to be the TRENDNET TEW-648 UB.
Other Wi-Fi adapters will not work and will cause malfunctioning.

13.4.1 CONNECTING TO A DC PHOTOBOOTH 1

To connect your PhotoBooth to Internet via Wi-Fi you should connect the USB Wi-Fi adapter to one of the USB slots in front panel of the computer or on your photobooth

You will need a Wi-Fi Adapter. The Approved one is the Mini Wireless "N" USB Adapter.

Mini Wireless "N" USB Adapter

⚠ **WARNING:** use TRENDNET N150 TEW-648UB only. DC's PhotoBooths are manufactured to operate with specific hardware only. Any alterations will void the warranty.

13.4.2 CONNECTING TO A DC PHOTOBOOTH 2

1- Turn OFF the PhotoBooth and unplug the power cord.

2- The PhotoBooths has a USB slot at the top right of the chassis. Plug the USB Wi-Fi adapter in this slot.

Mini Wireless "N" USB Adapter.

The Mini Wireless USB Adapter can also be connected to any USB slot from the PC (for other PhotoBooth versions)

⚠ **WARNING:** use TRENDNET N150 TEW-648UB only. DC's PhotoBooths are manufactured to operate with specific hardware only. Any alterations will void the warranty.

⚠ **WARNING:** Please turn OFF and unplug the PhotoBooth before doing this process to avoid any injury

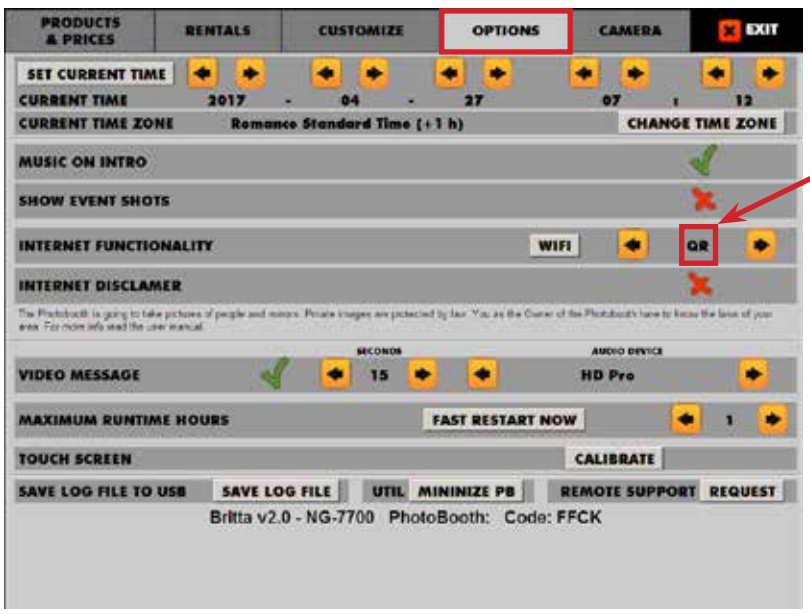
13.5 SETTING UP THE Wi-Fi NETWORK TO ACCESS THE INTERNET

After connecting the Wi-Fi adapter, you need to link the PhotoBooth to a network to access the Internet. Follow the steps below.

1- Turn "ON" the PhotoBooth.

2- Open the back door and press the yellow button from the Control Panel, to access the menu.

3- In order to upload the photos/videos to the Cloud, we need to turn ON the "Internet Functionality" from the settings menu. Go to OPTIONS and choose the correct option from the "Internet Functionality" menu. If the "Internet Functionality" is OFF the photos will not be uploaded to the Cloud.



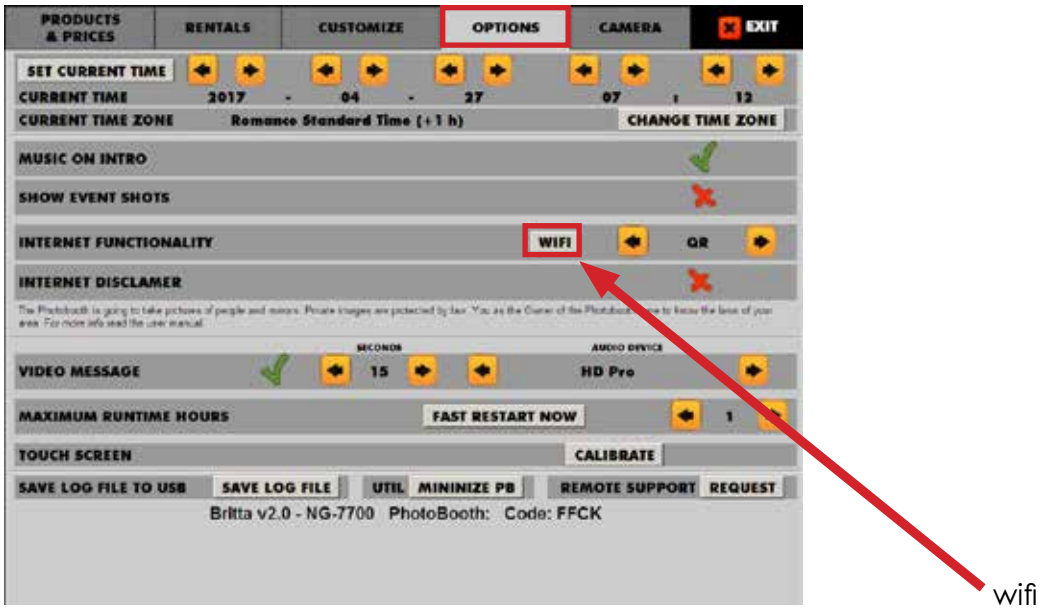
QR ---------- ✓
(a qr and a code will be printed on the photo)

CODE ONLY -------- ✓
(only a code will be printed on the photo)

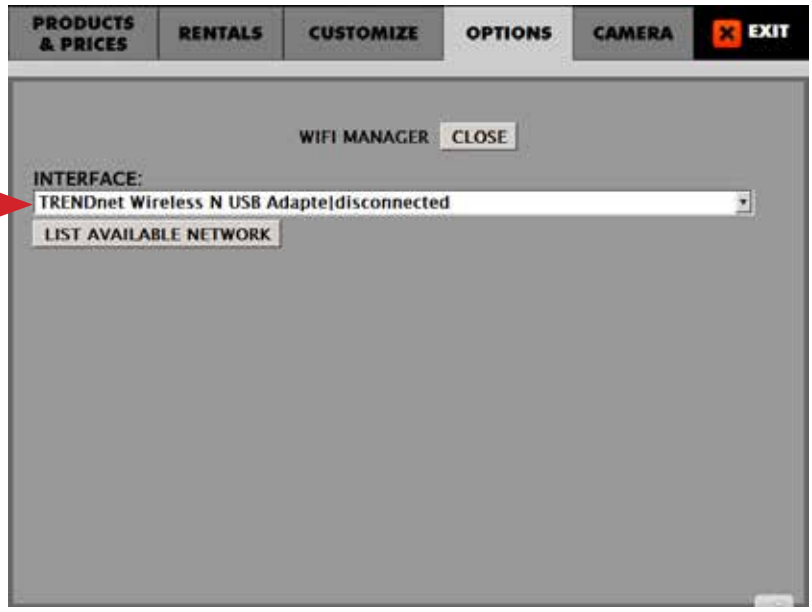
UPLOAD ONLY ----- ✓
(the photo will not have any qr or code, the client will not have access to it)

OFF ---------- ✗

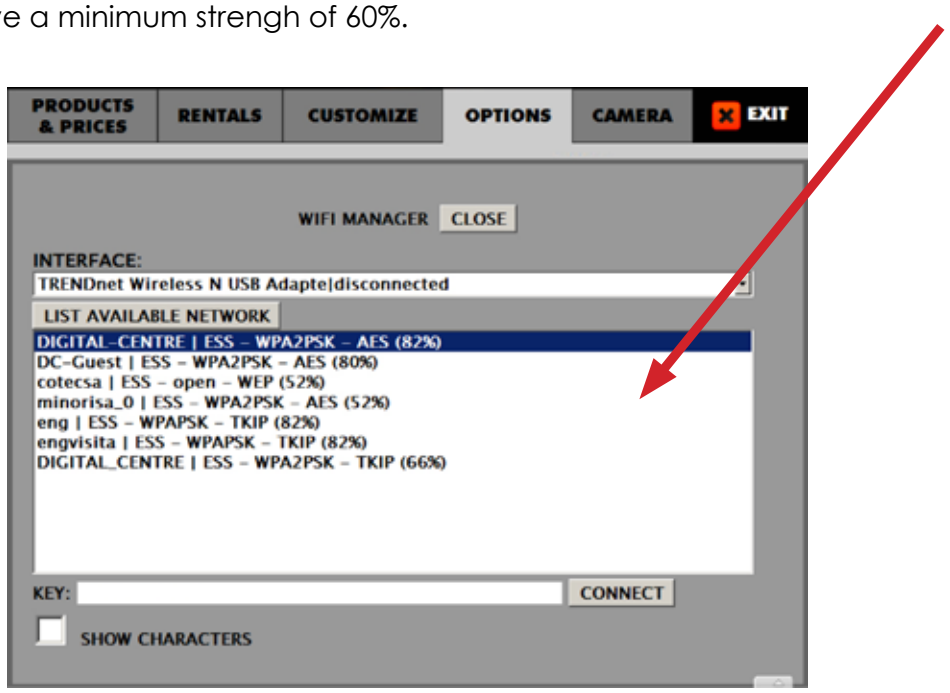
4- Once selected the correct “Internet Functionality”, touch on the Wi-Fi button.



5- Touch the “List Available Network” button.

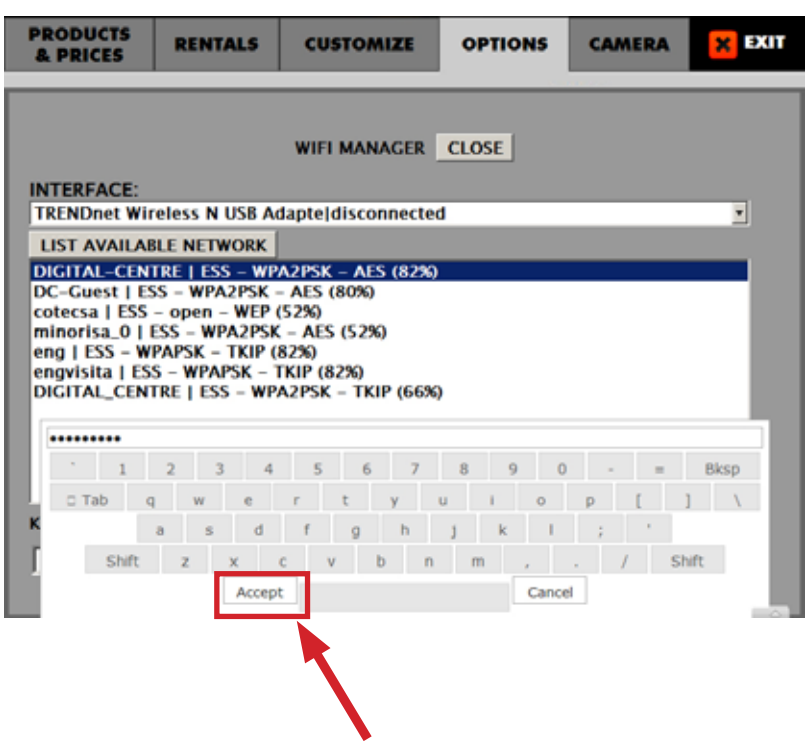


6- A list of available networks appears, select the network you want to connect to.
It should have a minimum strengh of 60%.

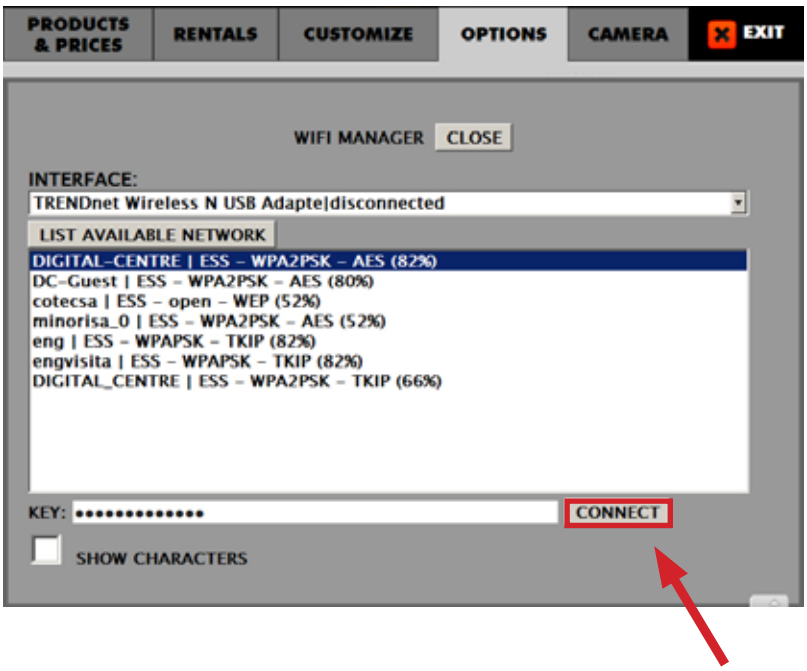


Warning: any signal under 60% will not assure a solid connection

7- Enter the network pasword. Upon touch, a keyboard appears on the screen. Type the password and touch ACCEPT.
If the network does not have any pasword leave it blank and touch ACCEPT.

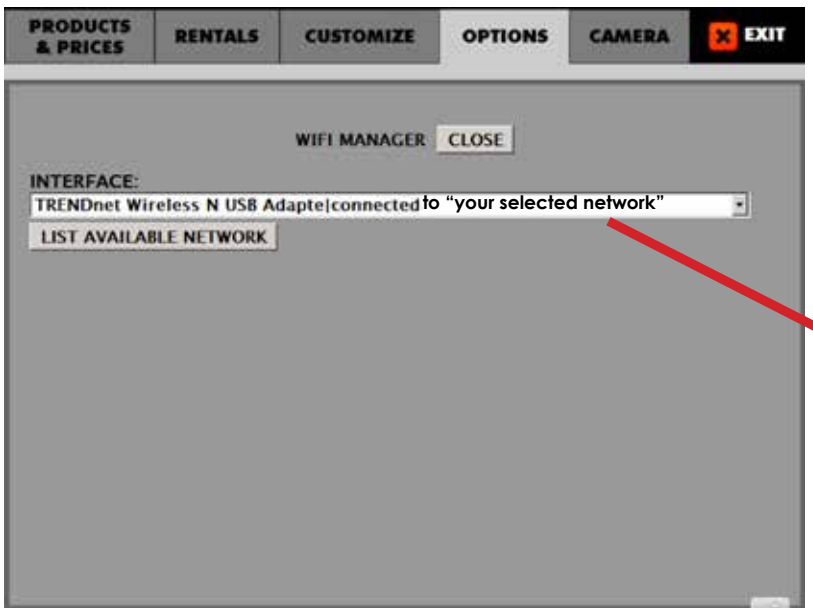


8- Touch CONNECT.

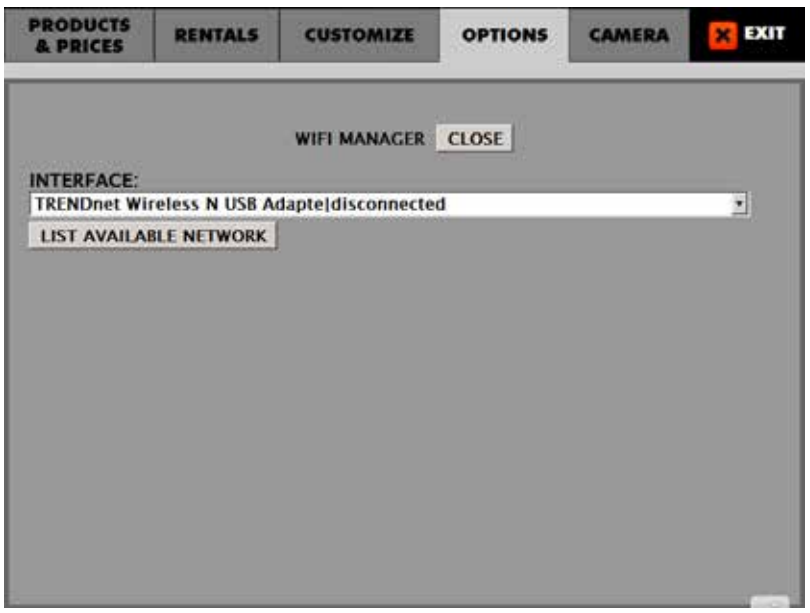


9- You will see this window appear for a few seconds.

10- Your interface info text will change to "**connected to**" your selected network, then EXIT setup menu by touching EXIT.



* If the screen shows "disconnected" means that the PhotoBooth failed to connect to that network.



⚠ **WARNING:** use TRENDNET N150 TEW-648UB only. DC's PhotoBooths are manufactured to operate with specific hardware only. Any alterations will void the warranty.

This could be for to 3 main reasons:

1. Wrong password; retype the password and try to connect again.

2. The USB Wi-Fi Adapter may not be connected correctly, check that the blue LED on the USB Wi-Fi adapter is blinking, if it isn't blinking unplug it and plug it again.

Blue LED OFF ----------

Blue LED ON Solid ------

Blue LED ON Blinking ---

3. The Network is not accepting more connections. Please talk to the Network manager in that building.

After exiting the setup menu, the icon and the "I:0" should be green.

11- INTERNET "ON" when the icon Wi-Fi is green.
INTERNET "OFF" when the icon Wi-Fi is red.

INTERNET "ON"

INTERNET "OFF"

* If the icon is red your PhotoBooth will not be able to connect with the server and upload the photos.

This could be for different reasons:

1. The Networks needs some additional steps, as having to accept the legal conditions, register, pay per use,... That could happen with public Networks in comercial areas for example. Please use a different Network.

2. The Wi-Fi Network has no access to Internet. Please use a different Network.

3. The Network has some restriction, please talk to the Network manager (public Network) or provider (private Network).

4. The server does not allow any connection, because it's not available in this moment. It will be fixed in a few moments. If this problem persist please contact Digital Centre.

13.6 TESTING THE INTERNET CONNECTION

1- Take a photo.
2- Check the information shown on the bottom left corner of the screen.
To the right, the number are the quantity of photos pending to be uploaded.

I : x → "x" Internet Functionality is OFF means that your photos are not uploading to the cloud.

I : 0 (green) → "0" means that there are no photos to be uploaded, your photos are already uploaded to the Cloud.

I : 1 (green) → "1" In green means that the connection to the Internet and to the server is good and the photo is being uploaded.

I : 1 (red) → "1" In red means that 1 photo is still pending to be uploaded to the Cloud (waiting for the server connection).

3- Once your photo had been stored to the Cloud, (**I : 0**), scan the QR-photo with your Smartphone or go to MyPhotoCode and type the code next to the photo.

SCAN

MyPhotoCode.com

CODE

* If you don't have a QR code Reader or your QR code Reader is not able to read the QR code on the photo, we recommend to use the following:
  Android: QR Droid // **iOS:** Bidi

* If you are in MyPhotoCode.com and the photo is not shown, the code is wrong, retype the code and try to see your photo again.

4- Your photos should be instantly shown on your SmartPhone (scan) or PC (code).

13.7 TROUBLESHOOTING1

13.7.1 AUTOMATIC SOFTWARE RESTORING PROCESS

If your PhotoBooth is not working properly, please restore the whole PhotoBooth with the Boot DVD.

1- Open the DVD Driver.
2- Insert the "Boot DVD".
3- Unplug the PhotoBooth.
4- Plug in the PhotoBooth after 10 seconds.
5- Wait while the restore program reinstalls the software (a progress bar appears on the screen). The time process is about 20 minutes.
6- A black screen appears when the process finishes.
7- Extract the DVD disk.
8- Unplug the PhotoBooth.
9- Plug in the PhotoBooth after 10 seconds.
10- The PhotoBooth will install all components again. Please follow instructions on the screen.
11- Calibrate the Touch Screen.

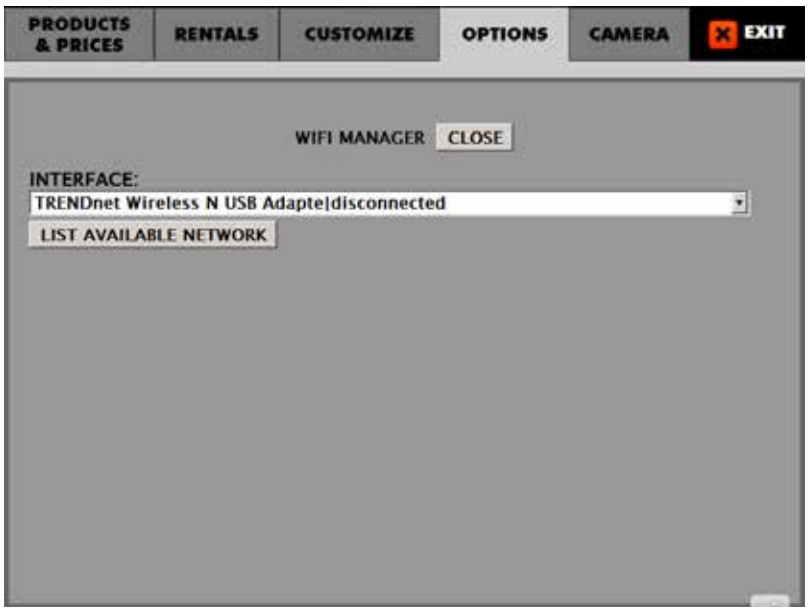
13.7.2 MANUALY SOFTWARE RESTORING PROCESS

If this process does not start automatically, insert the Boot DVD inside the DVD Driver. Follow the steps below:

1. Plug in a Keyboard to the PC.
2. Turn ON the PC (or the whole PhotoBooth).
3. When the HP screen appears, press "F9" several times, until the Boot Menu appears on the screen.
4. With the up/down keyboard arrows select the CD-ROM option and press ENTER.

13.7.3 NO AVAILABLE NETWORK ON THE LIST

Touch "List Available Network", If no network list is shown, it means that there is no available network close/near the PhotoBooth, contact your network provider. You can also try to connect your PhotoBooth to the Internet by using your SmartPhone as a hotspot.



13.7.4 THE PHOTOBOOTH IS NOT CONNECTED AFTER SELECTING AN AVAILABLE NETWORK

Check the Network signal; any signal under 60% will not assure a solid connection, contact your Network provider. This is not a software problem, it's a Network connectivity issue. To verify, use your Smartphone as Hotspot and attempt to connect the PhotoBooth to verify if the Wi-Fi connection is working properly.

13.7.5 SMARTPHONE AS A HOTSPOT, AN OPTION FOR TESTING YOUR WI-FI CONNECTION

Sometimes with a correct setup and configuration of your Wi-Fi/Internet, a problem may occur.

It can be produced, due to the network configuration at the facilities, network access, proxies, or other issues, not related to the PhotoBooth.

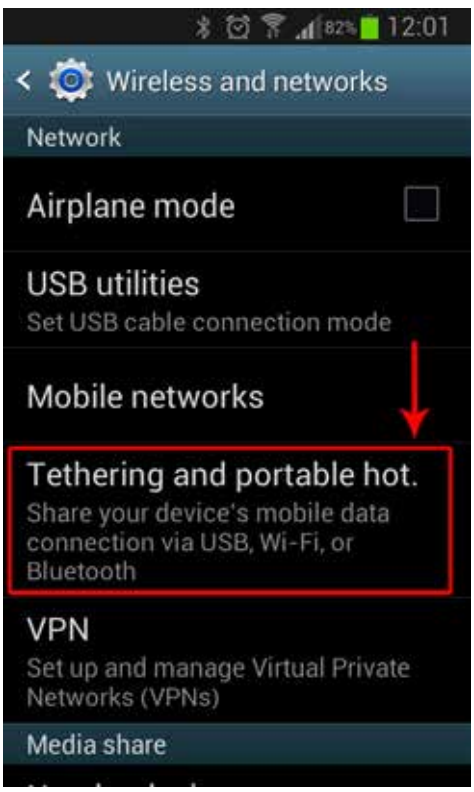
In that case, check it by using a Smartphone Hotspot.

Most of Smartphones can be used as a Hotspot. A Hotspot is a process for tethering the data from a Smartphone to other devices via Wi-Fi. Tethering allows the Internet connection to be shared from the phone with other devices.

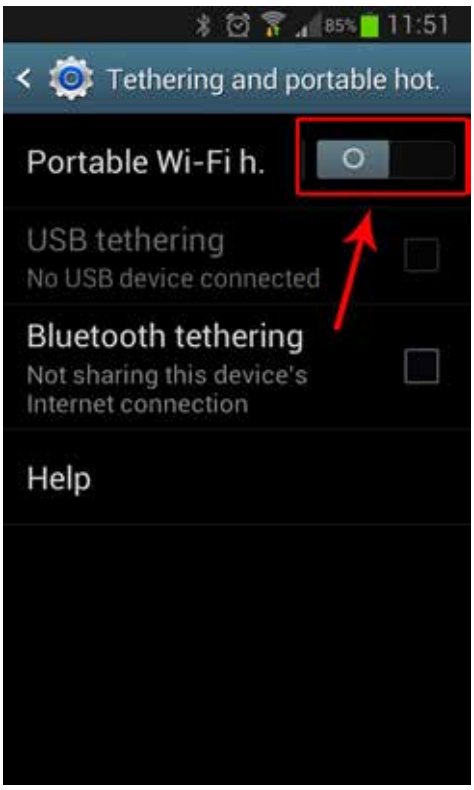
·YOUR ANDROID SMARTPHONE AS HOTSPOT

- Go to the Settings menu and choose “more settings” in the Wireless and network section.

- Choose the “portable hotspot”, “tethering”, “share your device”. Each android device may have different messages.



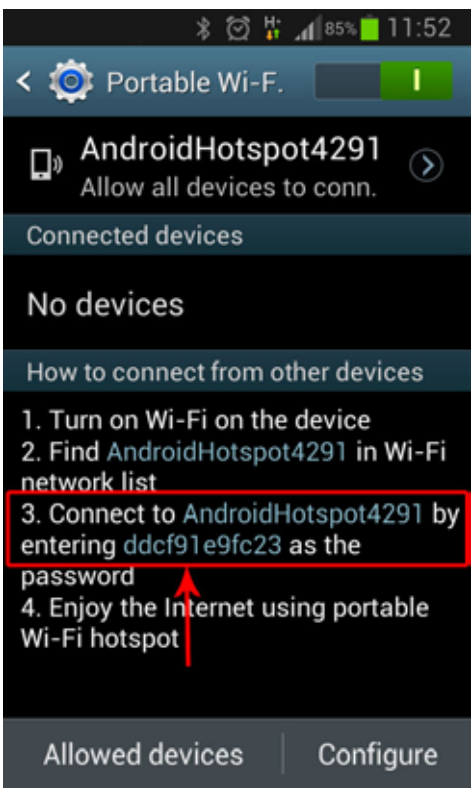
- Enable the “portable Wi-Fi”

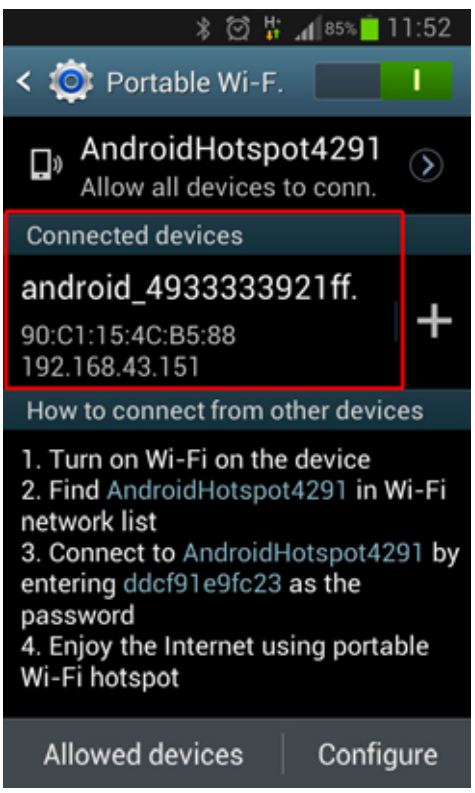


- Choose “OK”

- Once enable, choose "Portable Wi-Fi" to configure the hotspot settings.

- The name of the network and the password will appear, you may configure as well.
- Here you can see if there are any devices connect to your Smartphone.

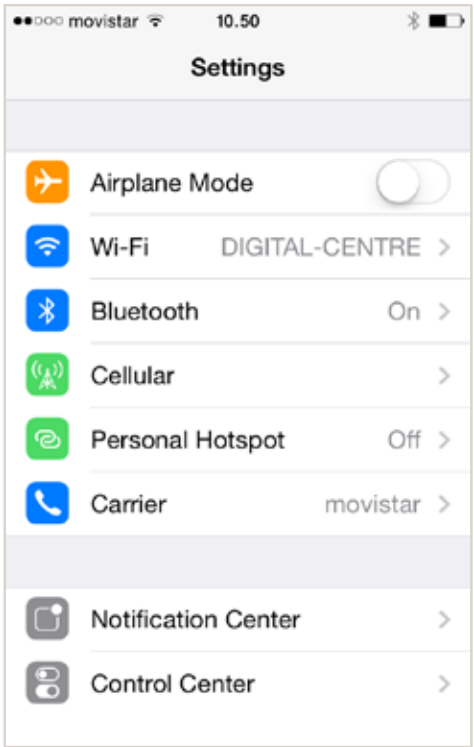




- Connect the PhotoBooth to this network.

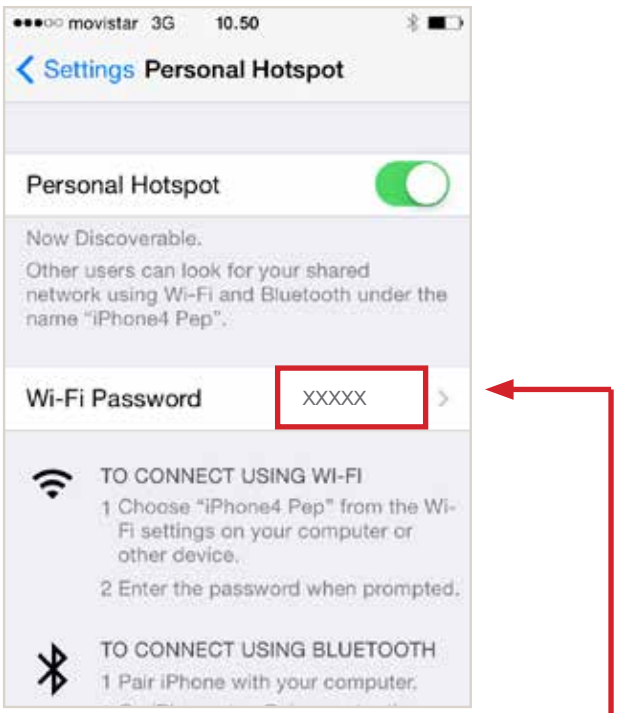
· YOUR IPHONE AS HOTSPOT

- Go to the Settings menu and choose "Personal Hotspot"



- Enable the "Personal Hotspot"

- The Wi-Fi password and the network name will be shown.



- Connect your PhotoBooth using this password.

13.7.6 SHARE SECURE

Nowadays, the majority of PhotoBooths send photos over the Internet.
It's all so safe, so we think? The answer is no!

Minors are a big part of PhotoBooth users. Are they secure when typing private data in a public area?

Every year there are hundreds of cases of identity theft, scams, account lockouts, reception of spam, viruses, etc.

Imagine that you are with a friend in a PhotoBooth and you want to send the photo to your email address or share the photo on Facebook. The majority of PhotoBooths make you enter your personal data, or login to your account, while in the PhotoBooth. You are typing your personal information in a public terminal where third parties could access and steal the data, and second, you are writing your password in the presence of another person. It isn't secure.

Therefore, Digital Centre now introduces **Share Secure**. You won't have to type your email address to log on to Facebook or Twitter because our PhotoBooths will send the photos to your smartphone, and it is your personal smartphone which will manage the photos safely.

• WHAT'S SHARE SECURE?

Share Secure is a service that DC offers in all their PhotoBooths.*It ensures reliable delivery of photos via the Internet to guarantee a safe and private transmission.

**Internet connection is required for Share Secure.*

• HOW IT WORKS

You can view and share photos and videos through your phone or computer without having to provide personal information to the PhotoBooth.
You don't have to give your details to the PhotoBooth exposing yourself to unsafe public terminals where third persons may steal information, passwords, or identities.

• ADVANTAGE

1. Reduces the risk of identity theft. There are many real cases of identity theft and it is most important for DC to preserve the privacy and safety of its users.
2. Protects confidential information like email address, telephone number, home address, etc., because it isn't necessary to type your personal information in any DC PhotoBooths.
3. Assures users that the information will be sent to the recipient securely.
4. Don't have to type your details over and over again.
5. Probability of error is zero because everything is from your smartphone. How many times do users make typing mistakes when entering their email address? Or how many times do they forget their password? Your smartphone has all of your personal data, and all your photos and videos will arrive safely, confidentially, and without any error.

This option is available for all users of Digital Centre PhotoBooths. You have two ways to see your photos:

1. Manually: Through the QR Code printed on the photo that can be scanned from your smartphone.

2. Automatically: The smartphone will link the user with the PhotoBooth, and will immediately send the photos to the smartphone, without typing any phone number, user, email or password.

13.7.7 DIGITAL CENTRE APPS

What can the APPS do for you?

OWNERS can control their PhotoBooths in real time. This tool is way ahead of just getting a daily report in your email.

- Running out of Film?
- Cash box full?
- The PhotoBooth should be ON?
- Full report
- My Locations
- Order Film automatically
- News
- Upgrades
- Alerts

USERS get their pictures at the Smartphone automatically, together with extra functionalities get their photos at the Smartphone automatically, together with extra functionalities. The first social network application for PhotoBooths that allows sharing, voting, and the ability to comment on funny photos with friends and family or with other members.

- SHARE SECURE with all their user names, passwords or emails. Users never type any confidential data at the public kiosk.
- Post on Facebook, Twitter and email automatically
- Post at the WALL and get votes
- Meet other PhotoBooth Users and vote them
- Monthly TOP 10 gets prizes
- Locate nearby PhotoBooths
- …..and much more coming!

PhotoBooths

MyPhotoCode

12.3.1 PHOTOBOOTHS APP FOR OWNERS

PHOTOBOOTHS APP (for OWNERS)

This APP has been created for DC PhotoBooth owners.They will control all their PhotoBooths remotely and ON TIME. It has an interactive map where you can see your location, and the location of your PhotoBooths.
It will WARN you if any PhotoBooth is running out of Film, cash box full, or if they are not working properly. The owner decides to be warned when the Film stock is 50 prints, 100 prints or whatever. The same with the cash box.
There's an option to contact DC directly from the application, or suggest some improvements.
If your PhotoBooth is running out of Film, you can reorder by pressing a button only.
This APP makes management easier for all PhotoBooth owners.
Improve the Income of your PhotoBooths! Save time and money.

12.3.2 MYPHOTOCODE APP FOR USERS

MYPHOTOCODE APP (for USERS)

MyPhotoCode is a new application to your Smartphone from Digital Centre. It is free for all users of DC PhotoBooths. It gives extra value to the money they put in the PhotoBooth, and increases the sales because players can make easy copies or take new pictures.
With this APP users will see, on his/her Smartphone, all the photos taken in any DC PhotoBooths, no matter when or where the photo was taken.
Users can instantly post on Facebook or email, and post at the Wall. The Wall is the nationwide place where all users can post their photos and see what other users from other locations do. Users can vote for best pictures and see the Monthly Top 10 from the Nation!
The APP will link the user with the PhotoBooth when he/she starts using it, and will immediately send the photos to their Smartphone, without typing any phone number, user, email or password.

14-TROUBLESHOOTING2

·GENERAL PROBLEMS

Problem
The unit switch is ON, but it does not turn on

Causes
The unit is not plugged in.
The voltage is incorrect.
Overload: the fuse over the electric socket has been blown.

Solutions
Check if the unit is correctly connected to the electric ground.
Check if the electric ground is receiving electricity.
Be sure that the voltage is correct.
Change the fuse.

Problem
The fluorescent does not turn on.

Causes
The fluorescent lights have been blown.
The transformer has been blown.

Solutions
Replace the fluorescent lights
Replace the transformer

·MONITOR'S PROBLEMS

Problem
The monitor image looks darker or lighter

Causes
The monitor is not adjusted correctly.

Solutions
Readjust the monitor.

Problem
The monitor image moves up and down

Causes
The monitor is not adjusted correctly.

Solutions
Readjust the monitor.

·LEDSCREEN'S PROBLEMS

Problem
The LEDSCREEN shows three RGB lines.

Causes
Possible bad connection of the Raspberry or error in SD card.

Solutions
Check connections and SD card.

Problem
LEDSCREEN shows all black.

Causes
Possible bad connection of the sending board.

Solutions
Check that the sending board lights are blinking. If it's not blinking you have to check the connection.

·SOUND PROBLEMS

Problem
The sound does not work

Causes
The volume is not correct.
The configuration menu has the sound set to OFF.

Solutions
Adjust the volume with the control placed below the test, free-play and start buttons.
Change the sound configuration from the test menu (black button).

·PRINTER PROBLEMS

Problem
The printer does not print any photos

Causes
The printer is disconnected.
The printer is out of ink or paper.
The paper or the ink sheet was not properly installed.
Incorrect paper.
USB/ LPT Atmel chip position is incorrect.

Solutions
Switch on the printer.
Call the person in charge
Correctly place the paper and the ink.
Use only CK9550-DC type paper.

Problem
The printer does not switch on

Causes
The printer is disconnected.
The printer does not receive electric supply.

Solutions
Connect the printer.
Be sure that the cable is correctly connected.

Problem
It prints one or more white lines

Causes
Thermal head is broken.

Solutions
Replace thermal head.

·PC PROBLEMS

Problem
Install a brand new Control Board with Atmel chip and jumpers.

Causes
This problem is due to a hardware malfunction.
Check the green Capture Board, as it is probably out or half way in.

Solutions
Turn OFF the PC.
Take out the Capture Board. And put it again (all the way in).
Screw in tightly and check again that it is all the way in, and did not move little out during screwing.
Turn ON the PB and check it.

· **WARNING**
· If you have any doubts or any problems with the unit and it's performance, call a technician to solve the issue.

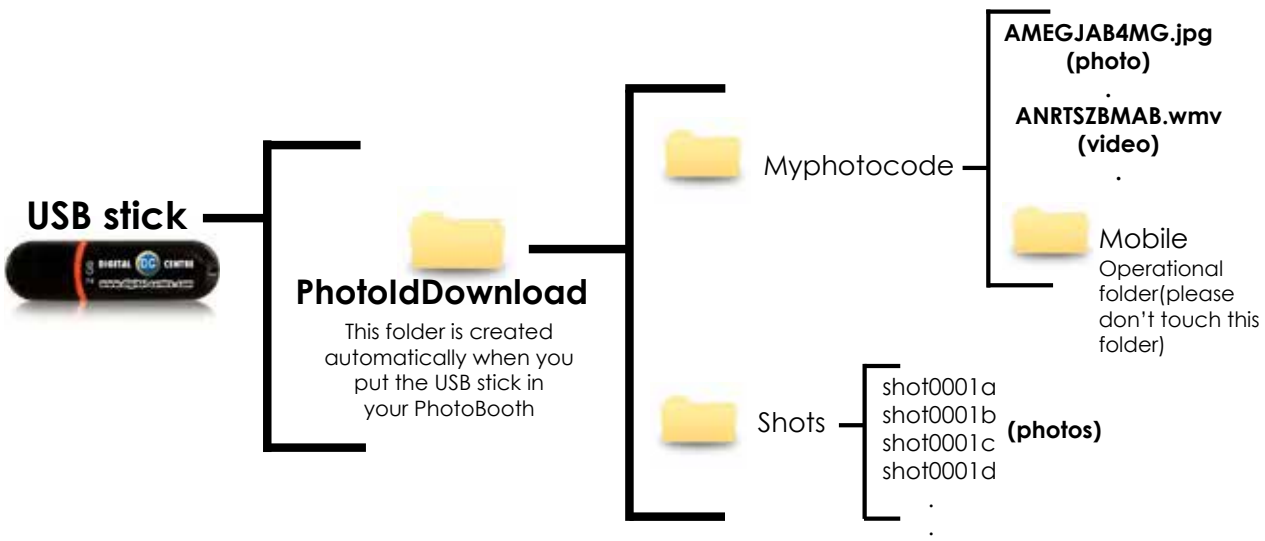
14.1 PROBLEMS UPLOADING THE LOGO

Possible causes:

1-USB is damaged

· Let's make a test to see if it works at the computer.
· Plug the USB STICK at the front of the PC (HP C2D), and go to Set Up Menu. Then exit the Menu.
· Take a picture by choosing the product you want.
· After the game, Remove the USB STICK.
· Plug the USB STICK in your PC or LapTop.
· Check if the USB STICK contents the **PhotoIdDownload** folder.
· It should be 2 folders into the PhotoIdDownload and your picture should be there.
· If your picture is not there, the USB STICK is not working properly.



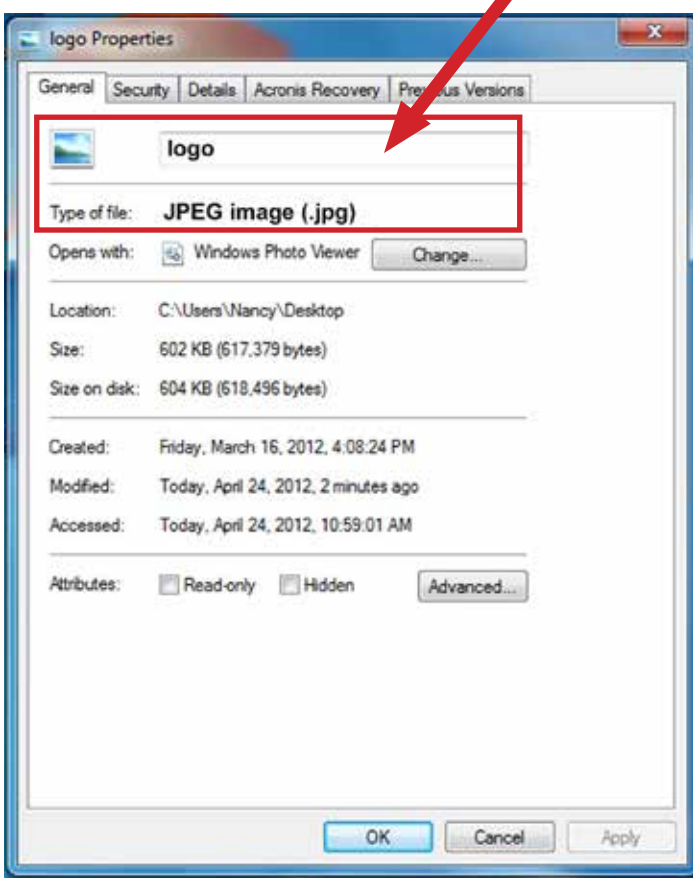
It's recommended to use a USB drive with LED and 2GB of space.

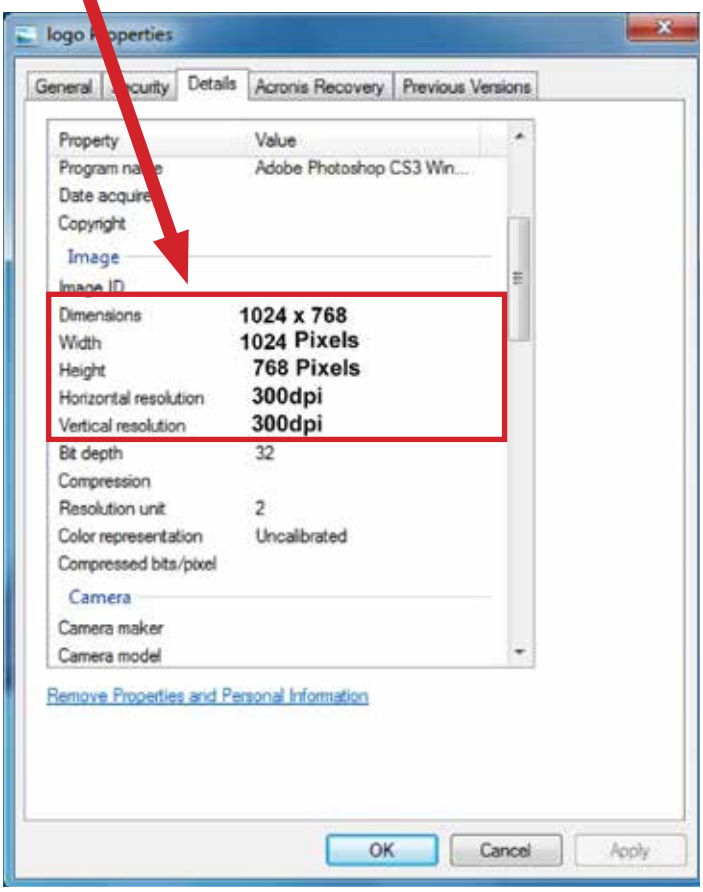
2-The logo specifications/characteristics are not correct

- Plug the USB Stick in your PC or Laptop.
- Locate the logo, Placed on the logo and click the right button on your computer mouse to open properties.
- The properties should be as follows.

Click the right button

- **Check the logo specifications**





Logo specifications:

Name: logo
Size: width: 1024 pixels
height: 768 pixels
Resolution: 300dpi
Extension:JPG
Color mode:RGB

logo.jpg

logo .jpg
Name Extension

NOT ~~logo.jpg.jpg~~

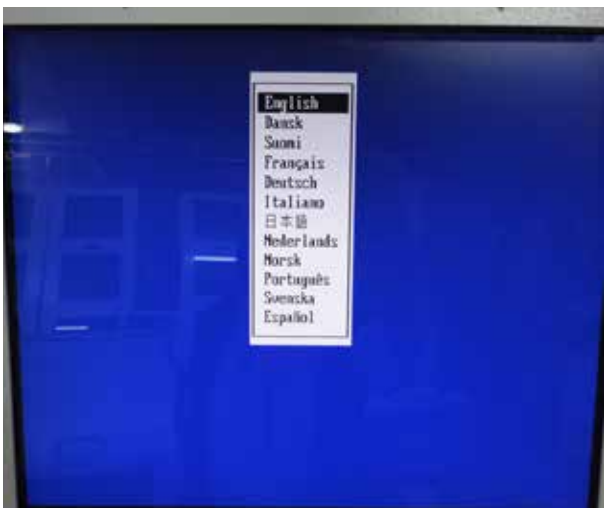
If it doesn't working, consult a professional designer to assist in changing the logo.
ADVANCED USERS: Use the following web site for suggestions; **http://www.webresizer.com**

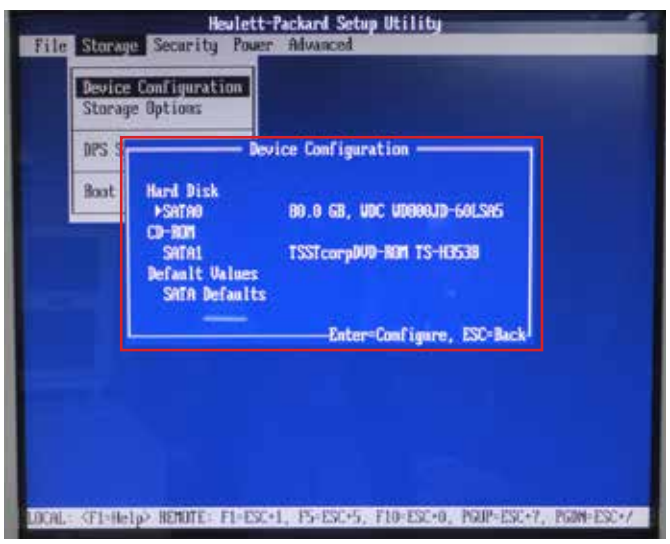
14.2 HARD DRIVE

Hard drive error

This procedure is to check if the BIOS settings are correct for an Automatic BOOT-DVD.
WARNING!!! This procedure is very dangerous and could cause a PC Malfunction. Please read it carefully and follow all steps one by one.

1 · Plug in a Keyboard to the PC.
2 · Turn ON the PC (or the whole PhotoBooth).
3 · When the ASRock screen appears, press "F10" several times until the "BIOS SETUP UTILITY" appears on the screen. If it does not come up, and the software continues uploading, then go back to the Step 2.



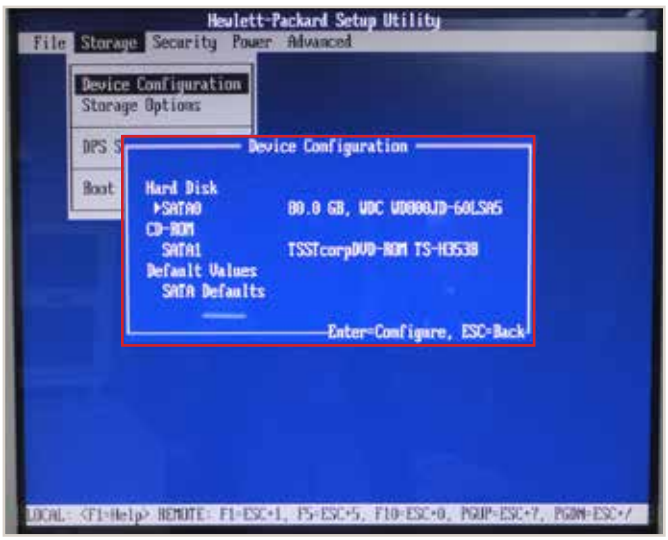


4 · With the Keyboard arrows, move up to the Storage Menu, here we are going to check the following thing:
· Device Configuration (step 5)
· Boot Order (step 6)

5 · Once you are inside the "**DEVICE Configuration**" please check the following points:

- "Hard disk" should be connected at SATA0
- "CD-ROM" should be connected at SATA1

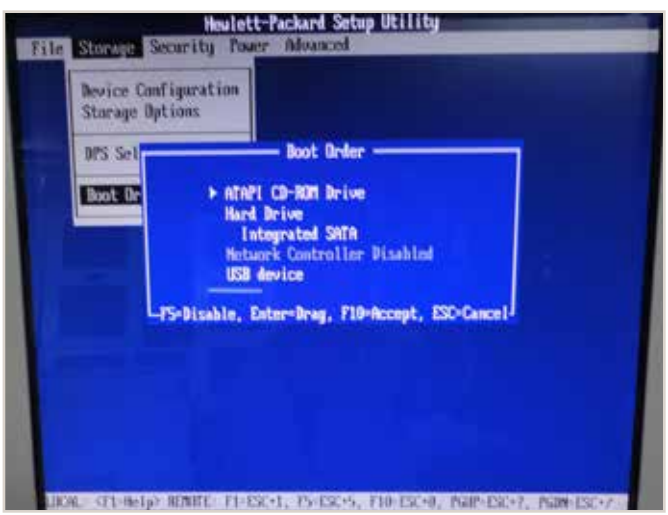
If everything is OK, press ESC to return the Main menu.
If Hard disk or CD-ROM or Both are not detected, we should check the PC connections. (Do this work with the PC unplugged from power).Go to step 8



6 · Once you are inside the "**Boot Order**" please check the following points:

- "ATAPI CD-ROM"
- "Hard Drive"

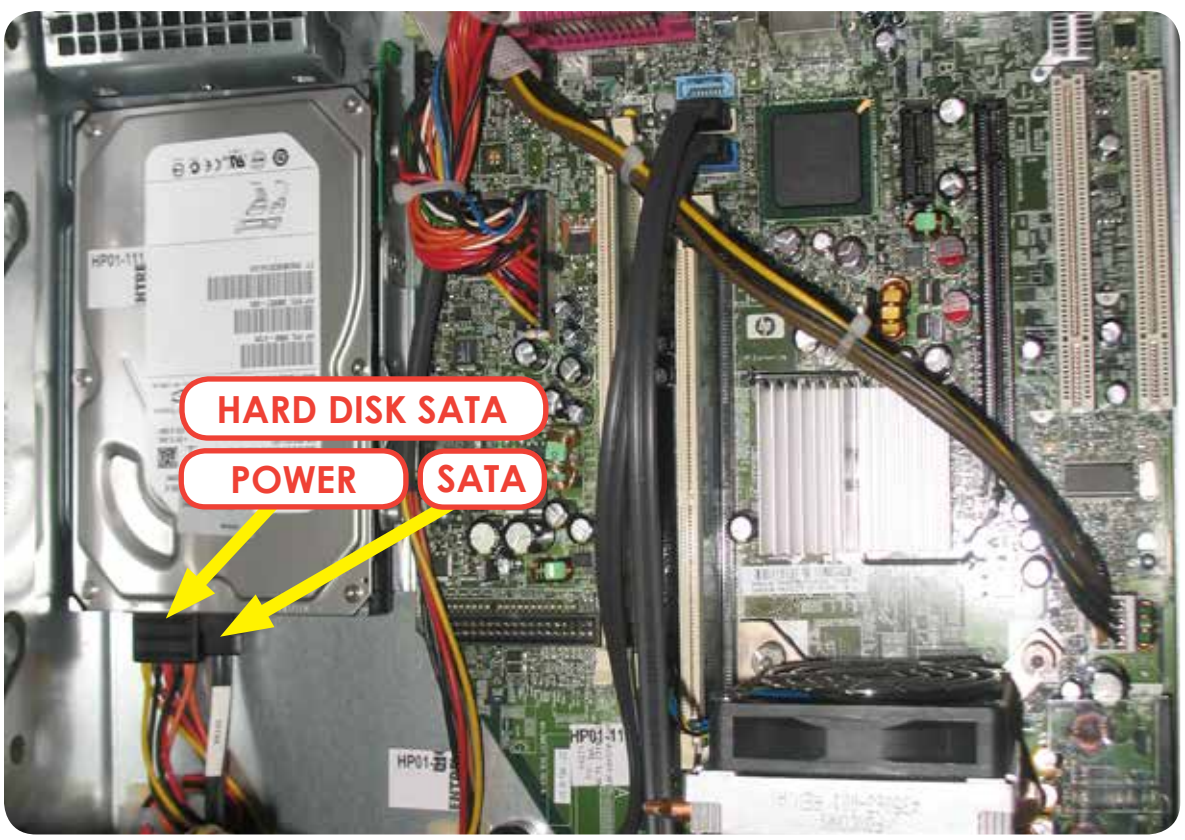
If ATAPI CD-ROM or Hard Drive or Both are not detected, we should check the PC connections.(Do this work with the PC unplugged from power).Go to step 8

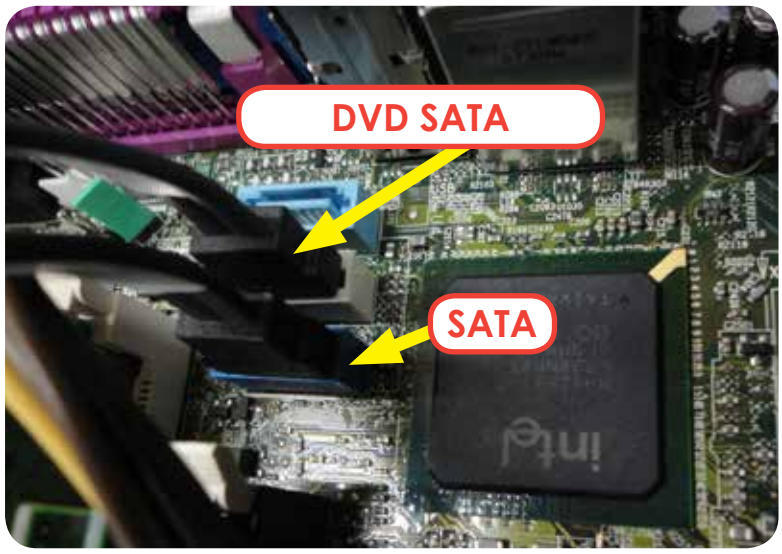


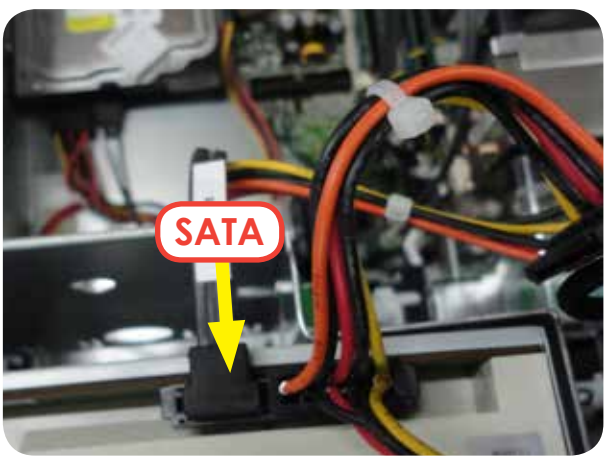
7 · With the Keyboard arrows, move right to the Advanced Menu here we are going to check the following thing:
· Select Power-On Option and confirm that the "After Power Loss" is ON

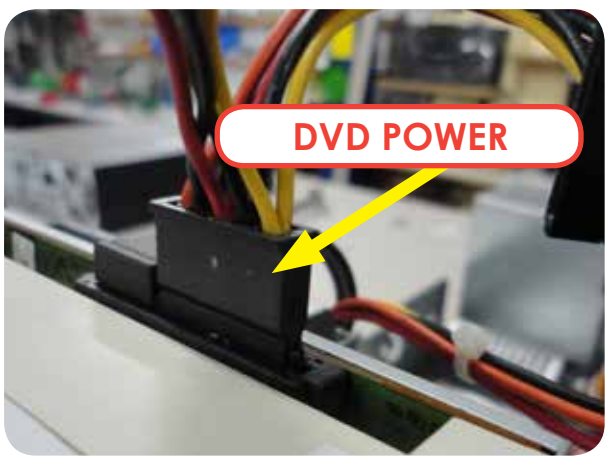
8 · Unplug the PC from the power.
9 · Open the top cover (there are 2 screws in the top back side of the PC)
10 · Check connections as follows:
Please pull up the green arrows from the DVD ROM and from the Power supply and check the connection as it shows in the following pictures.

IF The Hard Disk is SATA + DVD SATA it will be like this:









11 · If all connections are fine (as it appears in the pictures), then it is possible that the component, which is not detected at the "IDE CONFIGURATION" Menu, is physically damaged. Please contact Digital Centre for a new part.

14.3 BOOT DVD

To Update the Machine or change the software version, please follow these steps:

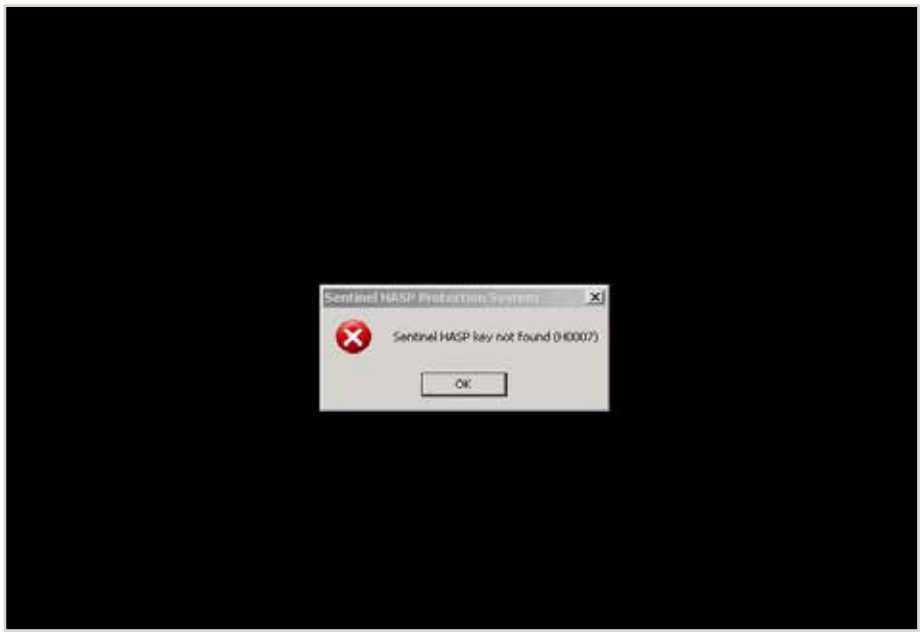
1 · Open the DVD Driver.
2 · Insert the "Boot DVD".
3 · Plug Off the Machine.
4 · Plug On the Machine after 10 seconds.
5 · Wait while the restore program reinstalls the software (a progress bar appears on the screen).
The time process is about 30 minutes
6 · A black screen appears when the process finishes.
7 · Extract the DVD disk.
8 · Plug Off the Machine.
9 · Plug On the Machine after 10 seconds.

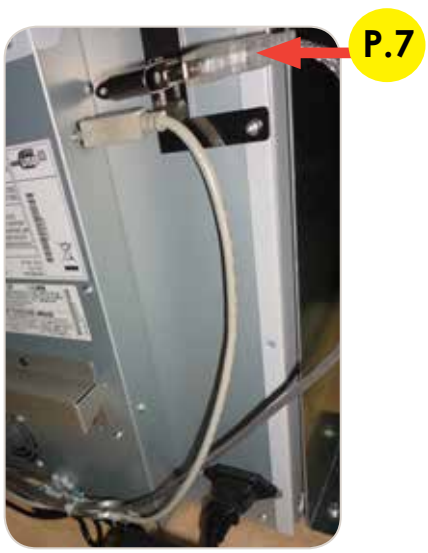
CUSTOMIZED FRAMES:
If you have customized frames and/or logos now is the time to upload.

To upload your customizations: put the USB Stick in the pc, go to the Setup Menu Customize, and press the LOAD button. If your USB is not detected, press EXIT and enter again to the Setup. **(view pag.130: Load from USB section)**
To view your frames, in the Setup menu, the Frames Option has to be in Custom mode.

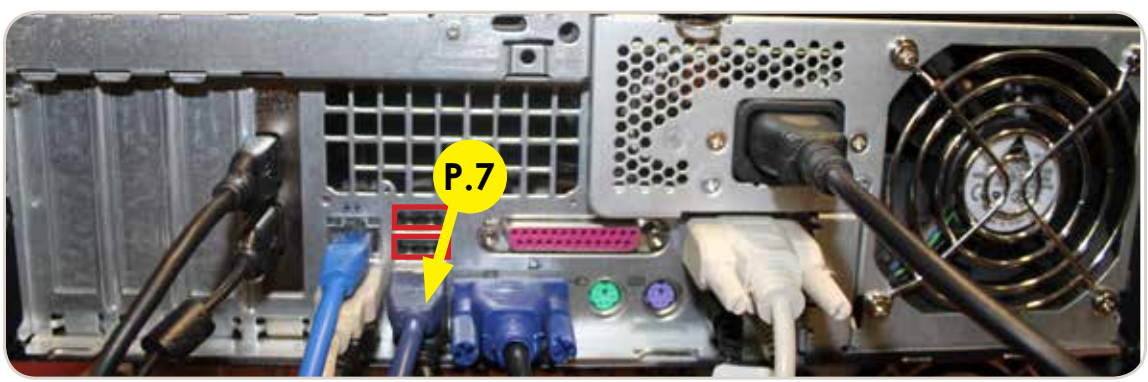
14.4 DONGLE ERROR

If you switch on the PhotoBooth and the following message appears; "Sentinet HASP key not found (H0007)", it means that the printer dongle is not well connected. The USB dongle must be connected on P.7 (please see picture).





P.7 Dongle. USB Extension AM/AF From Dongle to PC. (180 cm - Inch 70,87)



P.7 Dongle. USB Extension AM/AF From Dongle to PC. (180 cm - Inch 70,87)

14.5 CAMERA ERROR

When you take a picture and your screen appears black please check the USB connection from the camera. The USB must be connected on P.10 (please see picture).

P.10 Camera. USB Extension AM/AF From Camera to PC. (180 cm - Inch 70,87)

14.6 TOUCH SCREEN ERROR

If the power card is properly plugged then the LED is green.

If the power card is properly plugged then the LED is blue.

String - PhotoBooth Model - Software

14.8 THE "PLEASE WAIT" ERROR

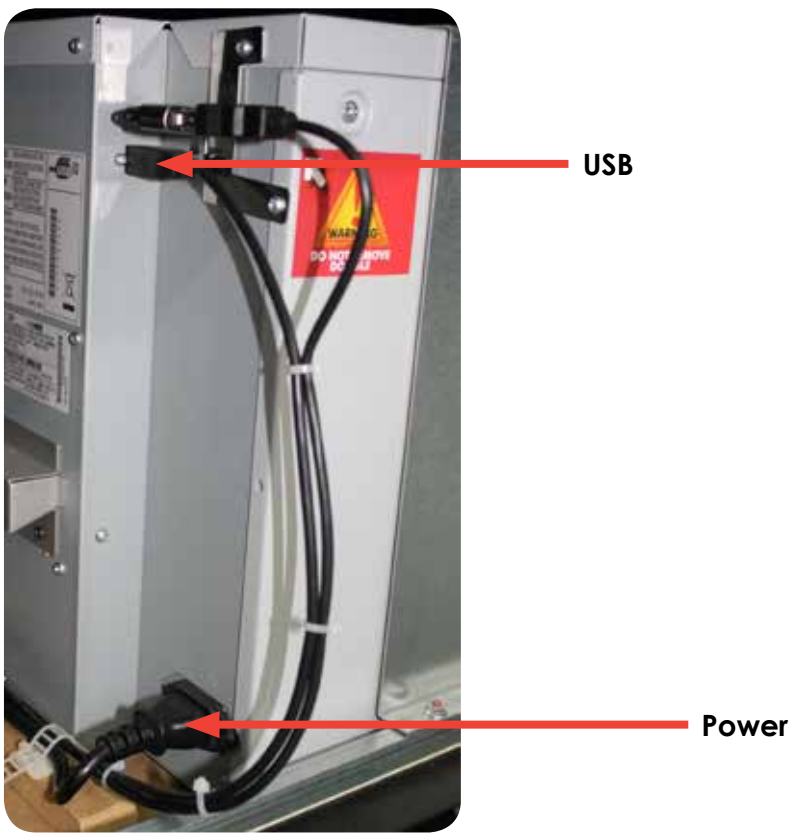
The "Please Wait" error is very common. It looks like the PC freezes, but it isn't. The problem is that the computer is waiting for the right components.

When we turn on the Photo Booth, the computer shows the "Please Wait" screen while it checks the Control Board, the USB adapter and the Printer. If any of the components are not ok, the software doesn't go ON.

So, when we face this problem we have to check the 3 components. The procedure is as Follows:

1 · Check the Printer lights ON. Should be ON the following lights "POWER" and "READY". If any other light, please fix it and Turn OFF and ON the Photo Booth.

2 · Check the Printer Connections. Power and USB, just 2 wires.



3 · Check the Control Board Serial Connection. (That is the common problem Point). (attached 2 pictures: Correct and Error "Please Wait"). This connection is very easy to lose during transport, or when we work at that area.

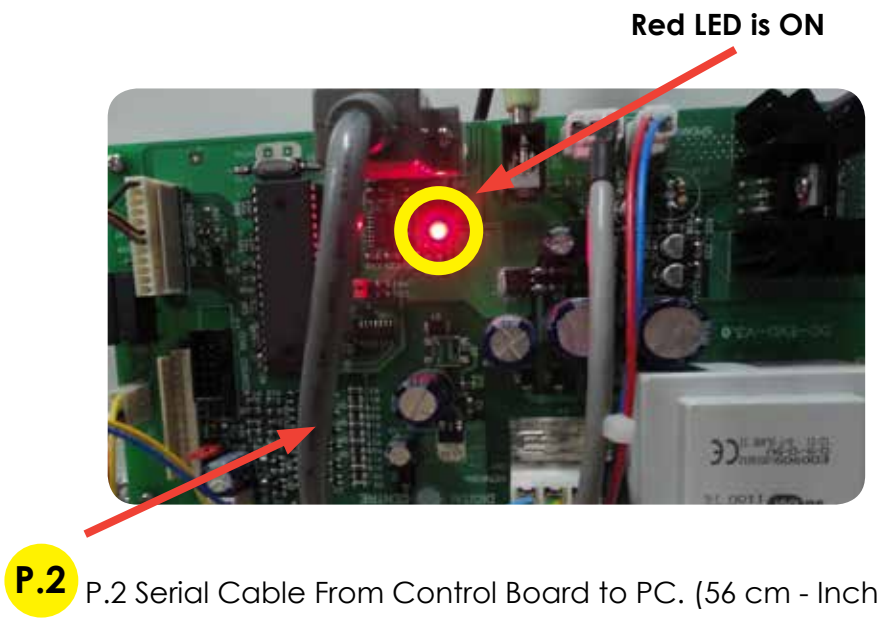
14.9 NO SIGNAL

Check if the PC lights are ON.
If the lights are on then it appears that the PhotoBooth is working but the monitor is not.
Next steps:
When you turn ON the PhotoBooth, can you see any message on the screen? (ex; manufacturer name, or "NO SIGNAL")?
If this is the case, the VGA cable is probably unplugged or damaged.
But if nothing is on the screen (when you turn ON the PhotoBooth), please check if there is power to the Monitor. Power cable is probably unplugged from the monitor.

14.10 CONTROL BOARD ERROR

The control Board is the green board located behind the PC. It doesn't mean that the Control Board is bad; it could mean that the PC could not connect with the Control Board (because the Serial cable is not correctly connected).

Check following points:
1 · Check the Control Board Serial Connection "P.2".(That is the common problem point). (attach 2 pictures: Correct and Error "Please Wait"). This connection is very easy to lose during transport, or when you work at that area.
2 · If all connections are good, then check that the Control Board Red LED is ON.
3 · If all the 2 points are OK, but still doesn't work, please send the Control Board to Digital Centre (contact the Support Team before sending)



P.2 Serial Cable From Control Board to PC. (56 cm - Inch 22,04)

USB CONNECTIONS PC HP-C2D v2 (PCI-USB card with 2 slots)
P.2 Serial Cable From PC to Control Board M/F. (56 cm - Inch 22,04)

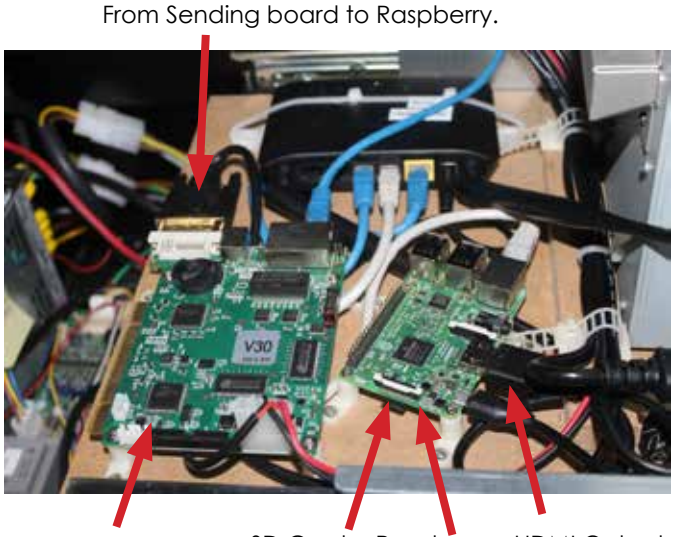
14.11 PROBLEMS WITH LEDSCREEN

CONNECTION WITH RASPBERRY

If the LED screen shows three stripes of red, green and blue (RGB) means no video signal comes. Maybe it's a connection error between sending board and Raspberry. You should check the connections and the SD card.

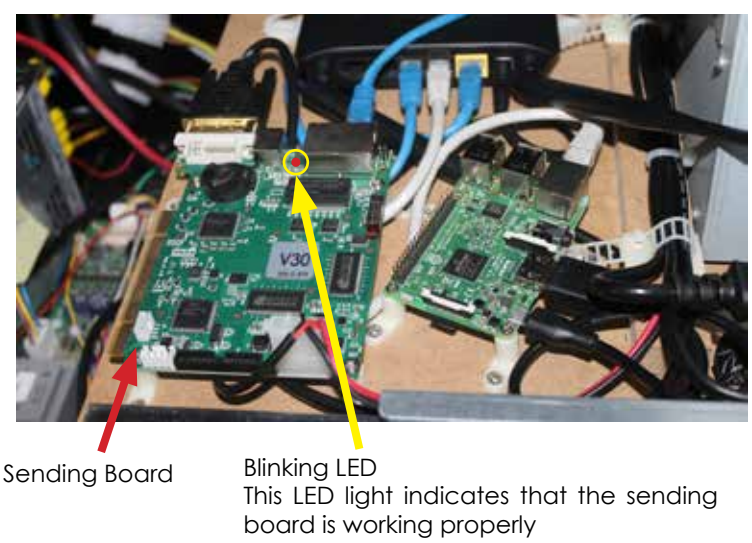
*See **4.6 LEDSCREEN** for more information about connnections.*

LED screen shows RGB

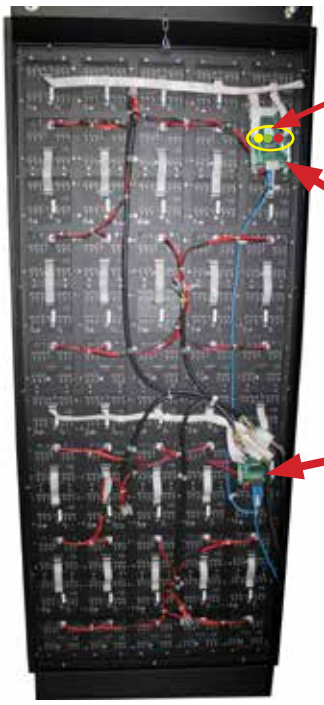


CONNECTION BETWEEN SENDING BOARD AND RECEIVER CARD

If the LED screen is black maybe because there is a connection error between the sending board and receiver card. If the light of sending board and receiver cards are blinking it means are working properly. If the light of sending board and receiver cards are not blinking it means are not working properly and you have to check the connection between these two parts.



LED is black



CONNECTION WITH THE POWER SUPPLIES

As we have seen Rapsberry, router, sending board and receiver cards have lights that indicate they are operating. If any of these lights is not lit, it could be that there was a problem with the power supply.

Receiver card

Router

Sending card

Raspberry

16-FAQS

16.1 HOW TO CONNECT AN EXTERNAL SCREEN OR PROJECT

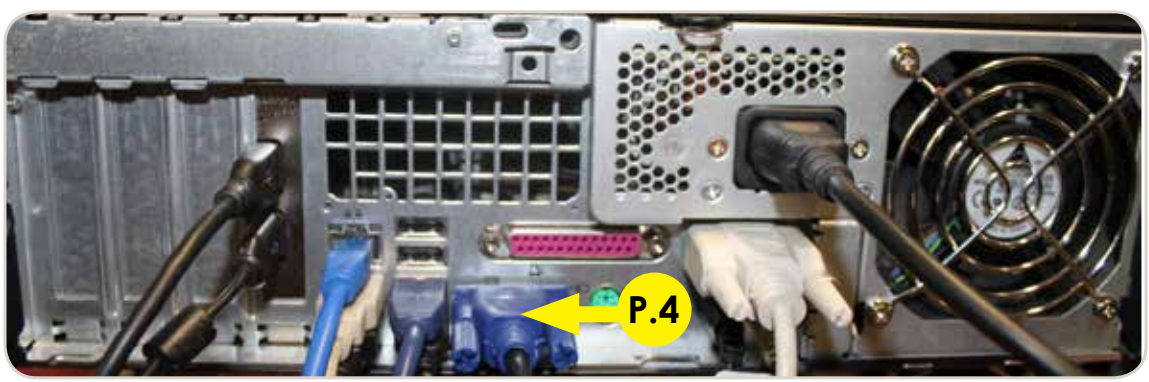
· You need an external screen and a "VGA splitter"

⚠ **WARNING:** under its responsibility

· Put the external screen outside or above the PhotoBooth and plug the power of external screen (Plug the external screen on a external socket)

· You need de VGA splitter. The screen of PhotoBooth have a single VGA, unplug the single VGA and plug de VGA splitter. On the VGA splitter, you have to plug one end to the single VGA and the other end at external screen.

What you will see on the external screen is a replica of the screen photoBooth. (a mirror)



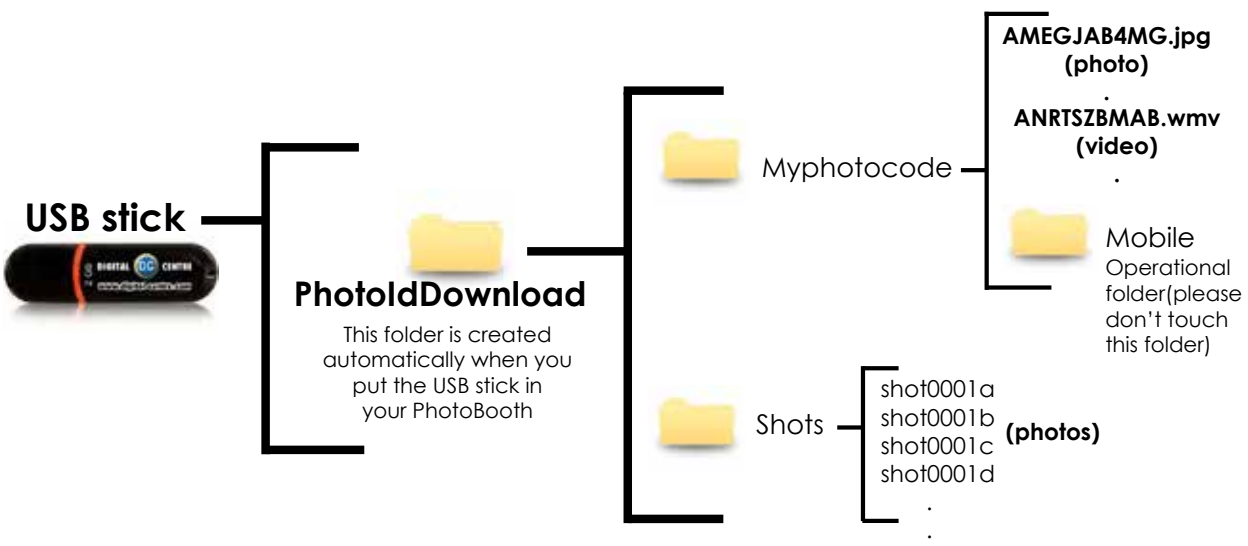
P.4 VGA Cable From Touch Monitor to PC. (180 cm - Inch 70,87)

16.2 PROBLEMS UPLOADING THE LOGO

Possible causes:

1-USB is damaged

- Let's make a test to see if it works at the computer.
- Plug the USB STICK at the front of the PC (HP C2D), and go to Set Up Menu. Then exit the Menu.
- Take a picture by choosing the product you want.
- After the game, Remove the USB STICK.
- Plug the USB STICK in your PC or LapTop.
- Check if the USB STICK contents the **PhotoIdDownload** folder.
- It should be 2 folders into the PhotoIdDownload and your picture should be there.
- If your picture is not there, the USB STICK is not working properly.



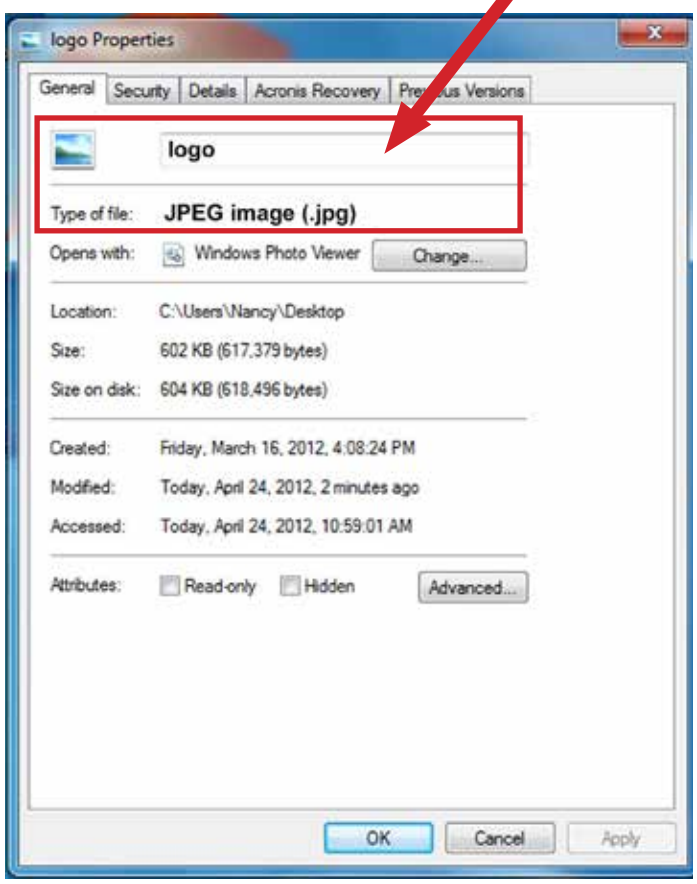
It's recommended to use a USB drive with LED and 2GB of space.

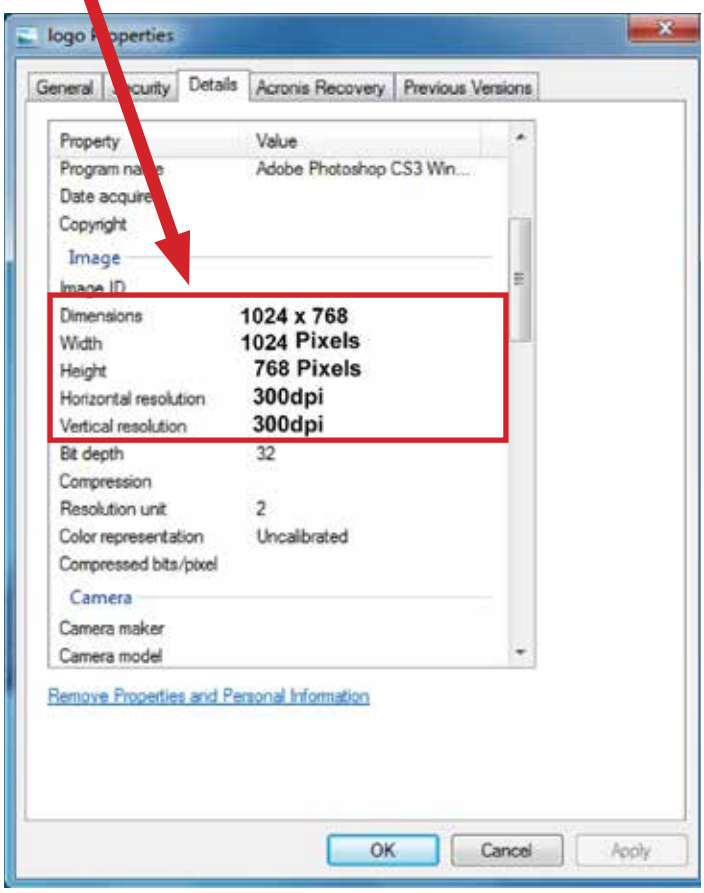
2-The logo specifications/characteristics are not correct

- Plug the USB Stick in your PC or Laptop.
- Locate the logo, Placed on the logo and click the right button on your computer mouse to open properties.
- The properties should be as follows.

Click the right button

- **Check the logo specifications**





Logo Technical Details:

Name: logo
Size: width: 1024 pixels
height: 768 pixels
Resolution: 300dpi
Extension:JPG
Color mode:RGB

logo.jpg

logo .jpg
Name Extension

NOT logo.jpg.jpg

If it doesn't work, consult a professional designer to assist in changing the logo.
ADVANCED USERS: Use the following web site for suggestions; **http://www.webresizer.com**

16.3 RECOMMENDATION: USE EMPTY USB STICK

Whenever you create an USB Stick for a new event, make sure the USB stick does not contain photos of past events, this could lead to mix photos of past events with new events, and even lose some photos.
To ensure this, check if your USB Stick has a folder called PhotoldDownload and make sure this folder is empty. If the USB Stick does not have this folder, do not worry, when you plug the USB Stick at the PhotoBooth, this folder will be created automatically.

16.4 STICK USB STICK NOT DECTED

Please try the following procedure.
1-Plug the USB stick
2-Go to configuration and press LOAD, if it says USB not found then EXIT the configuration and TRY again.
3-If it keeps saying USB not connected, please try another one USB.

16.5 RECOGNITION DEVICE

When you connect the USB sometimes it takes a while to be recognized by the computer.

16.6 CARD READER

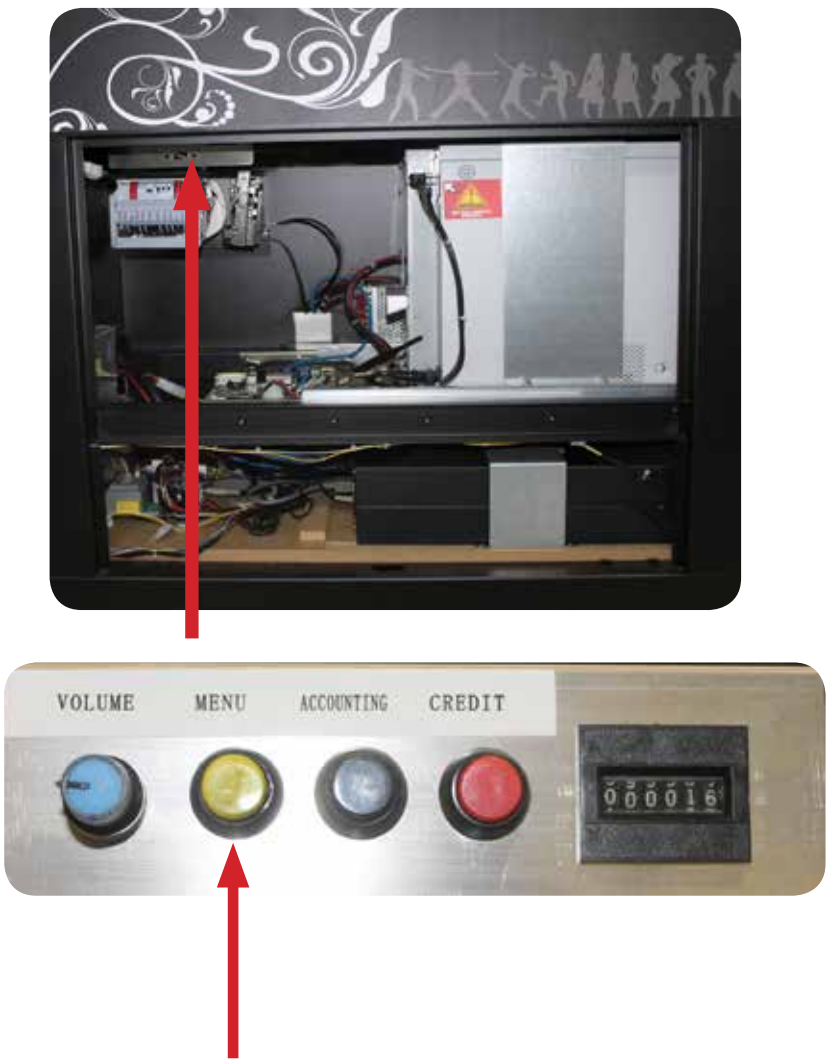
If you want a card reader please contact DCA.
Sales: Ph: +1.305.387.5005 / sales@dc-image.com
Tech Support: Ph: +1.305.387.5115 / support@dc-image.com

⚠ **WARNING:** Is very important to connect card reader in the slot indicated

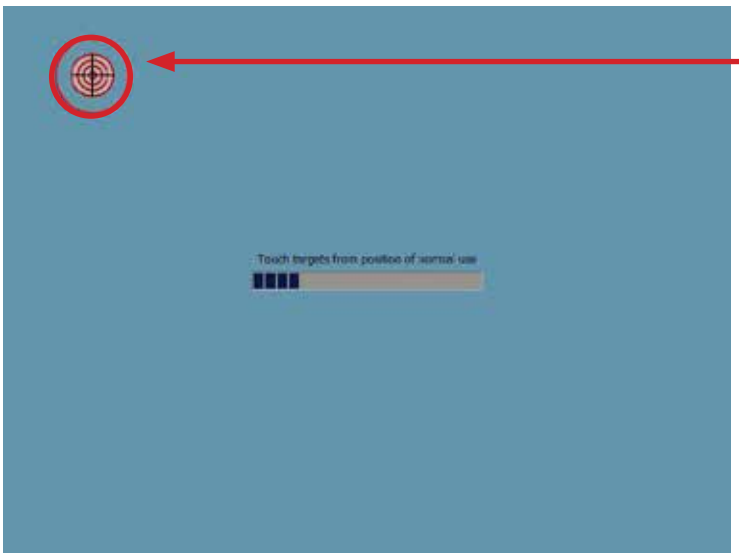
16.7 TOUCH SCREEN CALIBRATION

This procedure should be done:
-After installing a new Boot
If the screen does not respond to the touch of your finger.

Press the yellow button and after 7 seconds press it again. This will take you to the calibration mode screen.

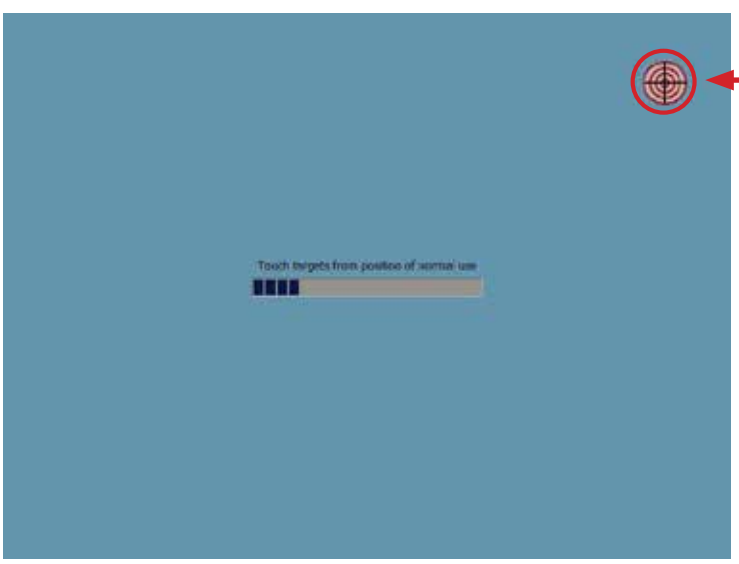


Press the yellow button and after 7 seconds press again.



Calibrate the screen: Touch the center of the target (1 time only)

Calibrate the screen: Touch the center of the target (1 time only)

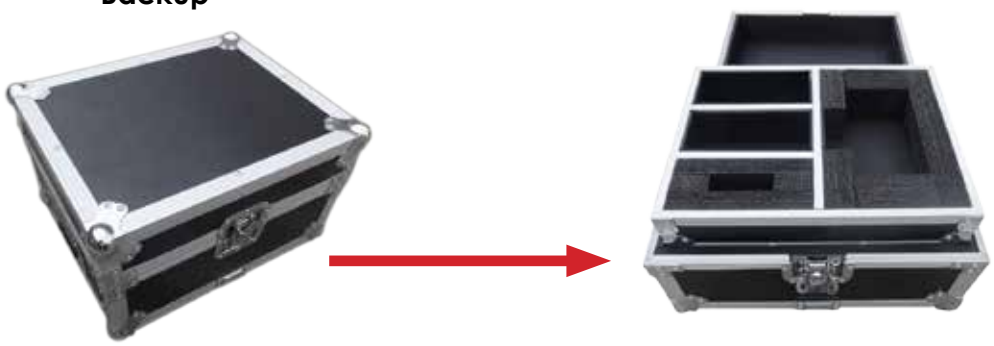


After the 3 targets, drag your finger all around the screen to make sure the cursor follows finger and press OK or the check mark.

17-OPTIONALS

Flight case

Backup



Printer 9550

Printer 9810

Wifi kit

With this kit it is possible to establish a connection with the Internet in your PhotoBooth without any cable.

Sign

Photo Sign

A blinking sign to capture the attention of people passing by. Draw in potential customers and increase your sales.
A very effective tool.

Sign Screen

Sign Screen

To grab the attention of passerby's, DC offers a new Advertising Sign which displays advertisements along with captured photos via its luminous appearance.

Put a captivating sign on your PhotoBooth!
